

My Normal Family

Walkthrough

Every day there are 10 playable periods.

From the Late morning period you can leave the house by clicking on the map.

Some locations on the map can only be reached at certain times of the day/night.

Each month lasts 30 days after which you return to day 1.

The mobile phone is your most important interface, from there you can: review all your videos, change your ringtones, check your score with all the characters, check your inventory, your contacts, call or receive phone calls or sms.

It's important on the 20th of the first month to have breakfast with Katrin because she'll introduce you to Ivy, if you miss this appointment you will have to wait until the 20th of the following month.

Immediately after the introduction set the ringtones on your new mobile phone.

Every time you meet a new character you have to increase your trust to 10 with them.

The first goal to be achieved is to increase agility to 30 to be able to spy on everyone quietly.

At any time in the game if you want, right click on the mouse that takes you to the main menu, select "Options" and change the name and degree of kinship with your family characters.

Naomi will only be home on weekends because she's studying at the university.

You will rarely need money but if you do, go to the clinic and work 3 or 6 periods.

This game is increased version by version so it is especially important for those who start the game after so many versions are released that you follow the order of things to do as written in the WT . Do not hesitate to use skip days or time. No event is linked to the days of the month except the 20th day of the first month to get to know Ivy. An example for everyone, if you don't reach Trust 10 with a character, you can't do anything with him. Some events trigger other events so they have to be done in order.

This WT is written with Word so you can also write on it to mark the point where you have arrived.
