Obtain Snake Tears & Tonneless Takurin

Snake Tears

After the ending, it will be displayed on the number of times each heroine has completed the route.

Proceed with the pink text route (sleep rape/vaginal ejaculation).

The method for sleep rape and vaginal ejaculation is to use Ibarahime's spindle.

This can be done by ejaculating at an increased speed after insertion.

Be careful as ejaculation at low speed will result in ejaculation outside the vagina.

Only Kaede Eide cannot switch to high speed,

By speeding up the manual piston during insertion, sleep rape and vaginal ejaculation can be performed.

If you defecate, you won't be able to make a high-speed judgment, so use this when making judgments.

The difficulty level of Eide Kaede's sleep rape/vaginal ejaculation is scheduled to be revised in a future update.

If you download the emergency patch distributed by the manufacturer's Ci-en

You can now switch quickly and lower the difficulty level.

After performing sleep rape and vaginal ejaculation on everyone, you can obtain a new true name in a conversation event with the president.

If you enter your true name in the mirror, you can obtain the item ``Tears of the Snake."

Tonneless Takurin

After obtaining the Tears of the Snake

If you use Snake's Tears in the touching part, a new gauge will be displayed on the right side of the screen.

By blaming a specific part, the level of the gauge will rise, and by blaming a specific part at Lv9,

You can make it climax by adding a ★ mark.

There is no visible change such as an increase in the gauge until you move from Lv9 to the ★ mark.

It is necessary to continue to torture the relevant area for a long time (about 30 seconds?).

If you open the backlog with the mouse wheel ↑ while using the command that blames when you press and hold the mouse,

It will now automatically blame you, and you can fill up the gauge even if you let go of the mouse.

In the later event after obtaining "Tonneless Takurin", in order to make everyone pregnant

After placing the ★ mark, you will have to follow specific steps to perform sleep rape and vaginal ejaculation.

After getting the tears of the snake, it seems that pregnancy can be determined by placing a ★ mark and then ejaculating.

If you want to see the epilogue as soon as possible, follow the steps in the "After obtaining Tongueless Takurin" section.

You can now pick up magazines on the floor when you return to the office after marking everyone with a ★.

Once you pick it up, you will be able to enter your new true name and receive the item ``Tongueless Takuzu."

Hidden route condition

If you press and hold the command to play with the nipple, an action that pulls the nipple upward will occur. When this action occurs, the nipples can be developed, and there is a limit to the value that can be developed in one touching part. If you play multiple times, the development level will accumulate.

When the nipples are fully developed, you can produce breast milk by playing with the nipples while the ★ is lit.

Wake her up with insertion, pinch her nipples for 30 seconds, let the milk flow, and then choose to fuck her.

About vaginal ejaculation while kissing

Start the piston after insertion and then switch to "high speed". After that, if you change the viewpoint and continue kissing for about 10 seconds, you can ejaculate while kissing.

Detailed conditions for nipple development

*Information provided by a paranoid person in the comment section.

When you perform an upward pulling motion with the "tease nipples" command. If a gasping sound is heard, it is determined that it has been developed once. It is possible to develop up to 9 times in total in one play, and development will be completed in a total of 36 times. After completing development, if you perform nipple development 5 times with the ★ lit, breast milk will come out.
