Introduction

Welcome to the unofficial guide dedicated to the visual novel *Being a DIK* which focuses on the players' choices and their consequences on the adventure.

Footnotes and hyperlinks make the navigation between sections and seasons of the story easier. Summaries punctuate the tricky passages and several annexes list the features for a complete overview. Also, the locations of special renderings and the minigames won't be detailed because these information are already in the official guide.

I hope this guide will answer your questions and assist you to shape the story of *Being a DIK* in an informed way!

How to read this guide

The stats

Being a DIK is based on two stats: your status and your affinity. The status tracks how you behave and it operates into three distinct ranges with specificity according to the number of points. It's updated at various steps throughout the game.

Status range	DIK			NEUTRAL	CHICK		
	MASSIVE	HUGE	STANDARD		STANDARD	HUGE	MASSIVE
Points	> +14	+14 ↔ +10	+9 ↔ +5	+4 ↔ -4	-5 ↔ -9	-10 ↔ -14	< -14

Status ranges and scores required

Your affinity is limited to major decisions either “DIK” or “Chick”: its own range correspond to the majority of them only if the totals difference is at least two choices. Otherwise, if the difference is zero or equal to one, then the affinity stays in neutral range.

Affinity range	DIK	NEUTRAL	CHICK
Totals difference	DIK - Chick > 1	$1 \leq \text{DIK} - \text{Chick} \leq -1$	DIK - Chick < -1

Affinity ranges and differences required between the totals of DIK and Chick decisions

Examples: 3 DIK decisions for 1 Chick give **DIK** affinity; but 3 DIK for 2 Chick give **NEUTRAL** affinity.

Every decision decreases the opposite status max range by one scale block, thereby affecting the ability to reach outermost status in the long term. Last but not least, your affinity becomes permanent when the new score exceeds the maximum scale still available – which can only happen from episode 6 onwards. The game assigns the decision that suits you the best once affinity has become permanent.

Your choices influence the story

The actions you opt for have direct effects on variables such as the status points, the relation between characters and the money.

Related to	Symbol	Definition
Effects	SP	(↓ SP) This action removes one status point.
	♥	(↑ ♥ Josy) This action adds one relationship point with Josy.
	\$	(- \$3) This action removes three pocket money.
Stats	DIK	DIK range or specified DIK status
	NEUTRAL	Neutral range
	CHICK	Chick range or specified Chick status

Most-used variables have symbols and one point added or removed is tagged by one arrow up or down

In addition, long-term outcomes are referenced inside the page footers:

- Trivial ones shift lines of dialogue and character bio pages without further repercussions.
- Minor ones unlock relationship points, money, or sex scenes.
- Major ones are imperative for achieving romantic relations with the love interests.

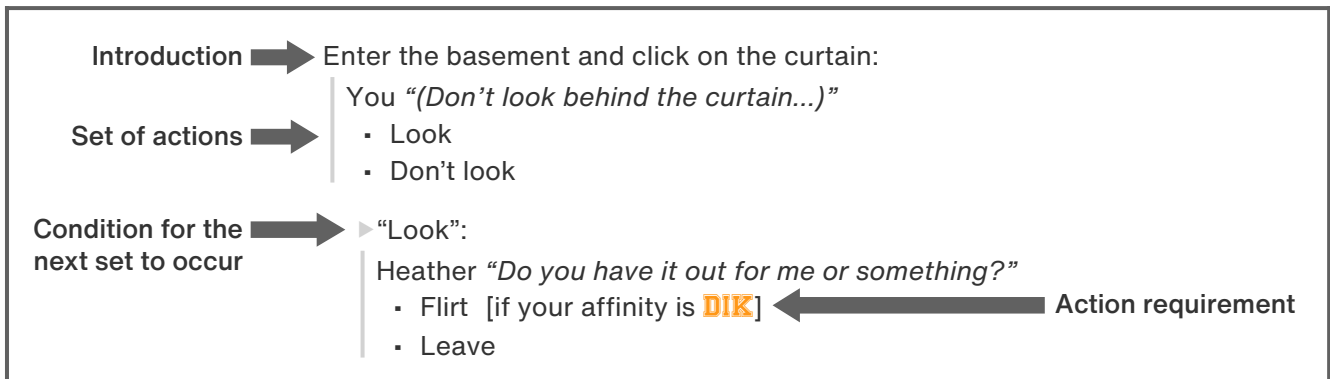

Be sure to refer to the correct episode as you may kiss, flirt or have sex with the same character in multiple chapters, each time with a different outcome.

Actions: understanding their conditions and effects

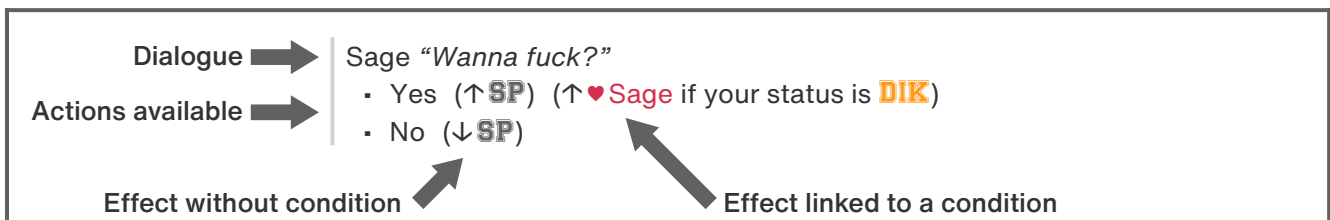

The choices presented to you are as many actions that depend on conditions. Keep in mind that conditions may affect:

- the occurrence of a set of actions,
- the availability of an action regardless of the others,
- and the effect of an action.

The document displays the sets of actions in a tree-like pattern: each paragraph with a new indentation is a new branch and follows a particular condition for its occurrence. Action requirements and effects are written respectively inside square brackets and inside round brackets. Finally, effects are written together with the conditions to which they may be linked.

Extract of a sequence: the second set appears only if you select a specific action

Extract of a set of actions: the second effect of the first action applies only if you meet a specific condition

However, as conditions tend to stack up over the course of the game, more complex arrangements are made to harmonize the backstory. They are presented inside infoboxes.

Phone features and house work

Contacts, Rooster and Swyper actions are also detailed inside colored boxes. Given the amount of dialogues the apps include, only successful and effective messages have been copied and truncated when necessary. Starting in episode 6, the information about house work is given as suggestion; the allocation of experience points and assignments are optimized to make sure you complete all tasks.
