This game guide was initially started as an independent project by **Zoey Raven**, and he worked on the walkthroughs for the first 2 Chapters. I (**BloodyMares**), as a fan of the game, decided to offer my help with proofreading and playtesting to help make this guide as accurate and helpful as possible.

However, because Zoey had a lot on his shoulders, making guides for many other adult games at the same time, he couldn't continue working on it anymore. So, Zoey asked me to take over and I gladly accepted. Thanks to his immense help and guidance, I was able to step-in and continue his work.

Around this time, **Eva Kiss** showed interest in featuring this guide for her game to share it with her supporters, so that's how this guide became official! Please, support Eva for making this game!

 Eva Kiss: HTTPS://WWW.PATREON.COM/EVAKISS

IMPORTANT

This guide will do its utmost to make sure your journey through the game is as painless as possible, providing you with the best decisions for each variable and detailed information to help you make your own wherever possible. However, this guide is a work in progress. I do not take responsibility for inconsistencies or errors that you might encounter while playing the game. Every question regarding the technical problems should be directed to Eva Kiss.

HOW TO USE THIS GUIDE

NAVIGATION

This dual-protagonist game is a non-linear experience with variety of choices that impact the story and change the outcome of the game. The story is told in Chapters from different points of view. These pointers will help you navigate through the interwoven story:

Scene – a location where current events take place.

   Label – a small secondary scene or an optional activity.

Event – a unique sequence that is triggered by previous decisions. Indicates diverging routes**.**

VARIABLES

To enrich the role-playing opportunities, the game uses the following variables:

[Stat Points +/-] – the main 6 stats that are listed in the character's phone app.
   Note: You need 3 [Stat Points +] to increase [Stat Level].

[Agenda Points +/-] – your relationships with other characters that are listed in the phone app.
   This reference will help you track your current relationship value (12 total):

[Event Triggers] – hidden variables that affect scenes, choices or dialogues.
   Note: Due to non-linear nature of the game, certain events can be triggered by various combinations of choices. For simplicity, the guide uses [Event Triggers]. It's important to remember which ones are at effect.

[Trigger Points] – hidden stats that can influence characters and affect certain [Event Triggers].

Note: Sometimes stat / relationship change won't be affected beyond / below a certain value.

Example: [IanPerry+1 < 4] means that you'll get [IanPerry+1] only if your current relationship with Perry [IanPerry] < 4; it won't change if the relationship value is 4 or higher.

CONTENTS

PROLOGUE

Note: Before you start the game, you have the option to enable the Cheat Mode. It will automatically max out all of your skills to a level 10 as well as give you 10 Money and 10 Will. Pick this option if you don't want to bother with stat management. If you want to have the best role-playing experience though, I suggest playing the game without it.

Cafe

1. **Choose One:**
    A) It's not the kind of book I like!   [v1AnswerCafe1]

    B) It's terrible   [v1AnswerCafe2] [IanCharisma+1]
