# Notice

Hi

The point that can be said about this game and this guide is that, like many other games, this game does not have a clear method and sequence of events. This means that players can to some extent determine the order of events in the game. The game also has several related story lines. Therefore, writing a guide that sorts and numbers the events of the game from beginning to end will either not be possible or will be very difficult and the text will be very long. On the other hand, it will destroy the pleasure of the game. Also, if the players forget something, the gameplay will change completely.

This game has a lot of "opportunities" and "events", some of which are related. The order and choices made by the players in each of these "opportunities" and "events" determine how the game will continue and end.

This guide will tell you how each of these "opportunities" and "events" begin and how they end, what happens within them, what other opportunities and events are associated with them. And it is also tell that what choices will change path of the game.

Hope this guide helps you if you need help

Be careful of Lisa's mood (very good) and your relationship with her (warm).

Do not let Lisa or Alice be punished when doing the "opportunity".(Use save / load)

Be careful of Lisa's homework (Lisa should show both breasts while doing homework. If she does not do this, you did something wrong or you forgot something)
