Shut Up and Dance
By Boring Games
https://www.patreon.com/boringgames

This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlights elements, not influence your decision. There isn't a right or wrong way through the game, only **you** should decide.

Only decisions that have an impact on the story or your character are shown.

There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

Legend

Character and game related attributes that can be increased/decreased (i.e.: a number value) will be represented with an icon followed by the character/description name: (Cannot decode) Bubu or (Cannot decode) Bubu

More complex values will be written as text instead:

girls kissed +20

Reference to these values will reuse the same icon or text: Bubu (Cannot decode) is at least 5 girls kissed is at least 25

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this:

(Cannot decode); Granny;

igrandmas kissed +20;

Icons

Flow Symbols

Skip until the next section

Decision labels

When something you do can have an impact later on in the game, a label will be visible where it happens like this $\frac{1}{2}$

In some rare cases decisions can be reversed, to distinguish it more easily the label will look like this did not decide something #123

References to this label will also include the same number so it is easy to track it down to where it happened (could be multiple places). decided something $^{\#123}$

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this:

jagree i #55**

Reversed decisions that do not impact the story (yet) will be displayed like this:

¿did not agree;#55

Check the last page of the walkthrough to learn how you can use the developer console to cheat alter their value for your benefit: Cheat without a MOD (link).

Enjoy the game!

So how are we doing this? ¿save Angelina; #44 Sneaking in Influencing dealer ;influence dealer; #43 Scene Megan #35 Watch it from the gallery Scene Sarah #19 Watch it from the gallery

Walkthrough rev 1.0

Cheat without a MOD

Don't worry, with the developer console you can easily modify in-game variables.

First of all, you need to enable the developer console, if you are lucky it is already enabled, type Shift+O in the game (Hold the SHIFT key and type the letter O). If not, close the game, go to the ${\tt game}$ directory and either create a file named options.rpy or edit with a simple text editor (e.g.: Notepad) if it already exists.

If that happens delete the file options.rpyc that gets created

automatically after starting the game with the file options.rpy present This can be automated on windows with the following script: ShutUpAndDanceEp9Ch1Special.cmd

start "" "ShutUpAndDanceEp9Ch1Special.exe"
