• • INTRODUCTION • •

This is a fan made guide for The DeLuca Family game, it's updated as the game is developed and may be missing information or wrong at times.

What are the requirements for this game?

More than a potato and Windows, Linux or Mac. An unofficial Android version exists, but is not supported by the developer.

What languages are available?

English, Italian and French.

My game is buggy, where can I get help?

There's a Bug Report channel in [Hopes Discord](#) for troubleshooting.

Who is romanceable?

Luna, Gracie and Isabel are the main romance interests, but there are other women to be bedded through the story.

Is there any cheat?

Not built in the game, the grind is fairly low in this game but if you must you can search for how to enable the Ren'py console.

What are the greyed-out texts?

That means they have no last impact in the game, you are free to pick any option or choose one of the ones that changes progression.

Is there sexual content at all?

The DeLuca family is an adult game that focuses on story and character development, but yes there is sexual content.

Do I need to play every route and event?

In part, some events depend on each other, but you are not forced to engage romantically with women you don't want to.

Is there an Incest Patch?

No, because the DeLucas are not related to the Player at all.
