

## Welcome to the Walkthrough

I realized that it was not so obvious for each of the players to get all the scenes in the game.  
So I decided to create this walkthrough as suggested.

### **About the debate on the futas:**

The character is hermaphrodite (he / she has both sexual attribute) but he/she can minimize his/her male attribute. From the first day (March 20th), you will always have the choice, the spell will be automatically launched, according to the given contexts, and this without any cost in dark energy. However, there will be differences of effects on certain characters that will remain logical in relation to the actions undertaken.

The best is to realize the two paths on different new games but I fully understand the repulsion of the style Futa for some players, I take it completely into consideration. If you want to see all the endings, it will take more than two new games anyway.

Do not forget that this game is aimed at both male and female audiences (as are my personal beta testers).

You can choose between the answers in pink or blue to realize the scene as a woman or as a hermaphrodite.

**No ending can be missed because you have avoided the Futa/hermaphrodite style.**

### **The spell casting section :**

If you choose to focus on Cauchemar :

whatever you do you'll succeed to cast the spell. You will call him and he will give you a hint for the two other spell.

If you choose to focus on hiding your male attribute :

- 1 - φωτιά (fire)
- 2 - Αγάπη (love)

(Then automatically launched, according to the given contexts, and this without any cost in dark energy )

If you choose to focus on people mind :

- 1 - άνεμος (wind)
- 2 - χρήση (use)

If you choose to focus on people clothes :

- 1 - νερό (water)
- 2 - εξαθλίωση (depravity)

If you choose to focus on doing damage :

- 2 - χρήση (use)

In addition, the Janitor can express his dissatisfaction in his own way.
