## ***BACKGROUND INFO***

*[\[CLICK HERE TO HEAD BACK TO THE TABLE OF CONTENTS!\]](#)*

- STATS:
  - EVOLUTION LEVEL
    - There are 5 stages that a character can evolve through, with 5 being the highest. In game, this stat keeps track of what evolution stage you or others are on.
  - POWER
    - The general power stat each character has throughout the game, of course. determines how strong or powerful someone is. This is more raw-power than finesse and technique and is often correlated with a corruption-favored playthrough.
  - SKILL
    - The technique and finesse stat, each character has a certain amount of skill. For example: Michael could be considered one of the most skilled characters in the game. This comes from experience and technique as I have mentioned and is correlated with a purer playthrough.
  - ENERGY
    - The energy stat comes from the one Training event with the cows at the farm from consuming them. We now have another instance of the Energy stat with the latest option to buy a Monster Energy Drink. This stat is most likely a power-up or boost for you.
  - CORRUPTION
    - The most questioned stat in the game and for good reason. Corruption is

the MC's mindset and status in relation to his powers and monster parents/monster-side. Choices related to murder, consumption, instinct, and, of course, monsters, are generally what influences it. As for what it does? Not all that much now. It changes dialogue in minor ways and unlocks some options that are otherwise locked. The stat is more for the late game than it is for the current game. The game's endings will be heavily tied to it.

#### ○ MONEY

- Not a whole lot to mention here, the shopkeeper is an interesting character in the game with an interesting inventory for sale. Money is used in some choices to help get points, such as offering to help Emily and Amber with their troubles. With Version 0.96, you can buy different monster parts that give Stats! So you may want to consider accepting that money offer from Tiffany.

#### ○ PUBLIC/GOVERNMENT OPINION

- Pretty self-explanatory but this is the general opinion of you, and your hero form, from the public and government. The only real thing they do are determine if you are perceived as a public hero...or a public menace...doesn't change much in the game YET besides dialogue so don't fret too much. There is one check for becoming a hero or villain after the mall event, but just dedicate to pleasing either the public or the government and you are solid.

#### ○ CHARACTER/GROUP EVENTS

- Side Stories and events, the stat menu just keeps a tally of how many you have done, and these should come secondary to training, I will explain some here and in the general lay out of the beginning days, YOU WILL BE ABLE TO PLAY THROUGH THE SIDE STORIES AND NOT MISS THEM. I have different sections for each one all the way up to the latest release.

#### ○ TRAINING

- The most important stat in the game, by itself and what it entails, as you might have guessed: power, skill, corruption, the energy stat, and the

training value itself. You will face many dangers on this path and training will keep you alive! I have all the events for the training in the Side Routes section.

- RELATIONSHIPS

- Click the “relationships stats” icon next to “your stats” when right-clicking. This is a list of the main character’s relationship stats, coming from the main story and side stories/events. Self-explanatory, and there are requirements with the relationship values, like with most avns.

- MORALITY

- Good and bad choices of course, as of now (0.96), it is used in Evolution Scenes. It may be used alongside corruption and other choices to determine who you have become in the end.

- DEAD ENDS:

- The bane of the avn gamer’s existence. As you might have seen for yourself and/or through the walkthrough, there are a fucking bunch of them. The walkthrough was meant to help you avoid them and what requirements you need to meet to do so. These come from random events, characters, and battles alike, or just meme choices, but be wary and stay alive!

- PATHS:

- There are two main runs you can do, POWER/CORRUPTION and SKILL/PURITY sure it is easier to stick to one as you don’t need both to win fights, for example: you can win the Valravn fight swiftly just by having the right skill amount OR power amount and picking the right option. But getting both is pretty simple!

- Corruption/Power

- As I have mentioned before, doing a corruption route will mostly gain you power, something you can’t get or do if you are abstaining from corruption, which is why the two of them are associated.

- Skill/Purity

- If you are trying to avoid corruption, pick skill 100%, this is your

go to stat to have to win if you don't want corruption, because being pure means you cannot make the corrupt choices, which will make you lose out on power, the horn later on can help with this though, but the eye may grant skill.

- Mixed
  - Look, to get the best of both, you're going to need to eat everyone that gives you power. But this is easily attainable. You will have to have some corruption.
  - Both of these main/meta runs are heavily defined by one major choice, and arguably the most important choice in the game, picking skill or power to fight against Michael for the first time. I will explain below as well.
- FINAL NOTE:
  - I thank you for using my remade walkthrough and I hope it helps, this is just a fresh slice of information to get you prepared for what is to come. I will explain further throughout the walkthrough about what each decision does.

## ***EVENTS HELP/"PERFECT" RUN***

*[\[CLICK HERE TO HEAD BACK TO THE TABLE OF CONTENTS!\]](#)*

- NOTE: So I've seen a lot of questions asking how to get to all of the events, and I will type it down here for your convenience. THIS WILL BE BASED ON THE ASSUMPTION YOU ARE TRYING TO BE A GOOD GUY. YOU WILL GAIN POINTS PASSIVELY THROUGHOUT THE GAME, AS LONG AS YOU MAKE THESE CHOICES AND DO ALL SIDE EVENTS, YOU WILL GET THE NECESSARY POINTS. If you want a quick overview on what to do to get all good outcomes or the best scenes, follow this quick, optimal run down (I WILL MENTION SPECIFIC EVENTS OF THESE IF THEY ARE IMPORTANT):

EVENTS
Train on the first day menu (important). Also do all side events, you can catch up in the loop before the mall.
Fight and eat the goons.
Choose full strength against Michael.
Take the horn.
During the training events, you will fight a stronger minyak, pick to kill the servants first, then engage it indirectly.
Choose to fight close range against Laurie.
Choose to cut out the mark with Xanthe so you don't lose a skill point.

Choose to sit and take it against Tiffany.
Choose to go left to meet Algaecwif. From there choose skill. This will allow you to also save Laurie later on.

- From there, your stats should look like this before evo 3. This was mostly done as a request on how to fuck Algaecwif and save Laurie, imo this is the best optimal run:

## *MAIN STORY*

[\*\[CLICK HERE TO HEAD BACK TO THE TABLE OF CONTENTS!\]\*](#)

### DISCLAIMER:

- Throughout this walkthrough, I will attempt to give you the most optimal route(s) to gain power and skill, there are hidden values and events which I will discuss. Everything is free for you to choose, but you will miss some options and events (CHECK NOTE ON DAY 37). If you see a full choice highlighted in pink, that is the right/optimal choice. ALL SIDE ROUTES AND OTHER EVENTS NOT PART OF THE MAIN STORY ARE AT THE BOTTOM. USE THE TABLE OF CONTENTS OR “CTRL + F” TO SEARCH FOR OPTIONS OR LINES FROM THE GAME IF YOU CAN’T FIND IT. I will not put events like the news up unless they play a part in the game, you can watch them, but they are more world building tools and lore bits.
