

The JSK工房/JSK Studio Guide

This Google Doc got kind of big, so here's a table of contents that'll teleport you to a specific game if you're just here for the guide! Just click on the title and then the link will take you down the doc.

To add a new teleport spot/waypoint, first highlight the relevant text, then "Format" -> "Paragraph Styles" -> "Heading". Last, to make that spot appear in the ToC below. You have to click on the Table and then on the refresh/update button in the top left corner. Heading One is currently used for Chapter titles.

If you think that the ToC needs an update, feel free to ask one of the editors by commenting on this line.

Bugs/Help

I get a white screen after battle or just before an ending.

Make sure the sub folder is in the same directory as the main SWF file. For example, make a folder called Vampire Hunter N. In that folder, copy the file Vampire Hunter N.swf. Next to the file, copy the sub folder that came with the Vampire Hunter N.swf. You should no longer get the white screen bug. Not all JSK games are broken into multiple SWF files. The games that are: Vampire Hunter N, Defeated! - Demon King Girl, Hand-to-Hand Imouto - Face Off With Big Brother, Shion, Fuuma Girl Maisa, Shogun Princess Christianne, and Overthrow! The Demon Queen, How to Discipline a Shoplifting Girl, Karen - Daughter of Martial Arts Plutocrat, Restraint and Interrogation - Princess Irene, Reimi - The Queen Of Martial Arts, Miyui ~My Neighbor Swordswoman in School~, Magical Girl Buster.

How do I edit save states in the game?

Use the Adobe AIR program called Minerva to edit the .sol files. You can unlock all the endings this way. If the .sol file doesn't exist yet, play the game once to create it.

Make sure you can see hidden files

On Windows XP: C:\Documents and Settings\((Your Windows Login)\Application Data\Macromedia\Flesh Player\#SharedObjects\UG7D3554(This will be different per computer)\localhost

On Windows 7: C:\Users\((Your Windows Login)\AppData\Roaming\Macromedia\Flesh Player\#SharedObjects\UG7D3554(This will be different per computer)\localhost

The game is not saving the endings in the game/All my unlocked endings are gone.

Deleting your browsing history may remove all your endings in your games. Renaming or moving your SWF file will also reset the unlocked endings. The newest version of Chrome saves .sol files in a different location than the SWF is expecting. Try using Firefox or IE instead.

Title Screen

There does not seem to be an option to replay endings once you find them in the game. So to see an ending again, you have to play through the entire game. The endings are determined by the responses to the first six questions in the bedroom before she leaves. What you do during the foreplay and sex scenes has no impact on the endings. It only changes the dialogue. You can use the scroll wheel on your mouse to lick, but you can't bring her to orgasm with it. Also, you can only bring her to orgasm with your finger during the foreplay scenes.

First Ending, Domination:

First Sex Scene: Foreplay in the bathroom, Doggy style in the bathroom.

Second Sex Scene: Missionary on a bed with a dog collar

1. What is this about?
1. I don't get it.
1. Ah, "Little Sister Heaven"?!?
1. What's wrong with that?!
1. But I love you!
1. That's right!

Second Ending, Love:

First Sex Scene: Foreplay on the bed, Missionary on the bed.

Second Sex Scene: Doggy style in the kitchen with her wearing an apron.

1. What is this about?
1. I don't get it.
1. Ah, "Little Sister Heaven"?!
1. What's wrong with that?!
1. But I love you!
2. I love you because you're Miyuka.

Third Ending, Submission:

First Sex Scene: Foreplay in the bathroom, Missionary in the bathroom.

Second Sex Scene: Cowgirl position in bedroom

2.?
2. What are you talking about?
2. Could you be talking about "I Love Little Girls"?!
2. I'm sorry you have such a brother...
2. What should I do?
2. Please, don't.

Fourth Ending, Sacrifice:

First Sex Scene: Foreplay on the bed, Cowgirl position on the bed.

Second Sex Scene: Missionary on the bed

2.?
2. What are you talking about?
2. Could you be talking about "I Love Little Girls"?!
2. I'm sorry you have such a brother...
1. I'll try my best so that never happens.

There does not seem to be an option to replay endings once you find them in the game. So to see an ending again, you have to play through the entire game. The first couple of dialogues only have one choice. Walkthrough begins at first dialogue with two choices for a response.

Endings:

There are many different ways to get to the three different endings in Oreko. Below are three ways that I found. None of them use the doggy style position, but that doesn't mean that there is no way to get to the different endings using that position. Experiment!

Naked cowgirl (good ending)

1. Challenging people is pretty old fashioned...
 1. ...I think you need punishment.
 1. I want to ensure you stop challenging dojos.
 - Strip her naked
 - Use tongue to lick until orgasm (use the mouse scroll wheel)
 - Choose bottom button (Switch to Sex)
 1. You need to accept the stakes of our match.
 - Choose button (Put it in)
 - When you're done, select the button (Cum Inside!)
 1. I'm going to cum in your pussy.
 - Choose button (Stop) when finished

Collar (bad ending)

1. Challenging people is pretty old fashioned...

1. ...I think you need punishment.

1. I want to ensure you stop challenging dojos.

- Choose bottom button (Switch to Sex)

1. I've decided to skip the foreplay.

- Choose button (Put it in)
- When you're done, select the button (Cum Inside!)

1. I'm cumming inside.

- Choose button (Stop) when finished

Gym outfit ending (normal ending)

2. Don't. You'll get hurt.

2. ...You seem unfamiliar with consequences.

2. Is that a promise?

- Strip her naked
- Use tongue to lick until orgasm (use the mouse scroll wheel)
- Choose bottom button (Switch to Sex)

2. I rubbed you enough, didn't I?

- Choose button (Put it in)
- When you're done, select the button (Cum Inside!)

2. (Cum inside her in silence)

Notes about Menu Options

Look - (Raises Male Amorous Meter, Will bring up a Random Multiple Choice)

Talk - (Raises or Decreases Yukano's Amorous Meter, can only be done twice until you raise Male's Amorous Meter)

Options below Decreases Yukano's Amorous Meter – Even if meter is maxed.

Kiss

Fellatio

Sex

There are three meters to the right of the screen, each represent the following:

Left Meter = Imoutoto's Amorous Meter

This is affected by what you say to her, it could either raise up or go down. When you decide to touch her, if her amorous meter is too low, it will decrease by a small amount. The last three choices, regardless of how high her Amorous meter is, it will drop a huge amount and if you make the choice to perform one of those actions while it's low, will result in a game over.

Middle Meter = Orgasm Meter

The orgasm meter increases as you touch her body and she will cum after you fill it to the max (Like in JSK's other games, this can affect your ending outcome).

Right Meter = Male's Amorous Meter

This is affected by looking at her, touching her, talking to her, having her remove or lift up an article of clothing.

When Male's amorous meter changes to a different color, you will be able to talk to her again

Getting Imouto's Amorous Meter to the Max

- Look at body until random multiple choice shows up.
1. Because you're very important to me.
 - Talk to her.
 3. Yukano, I worry about you.
 2. it's because Mom and Dad are gone, so it's just you and me.
 3. Yukano, I worry about you.
 2. it's because Mom and Dad are gone, so it's just you and me.
 - Click breasts until male excitement meter changes color.
 - Talk to her.
 1. Yukano, are you popular with the boys?
 1. You...you weren't going out together, were you?
 1. Yukano, are you popular with the boys?
 1. You...you weren't going out together, were you?
 - Random Multiple choice.
 3. Maybe I'm jealous about that boy.
 - Talk to her.
 1. That isn't really the case.
- or-
2. I have my doubts about that.

- Raise Males Excitement Meter by clicking her body (don't click vagina yet) until the color changes.
- Talk to her.

2. Yukano, I'm happy to be with you.

1. I don't need anyone except you, Yukano.

- At this point her excitement meter will cease to drop by your caresses or having her remove her clothes but will still be influenced by what you say to her or by choosing to perform kissing, handjob, or sex.

Endings:

Ending 1. Slave/Gym Outfit Ending

- Get Imoutoto's amorous meter to the max.
- Have sex with her, but don't let her cum even once with foreplay.

Ending 2. Lewd/School Swimsuit Ending

- Bring her to orgasm 3 times during foreplay.
- Have sex with her.

Ending 3. Reverse Rape Ending

- Remove her skirt.
- Bring her to orgasm once.

2. Yukano, I want to know how you really feel.

- After she confesses, deny her feelings with the choice below.

Gameplay: Similar to his last game with the Demon Lady. You fight one opponent (in this case a vampire lady) in consecutive rounds. At the end of each round you get two options: rape and wait; the ending changes depending on this and your choices in the dialogue she starts and you start with the top option. Some attacks let you target certain section; her head, chest, or waist. She has 3 pieces of armor that absorb damage that eventually break; a sort of black dress that covers her chest and waist, a tight white top that covers her chest with a matching thong that protects her waist. Not sure how much damage breaks each; pm me on ulmf if you figure it out. Turns are determined on the right side of the screen, the first when one reaches the top one of you gets to move; yours is blue and hers is red. Your HP, MP, and status are in the top left, while her HP and "thoughts" are in the top right. By observing her closely, you can determine which attack she will use. If your concentration stat (3rd stat from the top) is 15 or higher, you can predict her moves. Win or lose, the game will reward you with more stat and skill points each time you play until a maximum number is reached.

Kama's (カーマ) moves:

Attack – She has standard swipe, does low damage

Crimson Pile – roundhouse, does low damage

She sometimes goes into a stance, her arms up to prepare a certain move:

Upper Kick – A quicker version of her roundhouse kick, goes up really fast, average to slightly below average, can be reversed into a standing side missionary

Blood Heel – A rising axe kick, damage depends on how fast her action meter increases (the arrow on the right)

Scarlet Needle – A diving kick, goes up rather slowly, does high damage, and be reversed into a standing missionary if her health is low enough

Mirage Dance – A series of repetitive attacks, goes up very slowly, massive damage. If vitality stat is low, this can damage more than 600 HP

Magic Restoration – Restores her MP

She has magic to, her back will be turned and she'll have a blue light in her hand, next turn she'll use magic, can be stopped with a knockdown move:

Silent Claw – Does damage, can either slow your action gauge, or stop you from using magic, both effects are temporary of course

Drain Claw – Slash attack that damages you and heals her.

Rape Moves:

- To perform rape moves, her health has to be below 500 and you can only perform them Three times per battle. You will see a red box indicating you can perform a rape move.
- All attacks with a "Knock Down Effect" will allow you to perform a rape move.

Endings:

Opening dialogue determines difficulty I believe. Don't skip it however, as this may affect your chances of getting an ending (what you pick doesn't matter, just don't hit skip).

Domination ending:

You should get ending with missionary style scene, her with dull eyes.

It's okay to shred her clothes. Using rape moves together with this dialogue will eventually give this ending too.

- Her HP < 2000
- She asks the first time:

3. There's a hefty bounty for your head, you know.

- You talk the first time (Use talk button):

1. What are the Aristocrats?

3. You...control us? We'll see about that after I make you my pet.

- Her HP < 1000
- She asks the second time:

1. I want to claim the bounty for your head.

- You talk the second time:

1. You are immortal. Yet, you aren't that strong.

1. With your strength there's really nothing you can do to win.

- Defeat her and wait
- When she asks:

3. I haven't finished playing with you yet.

- Defeat her and rape (no choice to wait)
- When she talks:

1. Your struggles will just bring you more suffering.

- Defeat her both rounds with rape. You can catch moves instead when HP is low enough to see different positions.

Lewd ending:

You flee from the castle. She goes after you to take you back to the castle. She becomes a nymph and constantly has sex you 10 times a day. What you say doesn't really matter. If you rape her in the end of LOVE ENDING route you get this ending.

- Her HP < 2000
- You talk:

1. What are the Aristocrats?

3. You...control us? We'll see about that after I make you my pet.

- Her HP 1000 < 2000
- She talks:

3. There's a hefty bounty for your head, you know.

- Her HP < 1000
- She talks:

3. I want to have a taste of the Aristocrat woman.

- You talk: (1,2 or 3,3)

1. You are immortal. Yet, you aren't that strong.

2. Your fit body does look delicious, though.

-or-

3. I'm going to pierce you with a stake.

3. I love forcing strong women into submission.

- **IMPORTANT:** Defeat her and wait
- When she talks:

1. I want to leave the fun for later.

- You talk:

3. I think I should've used the chance.

3. Oh well, I'll just wait for another opening then.

- After you beat her again there will be no choice, just rape
- Go for her clothes now
- If she asks:

2. I'll be lucky to enjoy your body once more.

-or-

3. I'm going to make you my sex slave.

- If you talk:

2. You know. I've decided to make you my woman after this.

- Defeat her both rounds with rape. You can catch moves instead when HP is low enough to see different positions.

Submission ending:

You become her servant. She eventually rewards you and still ends up falling in love with you

First conversation after HP<2000(if she asked you first, skip this conversation)

2. It seems to be true that the Aristocrats have beautiful bodies.

3. Your beauty is of no use if there's no one to see it.

- **IMPORTANT:** She asks when HP 1500 < 2000

2. I came for the immortality your kin is blessed with.

- Second conversation after HP 1000 < 1500 (she must **START** it)

2. Yes, I do.

- Defeat her and wait

Lovers ending:

No rape ending. She takes your blood and you take her innocence.

- First conversation after HP < 2000, you ask:
1. What are the Aristocrats?
 1. Do you really drink blood?
 - She asks when HP 1000 < 2000
 1. I want to know about the Aristocrats.
 - You ask HP when < 1000
 2. Do you live alone in this place?
 1. Don't you feel lonely?
 - She asks when HP. < 1000
 3. I wanted to find out if your kind is as evil as they say.
 - **IMPORTANT:** Defeat her and wait.
 - Attack once or twice. (HP < 1000)
 - Wait until she asks:
 2. You don't seem evil to me.
 - You ask:
 1. Why do you live in such a remote place?
 1. Still, why don't you move closer to humans?
 - After that, just defeat her two more times without raping (don't catch her moves).

Counters:

Catch her attacks and counter with sex.

The two attacks you can counter on are Upper Kick and Scarlet Needle. Her life must be below 500 HP. When she performs either of the two attacks a button labeled Rape appears. Click the button before it disappears to counter the attack.

Pin down:

Sex scene during battle.

The two sex scenes in battle are the missionary and the doggy style positions. You can access the missionary position by defeating her at the end of the round and choosing rape. This can also be done by bringing her life below 500 HP and hitting her with a knock down attack (Rekkyuken or Ingazuki) that puts her on her back.

You can access the doggy style position by bringing her life below 500 HP and hitting her with the knockdown attack Toryumai that puts her on her stomach.

Unlocking other sex scenes:

Counter 1:

Rape scene that stems from her doing a high kick and you catching her on one foot.

While you are fighting her, drain her hit points down to a very low point, then go into defensive fighting. Move your cursor away from any of her attack points, click and hold (your hands move forward into a defensive position). Keep holding it and move it so it is around her face (you will see the boxes that pop up when she makes specific attacks). When she does a High Kick with her right foot on you, the box will appear (Exploit Opening), release your defense and quickly click on the box. That will trigger the sex scene.

Counter 2:

Standing behind her, holding her in the air by her legs and dropping her on your dick rape.

Same as Counter 1 except for one thing, wait for her to do the flying kick called Dragon Fang. The box will appear (Get Behind). You catch her and that triggers the scene with you holding her by her upper legs with her back to you and sex begins.

Takedown 1:

Forced missionary during the actual fights. Unlock by choosing option 1 (Teach With Body) after defeating her.

Takedowns 2:

Rear entry (would call it doggy, but she is lying on the floor). This is spawned by you knocking her on her face and hitting the button that appears (double click crotch shot with her hit points low will start the sequence).

To do this, you need 2 things. You need her hit points to be very low and you need the bar below your stats (goes up each time she attacks you... starts yellow and eventually turns red) to be in the red position. When you have both of those, get your attack bar (left side of the screen) to its max then, when you have the chance, double click her crotch. That will knock her on the floor, face down. The red box (Exploit Opening) will appear and you have little time, so be ready to move from crotch to face area so you can click the box. If you get the timing right, you get her lying on the floor face down for basically rear entry sex (would call it doggy but she is lying on floor, tilting her back with her elbows on the floor).

Takedowns 3:

Grope her on the floor scene. Unlock by choosing option 2 (Light Punishment) after defeating her.

There are three meters to the left of the screen, each represent the following:

Top Meter = Mood

Shion Kamishiro's mood will change depending on the choices you make when speaking to her and the actions you try to perform on her. If her mood starts to change to a red color, it means you're about to obtain a game over. To avoid this, you are required to speak with her and choose the correct dialogue that could lighten her mood.

Left Meter = Arousal

The arousal meter increases as you touch her body and she will cum after you fill it to the max (Like in JSK's other games, this can affect your ending outcome).

Right Meter = Submissiveness

The submissiveness meter will increase as you talk to her, look at her, and touch her. You are required to fill this meter in order to unlock more dialogue and make her less resistant to your advances.

These SWF files also work with the Japanese language version of the game.

Story Summary: One man seeks revenge against the kingdom that overran his homeland. Between here and victory, that kingdom's fierce shogun princess Christianne stands in his way. This is their ultimate showdown.

Completed Title Screen

The first one is normal mode. That is the only mode available when you play the game for the first time. You can unlock two additional modes by unlocking endings of the game. Skills Battle Menu

Tiger Strike – Using high speed to attack the enemy. Power Low. Cost half the action bar.

Thunder Fang – A powerful attack that uses all might. Power Small ~ Medium. Costs 3/4 of action bar.

Healing – A special breathing technique which allows you to heal yourself. Recovers small ~ large amount of health. Costs 1/2 of the action bar.

Dragon – Fierce God Dragon Slaying Attack. A random consecutive attacks. Power High ~ Maximum. Costs full action bar.

- The action bar referenced is the yellow bar below the player's health gauge.
- The break skill can stop her from casting magic.

Gameplay: You can perform actions once you have sufficient bar. You defend when she does huge attacks. Your attack damage is based on bar size. Your special gauge goes up with hits on her and you, and also defended hits. Hit her head for maximum damage; hit her armor to destroy it. When she's preparing to do a real super move, she takes double damage to the head. Your best bet is to dump all your initial stat points into damage and then wallop her in the face when she tries to do a special. You get points based on how many times you defeat her, a lump based on clearing 3 rounds, how many times you cum inside of her, and how much damage you do to her in the round you lose.

There's the ATB bar on the right, however you don't have to wait for it to be full before you can do an action and you can click with the mouse button to act whenever you want. This however affects your attack (a full bar does more damage than half), and defending doesn't work unless you have a bar 3/4 full. When you are hurt or attack, your special action bar (yellow bar below health) increases.

About the action bar: half full lets you put up guard until next action and activate moves (if you have enough of special bar). Full bar do more damage on basic attacks and useless for everything else, defense is more important here. As soon as your action bar is past half, put up guard(except against her basic attack or spells), this way you guard against damage and accumulate some of the action bar for the next attack. It's crucial in the third round, where you don't have much leisure for wasting action bar. Watch

her bar too, some of her slower skills give you time to attack her a couple of times before putting up guard. When she's in different stance, she takes more damage (especially to the head).

Protip: When you get hit with the status effect that slows you or reduces your stats, immediately keep repeatedly attacking her anywhere. You will do no damage, but after a few attacks, the status will go away. No more waiting for the status effect to wear off. You can get rid of it in a few seconds, without her even attacking you.

You may want to spend some time grinding for stats and skills before trying to get the endings in this game. The princess becomes increasingly harder to defeat during each round. On the third round you can be killed fairly quickly if all four of your stats are not sufficiently high. Win or lose, the game will reward you with more money each time you play to spend on stats and skills until a maximum number is reached. Unlike previous games, skill purchases are permanent between game plays. The purchase of more stat points is permanent but you can redistribute them between the four stats each time you play.

Game Story: “You bastard human, you have no idea. This battle is just beginning...” The final showdown of good versus evil, hero versus demon. An epic clash of powers both clamoring for one goal...

Face the Demon Queen Yumyth one on one, as the hentai unfolds based on the result of battle.

The first one is normal mode (ノーマルモード). That is the only mode available when you play the game for the first time. You can unlock two additional modes by unlocking endings of the game. Extra mode 1 (エクストラモード 1) is available after the Binding ending is unlocked. You see different rape dialog and Yumisu only does basic attacks. Extra mode 2 (エクストラモード 2) is available after the Slavery ending is unlocked. Her power increases after each round and she uses all her available attacks. The only way to get out of both modes is to lose to her in the end.

Also, you get access to the blowjob and tit fuck options when you play in extra mode 1 or 2. These options cannot be accessed from the replay menu.

Demon King Ending: 魔王エンド

Important: If you take too much damage combined in the three rounds, this will prevent the Demon King ending from unlocking even if all the correct responses and actions are taken. It seems if you lose twice your life bar combined (or more) in the three rounds this will prevent the ending from taking effect. Healing does not reduce the total. If you're constantly healing to bring your life bar back up, you could exceed twice your life bar in damage in only one round.

- Yumisu must have low health bar (1/5 life bar left)

Blowjob Scene:

- You cannot play this from the menu. You must play Extra Mode 1 or 2 each time to see it.
- Start a game with Extra Mode 1 or Extra Mode 2. When you defeat and rape her, there will be a third green button at the bottom of the first column. It is called service. The five positions are hand job, licking, sucking, tit fuck, and super-squeeze-tits.

*Note: I don't have the time to edit down all the info I've saved from ULMF, so I figured I could at least put down the info as is so people don't need to look for it. Some of it will probably be redundant or may need to be verified, if I have the time I'll come back and take a look myself, but for the time being, at least, there'll be something to work with. Update: Only two games till need editing down (Miyui and MGB). Keep up the good work everyone!

**Note: Editing currently in progress.

Explanation

Top row first, from right to left:

攻撃力 : Affects damage of regular attacks and special moves

精神力: Affects how quickly the SP gauge charges

絶技連弾: Skill 1, projectile attack dealing high damage to clothing. More points = higher damage. No discount on SP gauge consumption with more points invested.

神技摩蜚: Skill 3, anti-air spiral thrust. Counters air attacks. Invest more points and more of her jump moves can be targeted provided there's enough SP gauge to activate the skill.

裏技覚神: One time investment allows players to read what's coming their way. As already mentioned, if you can't read it and there's no script kiddie translation available, there's no point in getting this.

Bottom row, from right to left:

防御力: More points = less damage sustained.

瞬発力: More points = action gauge charges faster. Unlike older games, she'll still move first even at max level for the very low-damage basic attacks.

極技無間: Skill 2, 2nd strongest special move. Essentially a roundhouse kick. Does more damage and affects more areas with more points invested.

滅技比天: Skill 4, the strongest special move. Only usable at maxed SP gauge. Does pitiful damage until properly invested into. Three of these and the roundhouse should drop Karen on the third round when both are maxed out.

性交スキル: Unlocks more positions during rape and sexual service segments with more points. Also, the counter moves against a specific set of Karen's skills are unlocked as more points are invested. These only activate if her health goes below a certain threshold and the move can be activated regardless of SP gauge level.

Game Story: Karen Ryuzei is a daughter of a martial arts plutocrat, who often whims to challenge martial arts schools. Let's teach her a lesson! A Battle & Creampie Ero Flash.

Endings

Default Ending (Rape)

Beat her 3 rounds while raping her

Lewd Ending

Don't skip the Intro Dialogue -> 3rd option in the Intro scene.

1st option after first KO, 2nd option after second KO.

Have her orgasm at least 4 times. That means you need to make her orgasm at least once during a fight by using a combo-move (either licking her pussy or forcing her to orgasm with your boot) **and** let her orgasm during all sex scenes.

Love Ending

Don't skip the Intro Dialogue -> 1st Option in the Intro scene

Defeat her -> Spare her

Talk -> 1st Option

Defeat her

Ultra Ending

Enter Fighting Mode number 3 (K2). This can be only activated if all 3 endings are already completed.

Beat her 5 rounds. Careful her defenses are at her best and she hits hard in round 4-5. End the round early by having sex if you can.

How to Setup a combo:

1. Unlock ALL the skills below the stat boosts.
2. get her below ~half HP
3. Stock up on a bunch of Action points.
4. Normal attack the lowest of the three attack points.
5. Instantly reopen the action menu, If you done it right, she will still have some of the small gauge bar (the thing below the hp bar)
6. Select the left menu for a special attack. All four special attacks open for different follow ups. Combos below.
7. After the special attack gets through, instantly open the menu again. (That is why you need to pile a bunch of action points before starting all this)

Combos and their results:

The Number reflects the "number" of the button, if you count them left to right, top to bottom. So for the Special attack menu (the left Button in the main action menu, which you want to use for Step 4), the numbers for the buttons would be:

(1) (2)

(3) (4)

The first Number is the Button for the special attack that you use in 4.).

The Button of the second Number will either directly transition into an H-scene (purple button), or require you to instantly click to open the menu a third time, to choose the 3rd Number.

Combos:

1-1-1: Pussy Licking (Doesn't end the round) (Bottom left Option)

1-2: BJ forcing her head (Doesn't end the round)

2-1-1: Fuck her while carrying her from behind.

2-2: Strip Top (Does not end the round)

2-3: Fuck her from behind, both standing, restraining her arms.

3-1-1 (You will enter a different "combat mode" after the first "1") Punch her. Does normal damage, KOing her normally if you drop her to 0. Nothing special.

3-1-2 Titfuck. Only works if you stripped top. (Doesn't end the round)

3-1-3 Forced BJ with her pinned on her back. (Doesn't end the round)

3-2 Force her to orgasm with your boot. (Doesn't end the round) (Bottom right)

3-3 Fuck her while she is pinned down on her back.

4-1 DoggyStyle. Delicate

4-2 Strip bottom (Doesn't end the round)

Other H Scenes:

Counter Attack (the lower, purple button in the main action menu): Get her very low, then wait for her to use the Roundhouse Kick. Open the action menu right when her attack starts. If you did it right, the normal attack button wont work. Select the bottom Button. Will end the round fucking her while holding her leg.

Cowgirl: Wait until she uses "Tackle & Mount". While she sits on top of you and punches you, collect a few action points. Get her HP low. Punch her once, then instantly reopen the menu. If you did it right, she will still have some "gauge" in the small bar below her HP bar. Select the purple button. That will end the round fucking her cowgirl style.

The Stats Screen interface features a dark background with a hexagonal pattern. At the top, three main sections are highlighted: **Stats**, **Start**, and **Skill Points 3455**. Below these are four stat cards: **Attack** (Increases damage dealt, level 15, 160 skill points), **Defense** (Reduces damage received, level 15, 160 skill points), **Agility** (Speeds up action gauge fill, level 15, 160 skill points), and **Focus** (Increases focus gain, level 15, 160 skill points). The **Skills** section contains nine skill cards: **Blade** (Let your blade fly, Effect: Rip clothes, level 1, 200 skill points), **Lewd** (Reduces action point costs for sex, level 3, 200 skill points), **Mind** (Detect the opponent's next attack, level 1, 2000 skill points), **Talon** (Continuously attack with your blade, Effect: Faint, level 1, 600 skill points), **Quake** (Tremble the ground around you, Effect: Tumble, level 1, 200 skill points), **Whip** (Bind the target with demonic chains, Effect: Restraint, level 1, 200 skill points), **Lash** (Attack a restrained target repeatedly, Powerful, level 1, 600 skill points), **Grab** (Block attack and counter with sex, Requirement: Opponent's HP < 25%, level 1, 200 skill points), and **Blast** (Attack a target that fell down, Powerful, level 1, 600 skill points).

The Battle Menu interface shows a character in a school uniform standing in a cityscape. The **Focus** section includes **High Hit**, **Middle Hit**, **Low Hit**, and **Razor Slash**. The character is positioned in the center, and the background shows buildings and trees.

Raw Info Dump*:

Her "Opening Bar" is the little thing under her HP bar that fills up after you hit her, or she attacked. It empties slower the lower her HP is. If you use a special attack while she has some Opening bar, the special attacks have special effects.

Your Focus Bar: Under your HP bar, there is a smaller bar which fills when you hit, get hit, or block attacks. It is your Focus bar, and you need it to perform special attacks.

The main Battle menu:

Top left: Opens the special Attack menu, remember you need special bar and her to have Gauge Bar, to have those attacks do special effects.

Middle left: Block. Consumes two action points, reduces incoming damage and fills your special bar.

Bottom left: Counter Fuck. Have her below 1/4 HP and use it to counter her kick attack to unlock an H scene.

Top-Right: Upper attack, deals most damage, doesn't fill much of her gauge bar.

Middle-Right: Middle attack, deals medium damage and gauge.

Bottom-Right: Low attack. Deals the least damage, but fills the most gauge bar.

The Special Menu:

(all these effects only occur if you have focus and she has opening bar!)

Top left: If she has an opening, these attacks will strip her.

Top right: If she has an opening, this attack will knock her down on all fours. You can then Doggy style fuck her to end the round.

Bottom left: If she has an opening, this will chain her up. You can then fuck her from behind or have her forced cowgirl style to end the round.

Bottom right: This will knock her out. You now have 3 H options: Top-left will force a BJ. This one does not end the round. Bottom left will fuck her missionary style while she is fainted. Bottom right is Doggy style.

Game Modes:

Extra Mode 1 is unlocked by beating and not raping her in the normal mode. The dialogue choices in normal mode don't matter. If you rape her in the Extra Mode 1 (or she you), this mode will change to Extra Mode 2, so no more good endings.

Extra Mode 2 is unlocked by beating and raping her in the normal mode.

Extra Mode 3 is unlocked with the Bond ending. It is basically just an endless mode against the possessed girl.

Extra Mode 4 is unlocked with the Love ending. It is an endless mode against the normal girl.

Endings:

Love-Ending: Start Extra Mode 1. Beat her 3 times. No sex at all, her H couters are fine except cowgirl. For dialogue choices select the first one after the first KO, and the second one after the 2nd KO. DON'T SKIP intro dialogue. Bedroom.

Lewd-Ending: Start Extra Mode 1 or 2. You beat her three times, but make sure she cums at least three times. Which means you can just beat her down, fuck her at the end of each round and let her cum each time. Bedroom + Blushing. Don't skip intro dialogue. Dialogue matters here as well, choice 1 after first KO and then 1 again after 2nd KO.

Bond-Ending: Start Extra Mode 1. Beat her two times. Select the first dialogue choice after the first KO, and the second one after the second. Then lose the third round. No H moves from either you or her are allowed to happen. Demon eyes + Bedroom.

Rape-Ending: Start Extra Mode 2. You just beat her three times while fucking her. I don't think dialogue matters. Locked in shed.

Now a list of all "in-game" H scenes

- 1.) Normal Fuck: Just chose the option on the right after winning a round.
- 2.) Counter Fuck: Get her below 1/4 HP, then wait for her to do the Side Kick attack. Use the bottom left option just as her attack starts. You don't need to damage her clothes first.
- 3.) Doggy style: Knock her down using the top-right special attack, then use the only H move.
- 4.) Chained Cowgirl: Use the bottom-left special attack, then use the right H move.
- 5.) Chained From Behind: Use the bottom-left special attack, then use the left H move.
- 6.) Forced Blow Job: Use the bottom right special attack. Then select the upper left H move.
- 7.) Fainted Missionary: Use the bottom right special attack. Then select the lower left H move.
- 8.) Fainted Doggy style: Use the bottom right special attack. Then select the lower right H move.

The following moves occur when you fight against her demon form and get hit by her tackles. Images are screen captures of the Japanese text that appears if you have the "Mind" skill (Prediction): (alternatively in Extra Mode 4)

- 9.) Face Sitting.

- 10) Blowjob, Handjobs and titfucks.

- Rape her three times.

3. Slave End:

- Rape her three times in 2:2 **making her cum.** (red text during cum must appear)
- Use 4 aphrodisiac shots on her then make her land.
- Defeat Her before she rapes you
- Pick 2 on the first dialog, then 1 on the second dialog.

4. Submission End:

- Defeat her twice in 2:1.
- Lose to her the third round.
- Make sure you've initiated 2 aphrodisiac scenes from her, but not cowgirl. Cowgirl pushes you to route 2:2 since she is no longer a virgin.

5. Lovers End:

- Defeat her three times in 2:1, no rape.
- Pick 2 and then 1 during the first dialog, 1 and then 1 for the second dialog.

Alternate submission end:

- start 2:1 mode (not 2:2 !!!)
- Win with no rape, pick dialogue options 1 then 2
- Win with no rape, pick dialogue options 1 then 1
- During the third fight activate two separate aphrodisiac scenes, then lose.

Rape pregnant ending should be easy to get. Just play stage 2-2, defeat Mai three times and do H-stuff after each knockdown.

The first ending (mind-break) is obtained by doing stage 2-2 and finishing it without doing any H-stuff. Choices don't matter.

The fourth ending (love) is obtained by doing stage 2-1 and picking choices (2,1) for the first scene and choices (1, 1) for the second. No H-Stuff

And then I went for ending three as listed below and got it with 1,1 1,1 dialogue. Forgot to lose round three.

Ending 2:

- Pick story 2-2
- Make her cum at least three times
- Pick option 2 after the first round and option 1 after the second round
- Hit her with 4 aphrodisiac shots

Ending 4:

Sub ending

- Pick story 2-1
- Win the first 2 rounds but lose the last round
- She has to do Masturbation/Footjob, Blowjob, or Facesitting/69 at least twice

love ending 4

How do you get her to the aphrodisiac sex scene? I haven't been able to make that one appear.

Ah, got it. Hit her with four aphrodisiacs (4 types: mast/foot, blow, cun/69, rap)

Nah, it's actually super easy. If you're going for a lewd ending, you can just knock her out of the sky after using the bottom left skill and immediately end the round. It helps to know what each skill does. Even if you're going for a "virtuous" ending, it's pretty easy, since once you've knocked her out of the sky you can just spam the special bar consuming melee attack and nuke her down.

Edit: Since no one seems to have done so thus far, I guess I'll explain the game systems

Your four main stats are melee attack, gun attack, defense, and speed. Melee only is relevant when she's on the ground, while gun attack is only relevant when she's in the air. While upgrading gun attack might seem to do very little damage wise, it greatly increases the rate at which you deplete her magic bar, which forces her to the ground.

It seems that instead of upgrading your skill damage, you instead use your upgrades to get ammo for them. The first one removes clothing, but only when it's the shot that depletes her magic bar. The second one greatly decreases her magic bar but does low damage. The third one is a tranquilizer, which forces her to sleep after she depletes her magic bar. You don't need this to be the finishing shot, but it might go away if her magic bar fully refills. The fourth one is an aphrodisiac, which will cause her first move after landing to be her trying to fuck you. Hitting her with multiple shots changes the scene you see. Like the tranquilizer, this does not need to be the final hit, but I think it goes away if her magic bar refills.

A couple of tips, if you'd like to do stuff yourself instead of using the full save.

If you're tired of grinding points, Cheat Engine always works.

A pretty much foolproof strategy is to start each round by stocking up max actions, if you see a long cast bar and her using magic, it's usually best to block it. At max, knock down the pink bar with the normal attack. When it has one hit left, use the bottom left special move. When she hits the ground, she'll be knocked out. Kick her (top right button) a few times until she almost wakes up. Tie her up with the top left. Let the action points stock up (cause using them here doesn't do much) and then as soon as she breaks free, wail on her. That should knock her out if your stats are maxed.

Of course, if you're going with any ending that involves H, you can just take advantage while she's asleep or tied up and end the round.

The type of scene which you will get depends on the number of aphrodisiac shots you've fired into her (giggity) before forcing her to the ground. 1 shot = masturbation, 2 shots=blowjob, 3=face sitting/69 position, 4=cowgirl

As for general tips: try to block non-special attacks right when she's executing them, that way you'd only burn 1 bar instead of 2 for normal defense. (you can tell it's a non-special attack since she won't be charging up and her bar is generally faster). You gather a lot more special bar that way. I actually find it better to just tank the first few non-special attacks and just let your bar fill up to 3-4 before you start wailing into her. I personally like to start blocking a few attacks after gathering 3 bars to charge up the special bar to at LEAST half way bar before going all out. You'd want to spend two bars (bottom left option) to block specials though, since they generally have more nasty side effects, or more damage.

It's all about the use of proper skills, you pretty much can down her 3 times without her even getting a chance to cast one spell big ass spell,

1 hypno shot, 1-2 blitz and then regular shot while she is casting and she falls on the ground, sleeping, ready to be sleep raped or captured

Or if you want her to molest you, replace hypno shot with one or more lust shots as their effect stacks. The more you shoot her with lust shots, the higher the degree of molestation she performs on you.

Not sure if this helps you folks, but I notice that she uses power attacks when her staff is 'pulsing'

Also, if you time the defense/block just right [example, when she does a kick when fighting on-foot, or uses quick shot in the sky] you can get additional 'spirit/skill' gauge fills [your 'yellow bar'] you can trigger a block/defense when she begins to do said attacks... only power attacks are the ones that you can't block once she triggers them.

Her power attacks costs 2 points to block... but as Ranos said, using block on her normal attacks [the ones that you can block even when she executes them] will only eat up 1 point.

To sum it up: 'pulsing staff' = Power Attack, unblockable during execution, uses 2 points. Any other attack will be blockable during execution, uses 1 point AND fills up 'spirit/skill' gauge faster.

She has dual personality, her failsafe AI personality 'Mai Alpha' kicks in whenever Mai is unable to carry out her mission, which explains her iris color change after starting 'Story 2-1 or 2-2', and her considerable boost in strength.

After you click the top left option for special bullets, the top left attack damages clothes (can choose either top or bottom), top right is just damage to her mp to take her out of flight mode, bottom left is a magical roofie bullet, and bottom right is some kind of aphrodisiac that makes her try to rape you instead if you hit her with it and then take her out of flight. There are also the traditional counter moves in pink that we've seen in other JSK games, otherwise if you get her to hand-to-hand combat and haven't used one of the two bottom status bullets, you can still punch all her health away and do it the old-fashioned way.

You can find more info on how these attacks work if you just go back one page in this thread.

Finally got how this game works.

Okay, for anyone confused on the new JSK game, no worries, I got you fam.

With huge help from Decagem, and many others, we've wiped up a small breakdown/guide to get you started.

First off, read the quote below to get the overall idea of the game. After that, we are ready to get started.

In the beginning the main character explains that the girl, Kusuda Maki, is his niece who left her parents' home and is now lodging in his house.

I couldn't understand why in the OP (apparently some disagreement) but, throughout the game, it seems to be due to the school she's attending being far from her parents' home.

So First off, you will start the game in the default mode. We are going to call this "STORY MODE 1", which is also the mode where you will unlock every other story mode. And those will unlock the different endings.

The Talk Button (2nd. from right menu) allows you to pick among 3 independent topics:

1. About the girl (Kusuda Maki) temp job (arubaito)
2. About Maki school life
3. About her parents

Choosing any of those will only move that topic ahead, eventually triggering the girl to talk back. Depending on your answers you'll affect Maki's fondness gauge (arrow on the left, blue = good, red = bad). Some dialogue choices will trigger grey dialogue boxes to appear underneath the 3 talk choices. This is where you will pick up either Hearts♥ or Diamonds💎. Hearts♥/Diamonds💎 will appear in between the vertical bars on the left. And you need either 3 Hearts♥ OR 3 Diamonds💎 do unlock a certain ending.

Once you collected all 3 Hearts♥/Diamonds💎 you want to press the button on the very bottom (with red text) and watch the end.

Tip:

Looking (1st. button on the right menu) at the girl's face tingly boosts the fondness gauge (can't understand the logic in that though).

If you want 3 Hearts♥, take your time maxing Maki's fondness towards you.

Below will be 3 guides to unlock STORY MODE 2, STORY MODE 3 and EXTRA MODE from playing STORY MODE 1.

Unlocking STORY MODE 2 :

To unlock this mode you'll need 3 Diamonds .

Unlocking EXTRA MODE:

Is Story Mode 1 but with Maki's obedience?

1. In STORY MODE 1 raise attention bar as high as possible;
 2. Rape her. Don't know how many times are needed, just be creative.
 3. Advance through the 3 topics, talk back and sub-topics until you enable the bottommost (with red text) one then click there.
- 3b- Make sure you have her 'sit' back down in her initial position after the H-scenes otherwise you'll just be endlessly clicking through dialogue options wondering where the red text options went. That should also unlock the 1st. (Domination?) end.

The Lewd End:

Start STORY MODE 2;

Rape the girl 3 or more times making her cum

(bright red face along with "chupa-chupa" sounds while doing her).

[Editor's Note: Some guides need a little fine tuning - KRU]

I Know that is a lot to take in, but I believe it's a good chunk of info to help anybody out with the game. I'll probably make an update post when I figure out the rest of the game and endings but I believe this is enough information to figure out the endings for yourself with a little messing around. If you need more help there are already posts above with guides for some endings already

Gameplay:

The right side indicates your Action Meter and your [Action Bars](#).

Once the Action Meter is full you'll gain one [Action Bar](#).

These Bars will be consumed for each action you take (top number).

Your [Special Gauge](#) fills up by blocking her attacks, getting hit and hitting her.

This [Special Gauge](#) will be used on top of [Action Bars](#) when using special attacks (second number from top in %).

Left click while she attacks to Counter Attack.

Choose "Block" and she'll deal 1/4th of the damage.

Choose "Punch Her" while Counter Attacking and you will consume 2 [Action Bars](#), deal damage dependent on how strong her attack would have been (stronger attack = more damage) AND fill up her [Damage Gauge](#) completely.

Choose "Grab Her" whenever you can for free [Action Bars](#).

You can also stunlock her, if you get her [Damage Gauge](#) to max but don't follow up with anything, her current Action Gauge will go to zero and she'll be "dazed".

This effect wears off once her Action Gauge goes up again, but you effectively waste ~2 of her turns doing this.

Note:

- Ultimate Combo costs 80% [Special Gauge](#), not 40%.

Lewding:

In order to get her lewd you have to grab her, or knock her down and play with her.

Every time you play with her the **Lewd Meter** fills up near her action bar, once filled up it turns into a Heart ♥.

She will ALWAYS do a grapple attack on you after this, you can either block it or let her hit you with it for H.

♥ = Footjob/Handjob

♥♥ = Blowjob

♥♥♥ = Facesitting

♥♥♥♥ = Cowgirl

If you block her at 4 hearts, she immediately loses all hearts and goes back to having none.

Get her **Damage Gauge** ≥ 1 and then use a Slash Attack, which will destroy a piece of her clothing, or use a Special Attack to knock her down.

Damage Gauge Full:

- + Slash Attack = Rip Clothes
- + Double Kick = Knockdown
- + Ultimate Combo = Knockout/Sleep

The only way to use the Counter Attacks top left "Knockdown" button is when she uses her jump attack on you.

Combo Counter Attack "Punch Her" with 2 immediate "Slash" Attacks to completely undress her Top/Bottom.

Note:

- Can't "Grab Her" or "Knockdown" unless she's taken some damage.
- Has keyboard shortcuts (rows: 1, Q, A, Z)

3 Heart Counter rape may freeze your game, can unfreeze by right click and play.

You can also avoid it by having her cum from the second option instead of the bottom 2 options in that specific scene.

I didn't know there were all these untranslated JSK games out there, hope someone makes an effort to TL these too!

I assume this is a Shion rough draft

seems like I was eventually able to get somewhere without using the seekbar

worked up her obedience so that I didn't force any choices

used dialogue that always got the "surprised" reaction (as opposed to "thoughtful" and "dismissive?")

came in her 3x (I know JSK likes having his sets of 3)

in the "afterwards" event, she's not there, but when it returns to the title screen, there are 4 post-game options

there could be other ways but this method worked for me

In order to get her to confess, you have to raise her obedience until it won't go any higher, then max her arousal through groping, then talk to her again with the first option, then kiss her.
