Overview

This walkthrough attempts to follow a mixed but bad boy approach, which means the main character will do (some) crime including killing off a drug dealer and may later even join the mob undercover. Won't be a complete asshole, he is ok towards family & friends, working for the mob gathering evidence...

This allows both high charisma (7) and high intimidation (8) to unlock the nice guy content as well as scenes requiring a more dominant approach (i.e. intimidation skill).

 = chosen option
