City of Broken Dreamers 1.14.0 Walkthrough rev 1.6

> Written by: MrBubu https://www.patreon.com/mrbubu

<u>City of Broken Dreamers</u> By PhillyGames <u>https://www.patreon.com/phillygames</u>

> This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlights elements, not influence your decision. There isn't a right or wrong way through the game, only <u>you</u> should decide.

Only decisions that have an impact on the story or your character are shown. There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

Legend

Character and game related attributes that can be increased/decreased (i.e.: a number value) will be represented with an icon followed by the character/description name: 💛 Bubu or 💔 Bubu

More complex values will be written as text instead: girls kissed +20

Reference to these values will reuse the same icon or text: Bubu 🖤 is at least 5 girls kissed is at least 25

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this:

;grandmas kissed +20;

lcons

Note: There is a new variable tracking something (how she is coping with the past maybe?) between Sonja and you in chapter 8 and 9. It isn't clear yet if it will have any impact in the future. I currently marked it with the ??? (positive impact) and ?? (negative impact) symbols.

Flow Symbols

 \otimes

Skip until the next section

Decision labels

When something you do can have an impact later on in the game, a label will be visible where it happens like this decide something ^{#123} In some rare cases decisions can be reversed, to distinguish it more easily the label will look like this did not decide something ^{#123}

References to this label will also include the same number so it is easy to track it down to where it happened (could be multiple places). decided something ^{#123}

Some decision labels can denote a progression and sometimes we must check if the current value is above or below a certain threshold. To keep it succinct, all accepted values will be listed in brackets.

For example let's define some karate belts and assign each one to a numerical value: $0 \Rightarrow$ white belt ^{#78}, $1 \Rightarrow$ yellow belt ^{#78}, $2 \Rightarrow$ orange belt ^{#78} If in the code the condition checks that the value must be at least 1 (karate_belt >= 1) It will be listed like this: karate belt: [yellow, orange] ^{#78}

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this: *i agree i*^{#55} Reversed decisions that do not impact the story (yet) will be displayed like this: *i did not agree i*^{#55}

Check the last page of the walkthrough to learn how you can use the developer console to cheat alter their value for your benefit: Cheat without a MOD (<u>link</u>).

Enjoy the game!

Cheat without a MOD

So you want to try out a new branch but do not feel like completely starting over a new game?

Don't worry, with the developer console you can easily modify in-game variables. You only need some basic understanding of scripting.

The easiest way to enable it is to use the Universal Ren'Py Mod from 0x52. Download it from the webpage: <u>https://0x52.dev/mods/Universal-Ren-Py-Mod-1000</u>, then unzip it and drop the rpa file in the game folder.

(Re)Start the game and load a savegame, type ALT+O (Hold the ALT key and type the letter O) to open the console and use the ESC key to exit

Character variables

variable: The variable

definition: what it represents set variable / new value: what to type in the developer console to turn the variable on or set a new value unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value

variable	definition	set variable / new value	unset variable	check current value
ab_score	Abby score points	ab_score = value		ab_score
ab_lust	Abby lust points	ab_lust = <i>value</i>		ab_lust
bambi_trust	Bambi trust points	bambi_trust = value		bambi_trust
c_score	Chandra score points	c_score = value		c_score
c_lust	Chandra lust points	c_lust = value		c_lust
e_score	Ellen score points	e_score = value		e_score
e_lust	Ellen lust points	e_lust = <i>value</i>		e_lust
g_score	Gloria score points	g_score = value		g_score
g_lust	Gloria lust points	g_lust = value		g_lust
h_score	Henry score points	h_score = value		h_score
k_score	Katie score points	k_score = value		k_score
k_lust	Katie lust points	k_lust = value		k_lust
k_dirty	Katie depravity points	k_dirty = value		k_dirty
king_trust	Little Big trust points	king_trust = value		king_trust
sa_score	Sasha score points	sa_score = value		sa_score
sa_lust	Sasha lust points	sa_lust = <i>value</i>		sa_lust
sa_int	Sasha trust points	sa_int = value		sa_int
s_lust	Shanlon lust points	s_lust = value		s_lust
s_break	Shanlon break points	s_break = value		s_break
j_score	Sonja score points	j_score = value		j_score
j_p	Sonja past points?	j_p = value		j_p
t_score	Teri score points	t_score = value		t_score
todd_int	Todd trust points	todd_int = value		todd_int
todd_trust	Todd trust points	todd_trust = <i>value</i>		todd_trust
v_score	Victoria score points	v_score = value		v_score
v_lust	Victoria lust points	v_lust = value		v_lust
dep	depravity points	dep = value		dep
ch5dream	dream points	ch5dream = value		ch5dream
ch4battlescore	Battle score	ch4battlescore = <i>value</i>		ch4battlescore
ch14ammocount	Ammo	ch14ammocount = value		ch14ammocount
ch14grenades	Grenades	ch14grenades = value		ch14grenades
ch14redmoonscore	Red moon score	chl4redmoonscore = value		ch14redmoonscore

Game Decisions Variables

label: The label as found in the walkthrough set variable: what to type in the developer console to turn the variable on unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value

	heck the current value
