

Lessons in Love v0.15.0p1 Event Guide

What is this Guide?

This guide provides a list of the triggers for all of the events in the second chapter of Lessons in Love as of 0.15.0. It is an aid for people who have either gotten stuck and don't know how to progress in the game or who want to know how to unlock those few events that they managed to miss. It is not a walkthrough.

If you are new to the game, I recommend you play it blind. As of the current version, there are very few missable events (and it may even be in your long-term interest to miss them).

Missable events are marked in red in the guide. You'll know that you missed an event when your game's event tracker shows a different event name in red that is crossed out (though a few of these don't seem to have actually been implemented in the code). As of v0.15.0p1, the vast majority of missed events are the result of either Sensei choosing to not make a move on a girl or a girl having insufficient Lust during a time-limited event.

Events without any listed triggers (currently those at the beginning and end of the Main Events list) will occur automatically. Some obvious triggers have been excluded for the sake of brevity. For example, if you want to see a girl's dorm event requiring 20 affection, you will of course have to see the one requiring 15 affection first.

Many thanks to Selebus for this wonderful game. If you enjoy it, I recommend you [visit his Patreon](#) and help him to continue working on it.

Main Events

Snow-Covered Footprints
