# **STRATEGY**

This guide will do its utmost to make sure your journey through the game as painless as possible. I aim to give you the best decisions for each variable and let you make your own wherever possible.

## <u>WARNING!</u> – THIS GAME HAS ADULT CONTENT, PLEASE MAKE SURE YOU ARE OF LEGAL AGE IN YOUR COUNTRY.

#### STAT POINTS

[CharacterName] Relationship Points gained/lost per character.

[CharacterNameL] Lust Point's gained/lost per character.

[Event Trigger] Triggers that affect dialogues, scenes and choices.

**Note:** Having played this game, it is mostly likely going to have a harem ending, or at the very least a point where you can decide once and for all what girl(s) you want to keep. So, I kept it simple and just made a harem guide, you will get all women, unless there are ones you are not interested in, then just be mean to them, but it will not be accounted for in this guide. There are far too many choices to make an open walkthrough for this game. Cheers! I will do end game Paths for single girls if they make you choose, when that becomes a thing.

83. (Joke/Flirt)	[Katie+2]
84. (Tease / Make jealous)	[Katie+2]

**Note:** If you want to spend time with Katie it is better to Agree with Debbie and Ignore Lily's call. It is only -3 points for Lily, and it's better for the Debbie/Lily/Katie 4Some path. You can always save here and reload to see the scenes you missed. I will be picking Debbie and ignoring Lily (JUST this once). Not spending time with Katie is the only way to do both and I'm not doing that. I will show both paths though, just for those who choose Lily.
