[Online Save Editor / Save Editor Online](#)

Console – use at your own risk and pay attention to what you are doing.

Use unren to unlock it or do it manually in any `\renpy\common\console.rpy` and set `config.console = True`

General renpy code

always check the variable before you change it without =

`save_name = u''` ('name' and save again) keep in mind named save stick with you to remove it write initial code without name, or do double save before you name it – works in majority of renpy games.

`+=` add to amount / `-=` reduce it

for any girl stats , boost them when or after you meet them(don't overkill it), wont have any problems that way.

Mod (WT, Cheat,..) – Always goes to “\game” folder, unless said otherwise – read the instruction of each. Also always make sure that mods are updated to current version.

If you cant launch game for any reason and you did play some older version of it always delete “persistent” from both places “\game\saves\” and “AppData\Roaming\RenPy” (or equivalent if you are on other system). That usually solves any launch issues.

Also, if game is crashing and you are using unren console, 1st remove from \game folder both `unren-console.rpy/.rpyc` and see, if it does again. It does tend to crash games from time to time.

Man of the House on top secret ending

How to run secret ending? I don't have it in my dreams. Ashley has 5 jealous and Claire 5 suspicion

Go into Achievements general tab and make sure they are all at 100% except Number 16. if they are go to bed and think about your future another option will have opened up Check that you have all the girls pictures and videos as well

If you are missing number 9 it's the Cinema Quiz go to the cinema and get 100% in the quiz

Parental Love forbidden route

the harem and forbidden route are almost the same except that in the forbidden you choose always Ada and cum outside of the other girls

Delirium hidden ending

At the beginning of the game, when Riley lays in her bed and says "I guess... I miss Mommy." and you click on her, it activates the secret route which ignores the rest of the story. If you choose "Strawberry" at the Ice Cream Shop you'll get the Riley scene.

College Life variables

on top

use [Save Editor Online](#)

My experience:

- avoid changing anything until after you had your first classes, basically avoid editing on the first 2 days.
- increase stats up to upper threshold (9 if under 10, 19 if under 20) letting your normal interaction increase the level, for example math i just edited it to 9 than studied on laptop and got 10, than the next day i increased it to 19 and than again on laptop i increased it to 20

- do not add points to massage unless massage is visible in your player menu (not sure if it affects anything but be warned)

Game got integrated wt

Choices highlighted "Red" gain respect point 2

Choices highlighted "Blue" gain disrespect point 3

Choices highlighted "Pink" gain affinity point with character 1

General hint. Be honest with The Rogues. Be nice or generous with the girls.

As a general rule, for the most/best content, go for the following choices, in priority order: pink choices (gain affinity with a LI/character), red choices (for gaining respect), the most honest and/or generous choices, and finally, whatever you like (your personal preference). / **play at least once is worth it, after motel** → [good guy ending](#)

Sinful Delicacies thoughts

on top

Breed between DoDes and the Gift with unavoidable scenes, immature-rapist mc and no dreams.

1 path with game endings on decisions, no real choices in game, no option to skip things too, like all the scenes of aunt Stacy sucking dicks, 1st lewd scene is her with black dick in her mouth and is not the last, he got his way with her too at end of s1 and yet there still is no tag. Also not only one you have to watch with others and have some after. Writing is on verge of boredom drags hard, too many internal monologues and screaming, like listening kid 1st time seeing boobs and cant stfu. Too much simping and drolling also everyone are too gullible. – **I don't recommend**

Hot Sand of Antarctica console

on top

Good story, graphic, game got no wt, there are other ppl fucking each other at start (opt) but non are li so far and game got no tag 🐣, if you don't want to watch that mind whom you leave where. Otherwise test choices cause outcomes matter for lewd. You can pretty much skip every lewd scene. Drink wine in spot when got choice +1 lady and future baby.

Lewd Island decisions

on top

1st Game got unavoidable sex scenes with others fucking - you get bj after, they are happening after you get picked up.

2nd sex scenes got multiple variation and outcomes where you cum in or out(effect on endings) so test them all

endings choices that matter

1st choice whether tell her about gun or not, it doesn't matter only thing that does is that you [don't peek](#) or is game end.

2nd if you don't [intervene](#) you got no chance of Camila endings, also path to bad end (don't completely ignore Camila), see both tho for D scene, it doesn't effect the ending, if you have sex with her or not after got no memory and you get only fap scene in morning, but if you don't intervene there is effect on endings.

If you don't intervene only choice to avoid bad endings is to [stay with C](#), [if no kiss](#) opt there is no good endings at party path.

3rd if you [kiss Camila](#) you are set for her ending and don't see D ones, so kiss C or don't D endings after you go for office

4th [go to office or party](#), where endings split, both got 4 endngs, for 7 endings you can [tell truth](#).

For office doesn't matter what you pick, only thing that matters whether you [kissed Camila or didn't](#), C/D endings x2 choices.

For party unless you have completely ignored Camila (bad end) you get [2 endings to pick](#)

5th and for last ending you have to [intervene](#), I did tell her about [promotion](#) (not sure if matters), [stay with C](#) (not sure),

[dont tell truth](#) (matters most), [kiss Camila](#) (ofc sex included in all kisses), [go to party](#) and [arrest him](#)

Reclusive Bay console	Ending choices on top
inv.money = clock.time = 0(Mor), 1(Noon), 2(aft), 3(night) - all you need clock.isMorning = True/False clock.isNoon = False/True - 1 True , rest False clock.isAfternoon = False/True clock.isNight = False/True Players_Energy_Points = 100 hacking.available = lockpicking.available = name = Cascade, Lily, Paige, Leah, Vivian, Eve, Summer name.RS = name.SL =	one of three things will happen during the final warehouse fight: 1. If you dodged Lily's dad's question earlier in the story (while visiting Lily's parents, he asks "Like what?" when Lily mentions there's a lot going on), and you yourself got shot , Paige will die. 2. If you dodged Lily's dad's question, and you didn't get shot (where you had the "chance" to), Lily will die. 3. If you didn't dodge Lily's dad's question, Rebecca will die. For death only thing that matters All depends on two specific choices: whether you dodged Lily's dad's question about things going on, and whether or not you got shot during the break-in with Paige.

Monolith Bay info

Before you start the game make sure that version you have got at least P membership cheat code, cause playing without it is grindy as fuck. Few things also to keep in mind, game got no rollback, you can save only when you go to sleep and there is no proper guide for it so you got no clue what you are doing most of the times, will they love it or hate it is anyone's guess, only thing that got on it is unlimited save slots that you can name.

Another thing to keep in mind even tho [dev](#) claiming its harem game, but you can invite only 1 girl to live with you and only 1 can get pregnant per game. For quest tracker only maybe half of em show there so you better read and remember the chat. And decisions as girls goes are already locked for ending, even tho game is not finished.
