last updated	diskless	Number of saves	bug-fixing patch	Manufacturer link
17/02/24	Yes	100	Yes	

Full Comp Save | Adding a code in the environment settings will open various bonuses.

Note that when "Kiss click" system occurs, "Kiss not" will automatically select not to kiss when the time elapses. However, the part where the scenario does not progress unless you kiss is automatically kissed at the part of ○. There is no automatic selection when the option is displayed.

[Display choices instead of kiss selection] If you set the setting to ON, you can avoid mistakes such as forgetting to kiss.

In the part of ○, the scenario does not proceed unless you select "Kiss". ● is a place where character liking goes up when you kiss.

* The ★ part is the branch point of the character event.

In the strategy, if you do not make a mistake in selecting the character to kiss in the part of * ★, then you can choose OK to kiss all.

Harlems will be released after four players have been captured. However, if you enter [Niromisa] in the code input of the environment setting, it will be released and you can do it for the first time.

If you have DL version or [genre change patch](#) installed, you can go to END. (There is CG but it is not registered.)
