

# Landlord & the Tenants

Version 0.2

Walk-through

**Synopsis:** You're looking after your uncle's house when he's on his journey to travel around the world. You let some girls stay at the house to earn some money. As the story progresses, you'll make them fall in love with you or train them into sluts. The game will split into 3 routes depends on your choices:

- **Gentleman:** You're a true gentleman who'll make all of them (or some of them) fall in love with you.
- **Pervert:** You behave as a gentleman but at the same time, you spy on them and do pervert things but they don't know about that.
- **Jerk:** You're a total jerk who'll make all of them (or some of them) turn into sluts.

**Why should you support *Landlord & the Tenants*:**

- ❖ You will be able to download the genuine game before the public without worrying about viruses.
- ❖ You will be able to decide new characters or new games in the future.
- ❖ I will have some cash to pay bills & to replace broken devices to keep developing the game.
- ❖ I will be able to save money to upgrade the PC for better and faster development.
- ❖ I will be able to use more time and even abandon my job to focus on developing games only.

Sometimes, you'll have to be in the **Gentleman** route first before you can switch to the **Pervert** route or the **Jerk** route.
