

Lewd Island Season 1 official Walkthrough

In this walkthrough, only the parts that are important for the future parts of the game are mentioned. If there's an option that's not mentioned here, that means it only makes difference in what images are displayed to the player or they don't affect any changes.

Day 1:

Put her shirt back on:

-It doesn't matter, choose whatever you want.

Save her:

1. Check Breathing
2. Mouth to Mouth
3. Massage Heart
4. Mouth to Mouth
5. Massage Heart

It's not in my pocket. Must've fallen out somewhere:

-It doesn't matter, choose whatever you want

Help her search the hut:

-Order is not important, but all of them need to be activated

I need to be back by Friday:

-It doesn't matter, choose whatever you want.

How the fuck didn't they find us already:

-It doesn't matter, choose whatever you want.

DAY 2:

I'm sure they're still out there looking for us:

-It doesn't matter, choose whatever you want.

They're not looking for us, are they:

-It doesn't matter, choose whatever you want.

I managed to find these, but it still needs to be bigger:

-It doesn't matter, choose whatever you want.

The male character calling her for a meal:

-It doesn't matter, choose whatever you want.

This doesn't look tasty at all:

-It doesn't matter, choose whatever you want.

A fork:

-It doesn't matter, choose whatever you want.

It looks good, [relationship status]:

-It doesn't matter, choose whatever you want.

I don't know what that was. I just felt pain in my stomach, all of a sudden:

-It doesn't matter, choose whatever you want.

No one will be looking for us then:

-It doesn't matter, choose whatever you want.

Starting fire:

What should you do first:

-It won't let you start the fire until day 5, the fastest way to get this over with is to "try to light it up" twice.

I don't get it...:

-It doesn't matter, choose whatever you want.

Hmm, let's take a look:

-Order is not important, but all of them need to be activated.

Soo... What are we gonna do with this blanket:

-It changes the dialogue and some renders in day 2 and at the end of day 3,
but the end result is the same.

DAY 3:

Would you just... Mind turning around:

-It doesn't matter, choose whatever you want.

Take a peek:

-Just a bit.

I almost drowned because of you:

-It doesn't matter, choose whatever you want.

Try guessing the code:

The code is 000, if you don't guess it, the male character will open it by force, but it doesn't matter. When sanity was active, female would get extra points

Where are they:

-It doesn't matter, choose whatever you want.

Which one should I try:

-Only difference is she'll be wearing a different outfit.

Can I ask you something:

-It doesn't matter, choose whatever you want.

Is it possible that someone from the plane crash just appears:

-It doesn't matter, choose whatever you want.

What are we gonna do then:

-It doesn't matter, choose whatever you want.

What if there's not enough food for all of us:

-It doesn't matter, choose whatever you want.

Lighting the fire:

-As mentioned before, you need to try starting the fire twice to proceed. You still won't be able to start it.

How does that hut look to you:

-It doesn't matter, choose whatever you want.

Maybe it wasn't him after all:

-It doesn't matter, choose whatever you want.

DAY 4:

Why is no one here yet:

-It doesn't matter, choose whatever you want.

I just want to start the fire. Am I asking too much:

-It doesn't matter, choose whatever you want.

Wish my ex had such a big...:

-It doesn't matter, choose whatever you want.

Wow! You're almost done:

-It doesn't matter, choose whatever you want.

Yeah. Look what I made:

-It doesn't matter, choose whatever you want.

Her boob fell out:

-It doesn't matter, choose whatever you want.

Now, [relationship status]:

-It doesn't matter, choose whatever you want.

He moves his hands a bit closer towards her ass:

-Grab her ass will give you a couple of different renders.

Where is it:

-You need to press on the knife located in the left box.

Hey [relationship status], whatcha doin:

-It doesn't matter, choose whatever you want.

I don't wanna harm them:

-It doesn't matter, choose whatever you want.

But, what if they bite me:

-It doesn't matter, choose whatever you want.

Try guessing the password:

-password is: password

-if you don't guess it in 3 tries, female character will unlock it and tell you the password.

When on a computer, choose folder named: "Definitely not Porn" and then press on the first image.

I mean they are traveling all the time. And, the stewardesses are really pretty:

-It doesn't matter, choose whatever you want.

When on the computer the second time, choose the folder named: "Definitely not Porn" again and then press on the first image again.

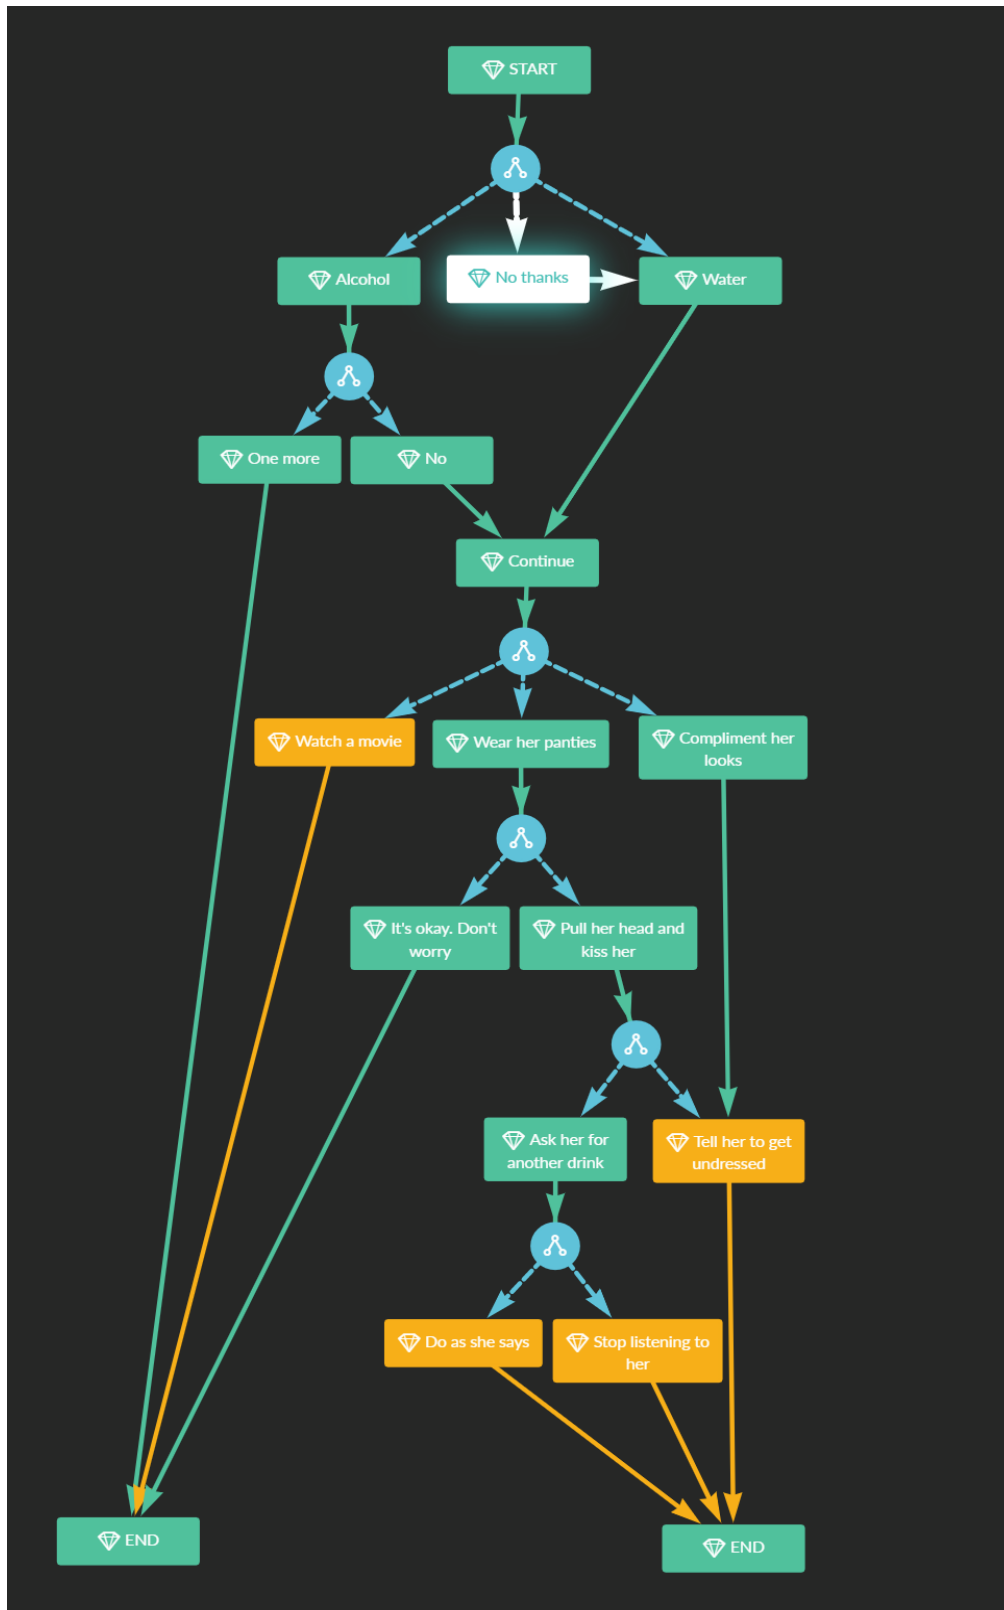

What were you doing on the laptop:

-It doesn't matter, choose whatever you want.

Dream:

-You can drink/or not drink, whatever you want, but don't take alcohol twice.

The image below represents choices and where they'll lead you. The gold one result in a sex scene.

DAY 5:

Still trying to start the fire:

-It doesn't matter, choose whatever you want.

But, we can have fire right away, right:

-It doesn't matter, choose whatever you want.

And, you let me open it:

-It doesn't matter, choose whatever you want.

Yeah, but you were pretty sure it wasn't! How could you do that:

-It doesn't matter, choose whatever you want.

When on the computer, you can choose to read the Shopping List, but you don't have to. If you don't read it, the female will tell you eventually what she read. You can choose the LOGOFF button whenever you want.

The choice with options "I'll make the biggest, prettiest..." & "Hopefully they'll see":

-It doesn't matter, choose whatever you want.

Choice with options "You done with the sign" & "Did you finally manage...":

-It doesn't matter, choose whatever you want.

Can I see it:

-It doesn't matter, choose whatever you want.

It's sooo hot:

-if you choose to go for a nude swim, you'll get additional nude photos of her, as opposed to when she's wearing a bikini.

When looking for a stick, it's left of the left box.

When choosing where to go to fishing, the closer you go to the pier/dock, the bigger chances are you'll catch a fish. At the end of the day, you'll always have 2 fishes, whether you catch only one or not a single one, your female character will catch the rest that is missing to have 2 in total.

To catch 2 fish yourself, you need to go on the left side, closest to the pier/doc, and click on left fish's head first. For the next one, you need to click on the right fish's body.

Now you're starting a fire. To do that, you first need to "Clear everything". Then, add rocks and wood and after that, a hale and twigs. Then try lighting it up.

What are those:

-It doesn't matter, choose whatever you want.

Are they ready yet:

-You can choose whatever you like, some of them have meme sounds.

When you come closer to the female character and have these two options: "Comfort her" or "Make her finish the job", each has its different outcome.

-Comfort her will lead you to her masturbating your penis and later giving you a blowjob.

- "Make her finish the job" route will lead you to a bit more aggressive attitude towards her with different animations.

DAY 6:

Depending who read the text about survival, she will or won't be able to do everything by herself.

-If she goes to look for him, they'll have a funny moment and she won't try doing anything by herself.

-If she's trying by herself, she'll find him later, after she starts the fire by herself.

Once she finds him, she'll be able to either help him or get the wood first. -

-If she chooses to help him, she will go on the same route as if she was looking for her.

-If she took the wood, he'll come by himself a bit later.

Her masturbating:

-If you watch and then jerk-off, she'll catch you and you'll end up with a game over screen.

-If you don't jerk off, you can either choose to stop watching or continue watching, but nothing bad will happen.

Well, I'm glad you got whatever it was out of your system:

-It doesn't matter, choose whatever you want.

Female climbing on the tree:

-It doesn't matter, choose whatever you want.

I just felt a little dizzy:

-It doesn't matter, choose whatever you want.

Are you coming or not:

-If don't go, you both go to sleep.

-If you do go, you'll have an opportunity to finger her asshole.

To do that, on the next option choose "Maybe I should try again" and after that don't choose "Go deeper" because it will send you to sleep, but you should choose "Don't stop".

After that, if you choose "Quit while you're way ahead" you'll finish the whole quest, so you can choose "Probe her asshole" to continue.

She'll eventually wake up, but nothing bad will happen.

THE DREAMS

Check or don't check what's behind the doors:

-If you decide to check what's behind the doors, you'll have few images of people having sex, but it won't influence her in any special way.

DAY 7:

[Female name] stays asleep or not:

-It doesn't matter, choose whatever you want. It'll only show some concerns from our characters and funny situation, but nothing that will influence the game significantly.

I-I don't think I can talk to you about it:

-It doesn't matter, choose whatever you want.

I was thinking...:

-It won't let you proceed until you choose "Try to make it fun".

Who would you like to follow:

-It doesn't matter, choose whatever you want.

At the end, you'll see both routes and it's the same for options inside these options.

Should I tell her about the gun:

-This is an important one, at the moment at least.

There will be some stuff that is yet to happen connected with your decision, so I suggest making saves for both options.

Should I go for the glimmering object, or one of the other things:

-If you choose to go for the other thing, that will eventually lead you to females character dying and eventually a game over, so it's important to go for the glimmering object.

What should I do:

-“Peek” or “Don't peek”.

-If you choose to go for the “Peek” route, you'll have some sexual content, but eventually it will end up with the game over screen.

So, “Don't peek” is the route to follow.

Should I read the whole thing or just go for the summary:

-Again, it is important to read the whole thing since it's important for the future content of the game.

-If you just go for the facts, that will also eventually lead you to a game over screen.

Maybe I should spy on HIM for a change:

-It doesn't matter, choose whatever you want.

If you decide to spy, you'll have more of her thoughts about the male character.

Hmm... This is a tough one:

-For the best scene, you should go for a "Massage" and when asked to massage her, you should do it in this order:

Neck, Lower back, Butt, Legs, Butt.

It's also recommended to check other options as they also have some sensual scenes (If you follow "massage" and "massage all parts" but not in that order, you'll have a foot fetish scene and if you go for her wish, you'll have some cumming scenes).

DAY 8:

What do you wanna do now:

- If you follow your female character, you'll see an animation of her masturbating and her thoughts, also afterward you'll be asked to choose between checking the hut from the inside or the outside, but both have the same ending, so it shouldn't make too much of a difference except some different thoughts and renders. This ending also connects to the ending if you follow male character.
- If you decide to follow male character, please follow the guide as it's described below.

What to do, what to do:

- I recommend going for a swim and then meet female character at the hut for the best future options. Nap will lead you directly to when the accident happens, so you'll miss a lot of content. Fishing is also not a bad choice, but for the best scenario, do only one action before choosing Meet "female character" at the hut.

Okay, where should I go: -Fishing route

- All the fish is next to dock, on the left side. You can catch 2 fishes max before the game continues. To catch both in one try, select upper fish head in the first round and then body from the fish on the right.

After only one job (except for nap):

- Meet "Female characters name" at the hut is the best option for the most content and action in this step. Other two will jump you directly to the accident.

When asked to be happy or confused:

- Happy is better in this case, but you can choose the other way also, it doesn't make much difference

Which do we do first:

- It doesn't matter much, roof gives more "romance"

You feel your climax approaching...:

- If you followed the MC route at the beginning of the day, you'll have this option. You can try both, but the hotdog has an animation so it should be more "fun"

Should I try to get away or try something else:

- If you followed the female route at the beginning of the day, you'll have this option. I recommend choosing Something else since there is an animation and some more fun, but feel free to try both routes.

Oh shit! I'm gonna...:

- In the female route you get this question, so you can choose where should MC cum.

DAY 9

Okay, now what should I do:

- If you follow the Swim route it will raise your Swim skill by one, adding it to the previous day (day 8). You need to have at least 4 swim points to have a different message about being ready to challenge your female character for a race or something (but the race is not yet available - it will be in one of the next days)
- If you choose Jerk off side, you'll have 3 options from which each has at least 2 animations. I recommend trying them all out. It doesn't matter which one you choose for the future progress of the game.

Whom should I fapsize about:

- As I mentioned in the previous question, it doesn't matter. Choose whatever you want (or try them all).

Should I interrupt, or let her speak?

- This is the main fork that will determine if you're gonna get just a blowjob from her, or an intimate kiss (which in long term is a better choice). If you choose Let her speak, that will lead you to a kiss and some grinding, but only if you choose Go all Billy Joel...
- If you choose Interrupt her, you'll get a blowjob scene with different options for where to cum on her.

How is this gonna go?

- This is a new main fork that will determine rest of the evening. Both drink bourbon will lead you to male dominant sexual scenes. Both Forceful and Rough have some elements of S&M with forceful having chocking and rough having spanking. Forceful ends with 69, while rough ends with a blowjob.
- Both drink tequila will give you another kissing scene, fingering her pussy and grinding.
- One of each will end up with you playing rock/paper/scissor. If you win, there's a hotdogging scene with some "knocking" at her back door, and after that her masturbating over you while you lay down. If you lose, there will be some foot fetish scenes.

DAY 10

Should I really try, or should I have some fun:

- It doesn't matter, choose whatever you want. If you go for "Have a little fun" you'll have a daydream sequence where you kiss with her. In "Try hard" you'll have an option to grab her ass but the ending is the same for all ways.

Do I dare...:

- To me, option "Sneak a peek" is more fun with her giving you a striptease and you giving her head. In "Keep 'em closed" you'll get a boobjob and her licking her lips while covered in cum. Both roots lead you to the same ending and are not recorded for future reference.

Will this work for you:

- It doesn't matter, "Let it go" option will be presented again in the next choice if you decide for "Try to convince her". If you want some more kissing animations, "Try to convince her" is the right way.

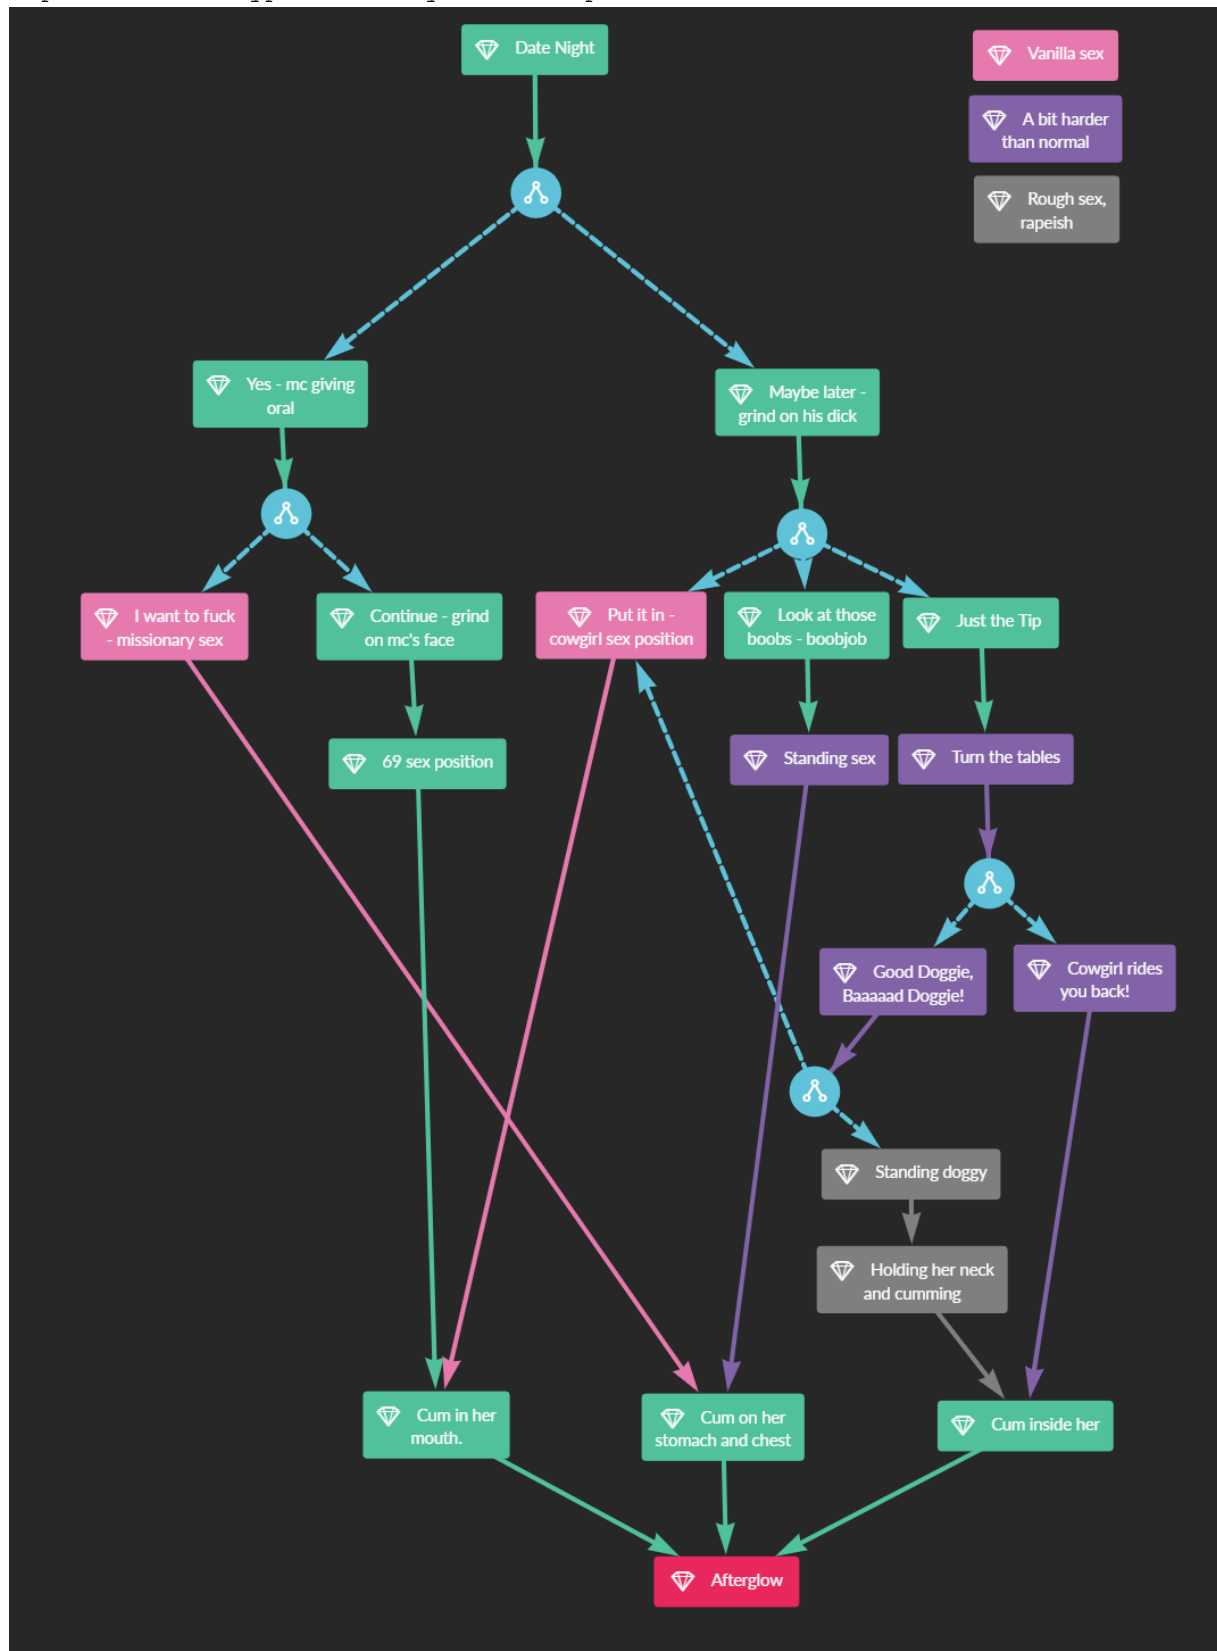

Advance or retreat:

- It's only shown if you chose "Try to convince her" in the previous branch. "Don't listen to her" will lead to main characters more aggressive play and it won't be good for your overall relationship. "Let it go" would be a smarter way since it will lead you to a date with her with more and possibly better outcomes (you'll be able to activate gray, rough choice in the graph below).

How do you want her to address you:

- Choose whatever you like, this won't affect any future options.

The image below represents choices and where they'll lead you. The colors represent the type of sex you can expect.

Stop her or Do nothing:

- Choose whatever you like, this wont affect any future options.

WEhat's the best way to approach this situation:

- Choose whatever you like, this wont affect any future options.
