

## Cure My Addiction - Island Guide (0.5.2)

Use this guide when you are stuck on the island or when you have 100% completion on the island and look for a special event to replay.

### On the Yacht

Most players will likely have around 100% completion of 0.4.3 content, but 100% on the yacht is not a requirement for the island.

The idea with the trip and MC being in charge of the girls is adapted by Rachel when MC spansks her and gives her corner time for being unfair to Emily. ("The Rachel Deception") This event is one of the requirements to unlock "Spending time with Emily" and is done after "moving" Amy to Rachel's room. So the island should unlock around the same time as "Spending time with Emily", but it takes some more talking.

See Notebook entries after giving Rachel corner time :

Talk to Rachel when she is alone, e.g. 8am at the terrace.

Talk to Susan.

Talk to Linda.

Wait for announcement at dinner.

Talk to Chloe.

Talk to Emily.

Talk to Amy.

Use phone in doctor's room and order supplies.

The next morning (?) at breakfast departure is announced.

### Island general info

The Island features 4 different paths (Chloe, Amy, Emily, Rachel) and several minor events (with probably more to come.) MC can complete only one path per week (due to exclusive requirements) but he can work on completing all minor events. Completing a path gives a special reward scene on the last day (Day 7) at 14:00. It is likely that completing a path will also have further consequences (dialogs, events) on the yacht in coming update v0.6.x.

After the week, MC can return to the yacht or stay another week on the island and do another path. If MC is back on the yacht, he can talk to Rachel to get back on the island for another week. It takes about 3 weeks to do all the minor events and 4 weeks to do all the paths and see the special scenes.

At the beginning of an island week the progress in minor events and the 4 stars on top for completed paths are not reset, but the stars for the weekly progress in the 4 paths on the left are, since they are used to determine, which reward MC gets at the last day (Chloe, Emily, Amy, Rachel or none).

Starting a new week on the island does not reset the total day-count (= number of days MC spent in the game so far). Spending 4 weeks there to complete all paths should increase the day-count by  $4 \times 6 = 24$  days. (The last day of an island week is the first day of the next island week.) (In current version there is a small bug that depending on activities less total days can be counted.)

Staying in the Living Room allows to skip the outside events which allows to quickly advance to a certain day of the island week in case that only a special event is of interest.
