This game guide was initially started as an independent project by **Zoey Raven**, and he worked on the walkthroughs for the first 2 Chapters. I (**BloodyMares**), as a fan of the game, decided to offer my help with proofreading and playtesting to help make this guide as accurate and helpful as possible.

However, because Zoey had a lot on his shoulders, making guides for many other adult games at the same time, he couldn't continue working on it anymore. So, Zoey asked me to take over and I gladly accepted. Thanks to his immense help and guidance, I was able to step-in and continue his work.

Around this time, **Eva Kiss** showed interest in featuring this guide for her game to share it with her supporters, so that's how this guide became official! Please, support Eva for making this game!

DISCLAIMER

This guide will do its utmost to make sure your journey through the game is as painless as possible, providing you with the best decisions for each variable and detailed information to help you make your own wherever possible. However, this guide is a work in progress. I do not take responsibility for inconsistencies or errors that you might encounter while playing the game. Every question regarding the technical problems should be directed to Eva Kiss.

HOW TO USE THIS GUIDE

NAVIGATION

THIS DUAL-PROTAGONIST GAME IS A NON-LINEAR EXPERIENCE WITH VARIETY OF CHOICES THAT IMPACT THE STORY AND CHANGE THE OUTCOME OF THE GAME.
THE STORY IS TOLD IN CHAPTERS FROM DIFFERENT POINTS OF VIEW. THESE POINTERS WILL HELP YOU NAVIGATE THROUGH THE INTERWOVEN STORY:

SCENE REPRESENTS LOCATION WHERE CURRENT EVENTS TAKE PLACE.

EVENT IS A UNIQUE SEQUENCE THAT IS AFFECTED BY YOUR PREVIOUS DECISIONS. USUALLY TIED TO CHARACTER PATHS.

BRANCH INDICATES DIVERGING ROUTES.

FOR CONVENIENCE, TRANSITIONS BETWEEN ALL OF THESE ARE BOOKMARKED WITH "GO TO: BOOKMARK"

VARIABLES

TO ENRICH THE ROLE-PLAYING OPPORTUNITIES, THE GAME USES THE FOLLOWING VARIABLES:

STATS

THERE ARE 6 DIFFERENT STATS IN THE GAME

WITS, CHARISMA, ATHLETICS, AND LUST DETERMINE DIFFERENT TRAITS OF YOUR PROTAGONISTS THAT YOU CAN LEVEL UP.

CERTAIN ACTIONS AND CHOICES WILL GIVE YOU EXPERIENCE POINTS [STAT + XP] RELATED TO ONE OF THESE FOUR BASIC SKILLS.
EARN 3 [STAT + XP] TO LEVEL UP YOUR STATS.

MONEY AND WILL CAN'T BE LEVELED UP. THESE ARE RESOURCES THAT CAN BE EARNED (+) AND SPENT (-).

AGENDA

[AGENDA +/-] REPRESENTS YOUR RELATIONSHIP WITH OTHER CHARACTERS. EACH CHARACTER USES THEIR OWN UNIQUE COLOR (IAN, WAITRESS, PERRY...)
HERE YOU CAN CHECK YOUR RELATIONSHIP STATUS WITH EACH CHARACTER AND SEE IT'S PROGRESSION THROUGH THE BAR. THERE ARE 12 TOTAL AGENDA POINTS:

Due to non-linear nature of the game, certain events can be triggered by various combinations of choices.
For simplicity, this guide uses [Event Triggers] and Status Points.
[Event Triggers] are hidden variables that represent your choices and affect your narrative. It's important to remember which ones are ACTIVE. To make this task easier, each Chapter provides RECAP for relevant variables:
ACTIVE: [trigger = True]
INACTIVE: [trigger = False] (default status for most variables).

Status Points are hidden in-game stats that represent the characters' Status Quo.
They function similarly to [Event Triggers], with one major difference: you can INCREASE or DECREASE their value.
Sometimes you need to earn Status Points for certain [Event Triggers] in order to unlock them.

PROLOGUE

NOTE: Before you start the game, you have the option to enable the **Cheat Mode**. It will automatically max out all of your SKILLS to LEVEL 10 as well as give you 10 MONEY and 10 WILL. Pick this option if you don't want to bother with stat management. If you wish to have the best role-playing experience, however, it is recommended to play the game without it.

EVENT: FIGHT WITH ROBERT

REQUIREMENTS: v7_fight = 1

FIGHT TUTORIAL: This is your first serious fighting opportunity. Every action has a time window and requires quick thinking. The higher your kickboxing or jiujitsu stats are, the more time you can take to react in this fight. If you fail to react, then you'll leave yourself open to enemy attacks and will get hit.

You start with the **Initiative** and can do several things: **Attack**, **Guard up**, **Provoke** or **Tap out**. Successful **Attack** leads into **Offense**, and **Guarding** into **Defense**. **Provoking**, if successful, can leave the opponent open to your attacks or make it easier for you to **Evade** incoming attack. **Tap out**, if you don't feel confident and want to stop the fight. Keep in mind that these last 2 actions can leave you open, so pay attention to your enemy before deciding the best approach.

On the **Offense**, you can **Punch**, **Grapple** or perform a special move that you've learned. You can also **Stand back** if you change your mind and want to gain the **Initiative**.

While you're on the **Defense**, you can try to **Block** or **Evade**. Successful defense gives you the opportunity to **Counter** and go into the **Offense**.

Your objective is to defend yourself for **3 rounds**. After the final round, if you've dealt more damage than received (v7_fight > 1), or managed to defeat the opponent before that, then YOU WIN. If you've taken more damage than the opponent (v7_fight = 0) or got knocked out during the fight, then YOU LOSE. Otherwise, the fight ends in a DRAW.
