# Basic operation

## Basic operation of Windows

This program uses the following Windows basic operations.

- ① **Left click** : Press the left mouse button.
- ② **Left button drag** : Move the mouse while holding down the left mouse button.

In this manual, there is an expression "please select ~".

If there is this description, please move the mouse cursor to the part of "~" and click the left mouse button.

(Example: If it says "Please select the decision button", move the mouse cursor to the "decision button" and click the left mouse button.)

\*In some cases, files may be copied, moved, or deleted . may need to be performed. If you do not know this, please contact your computer manufacturer.

**Japanese input** : To enter Japanese in the input field, click the input field, hold down the "Alt" key on the keyboard, and press the "half-width/full-width" key before entering characters.

\* Once this operation is performed, it will be Japanese input until the game is restarted or the same operation is performed again.
