

Playthrough guide, All relationships

The best way to play this game is to just try it. It has remarkable artwork and story, so I urge you enjoy the creator's work to its fullest. Also, if you like the game consider supporting the creator through their patreon page <https://www.patreon.com/longlivetheprincess/> and subscribestar page <https://subscribestar.adult/long-live-the-princess>

Spoilers!!! This entire document will have lots of spoilers for the game, so only use it if you can accept that!

Many choices are optional and will be marked with a "*"

Whenever there is a "Sleep *" means that you can either sleep, have sex with someone or go molest someone.

This is not a full walkthrough, however it is a playthrough, where you gain all abilities and obtain the good ending, while making it possible to get all relationships, except the Evelyn/Callie Lesbian path. But It's obvious, just don't start a relationship with Evelyn and send her to Callie instead. There is an important branch between two mutually exclusive paths, but they will be shown in the guide.

The game can be finished in many other ways, but this is the most efficient way I have found to unlock most of the scenes in the game.

This guide does not include how to unlock all scenes. And it does not include the NG+
