Somewhere I Belong

By Mr. Baker

https://www.patreon.com/Mr_Baker95

This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlight elements, not influence your decision. There isn't a right or wrong way through the game, only **you** should decide.

Only decisions that have an impact on the story or your character are shown. There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

Legend

Character and game related attributes that can be increased/decreased (i.e.: a number value) will be represented with an icon followed by the character/description name:  **Bubu** or  **Bubu**

More complex values will be written as text instead:

girls kissed +20

Reference to these values will reuse the same icon or text:

Bubu  is at least 5

girls kissed is at least 25

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this:

 *Granny*

grandmas kissed +20

Icons

: +1 love point

: -1 love point

: +1 trust point

: -1 trust point

: +1 desensitized point

: -1 desensitized point

: +1 kill

Flow Symbols

Skip until the next section

Decision labels

When something you do can have an impact later on in the game, a label will be visible where it happens like this

decide something #123

In some rare cases decisions can be reversed, to distinguish it more easily the label will look like this

did not decide something #123

References to this label will also include the same number

so it is easy to track it down to where it happened (could be multiple places).

decided something #123

Some decision labels can denote a progression and sometimes we must check if the current value is above or below a certain threshold. To keep it succinct, all accepted values will be listed in brackets.

For example let's define some karate belts and assign each one to a numerical value:

0 ⇒ white belt #78, 1 ⇒ yellow belt #78, 2 ⇒ orange belt #78

If in the code the condition checks that the value must be at least 1 (`karate_belt >= 1`)

It will be listed like this: **karate belt: [yellow, orange] #78**

While the game is being developed, decisions that do not impact the story (yet) will be displayed like this:

agree #55

Reversed decisions that do not impact the story (yet) will be displayed like this:

did not agree #55

Check the last page of the walkthrough to learn how you can use the developer console to cheat alter their value for your benefit: [\(link\)](#).

Enjoy the game!

♥ *x50 Anais*

D-Do you like it?...

• I love it

Scene #1

Cute voice, I'm not that heavy, am I?

• You are perfect: ♥♥ *Anais*

• Your body is amazing! ♥♥ *Anais*

• Don't say anything

• I'm not in the mood today Anais (Avoid)

avoid Anais #1

Scavenging

She rakes her stare down the length of your body, sizing you up. Without a care in the world, her gaze lingers on your crotch for a few moments before meeting your eyes again.

• Wink her: ♥♥ *Martinezi*
wink at her #2

• Do nothing

(She has a strange accent you've never heard around here before.)

• Ask about her accent: ♥ *Zoeyi*

• Ask about where she is from: ♥♥ *Zoeyi*

• Don't ask: ♥ *Zoeyi*

For some reason, you're not sure whether you should tell her the truth about what happened to Jason and Ryan.

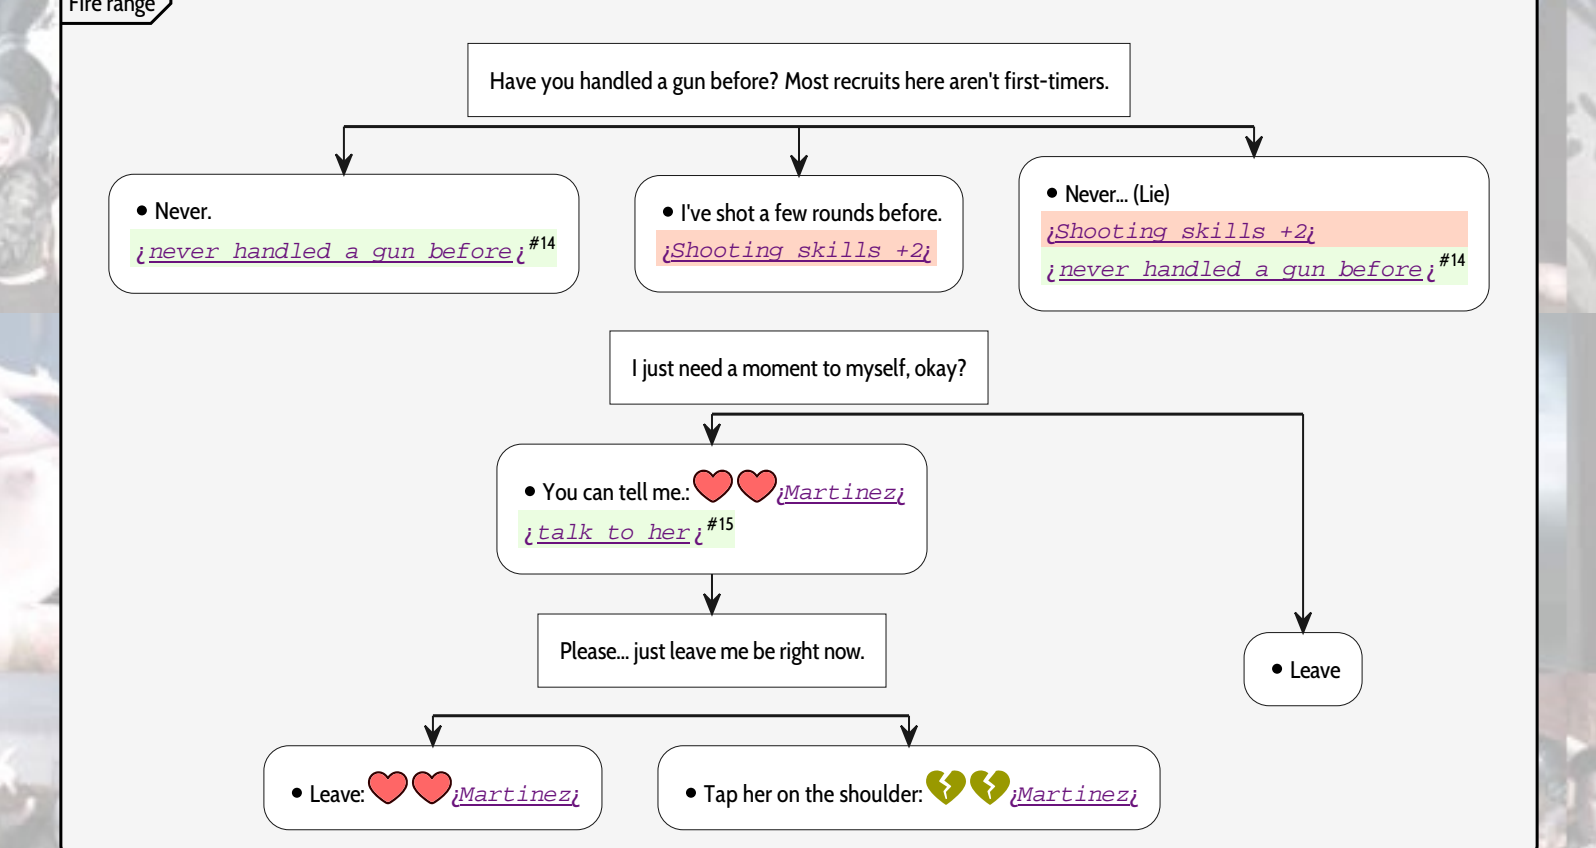

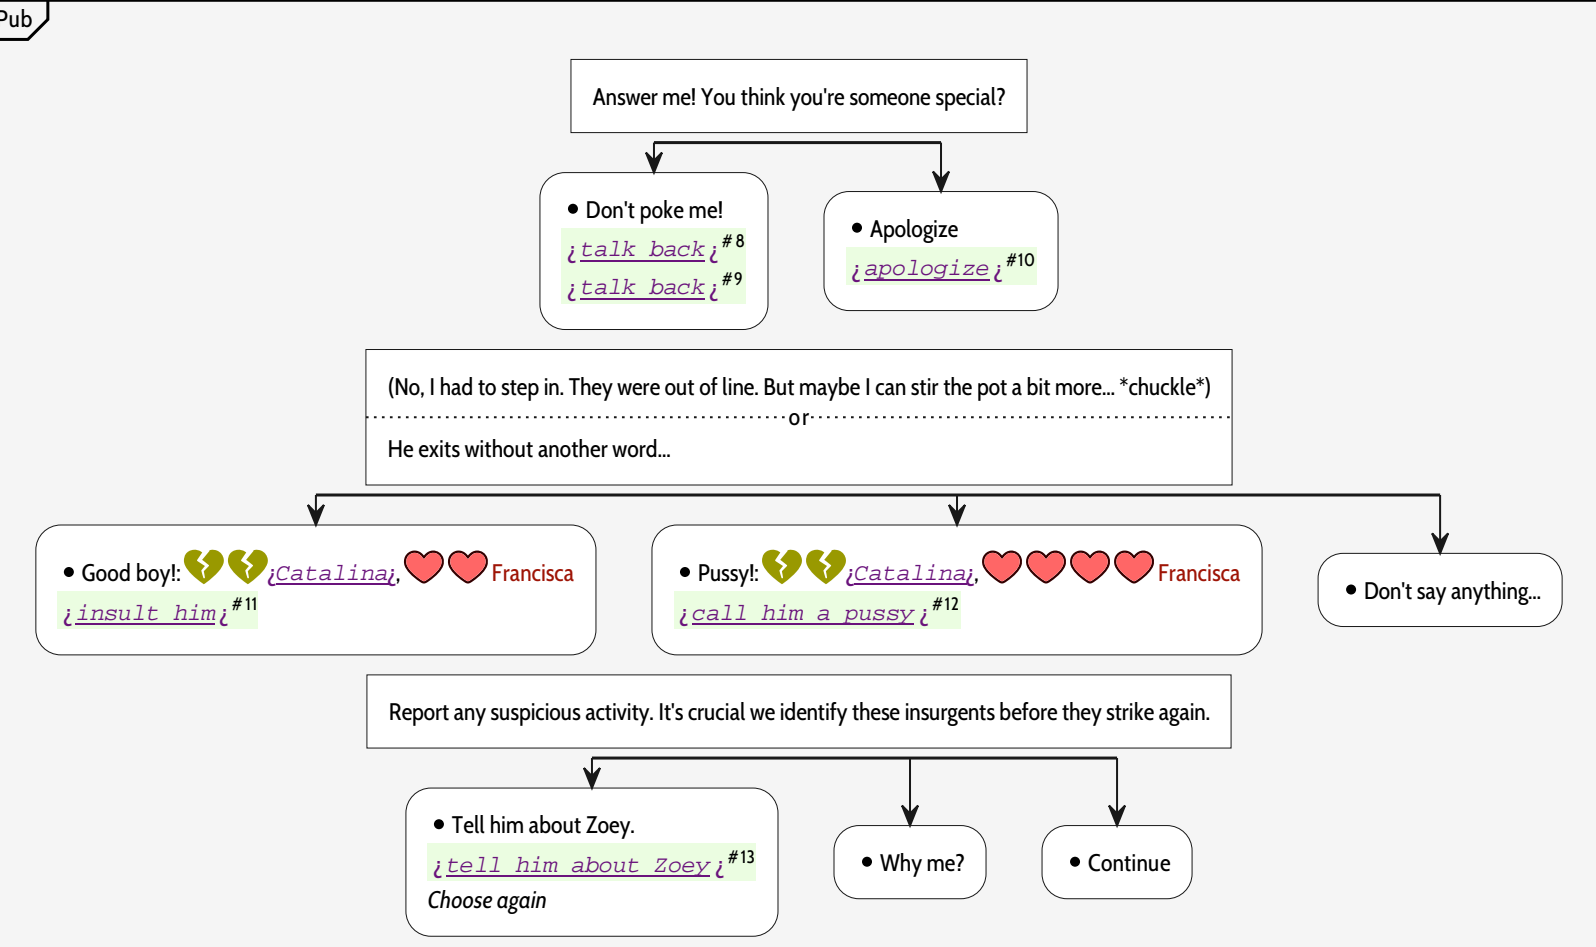

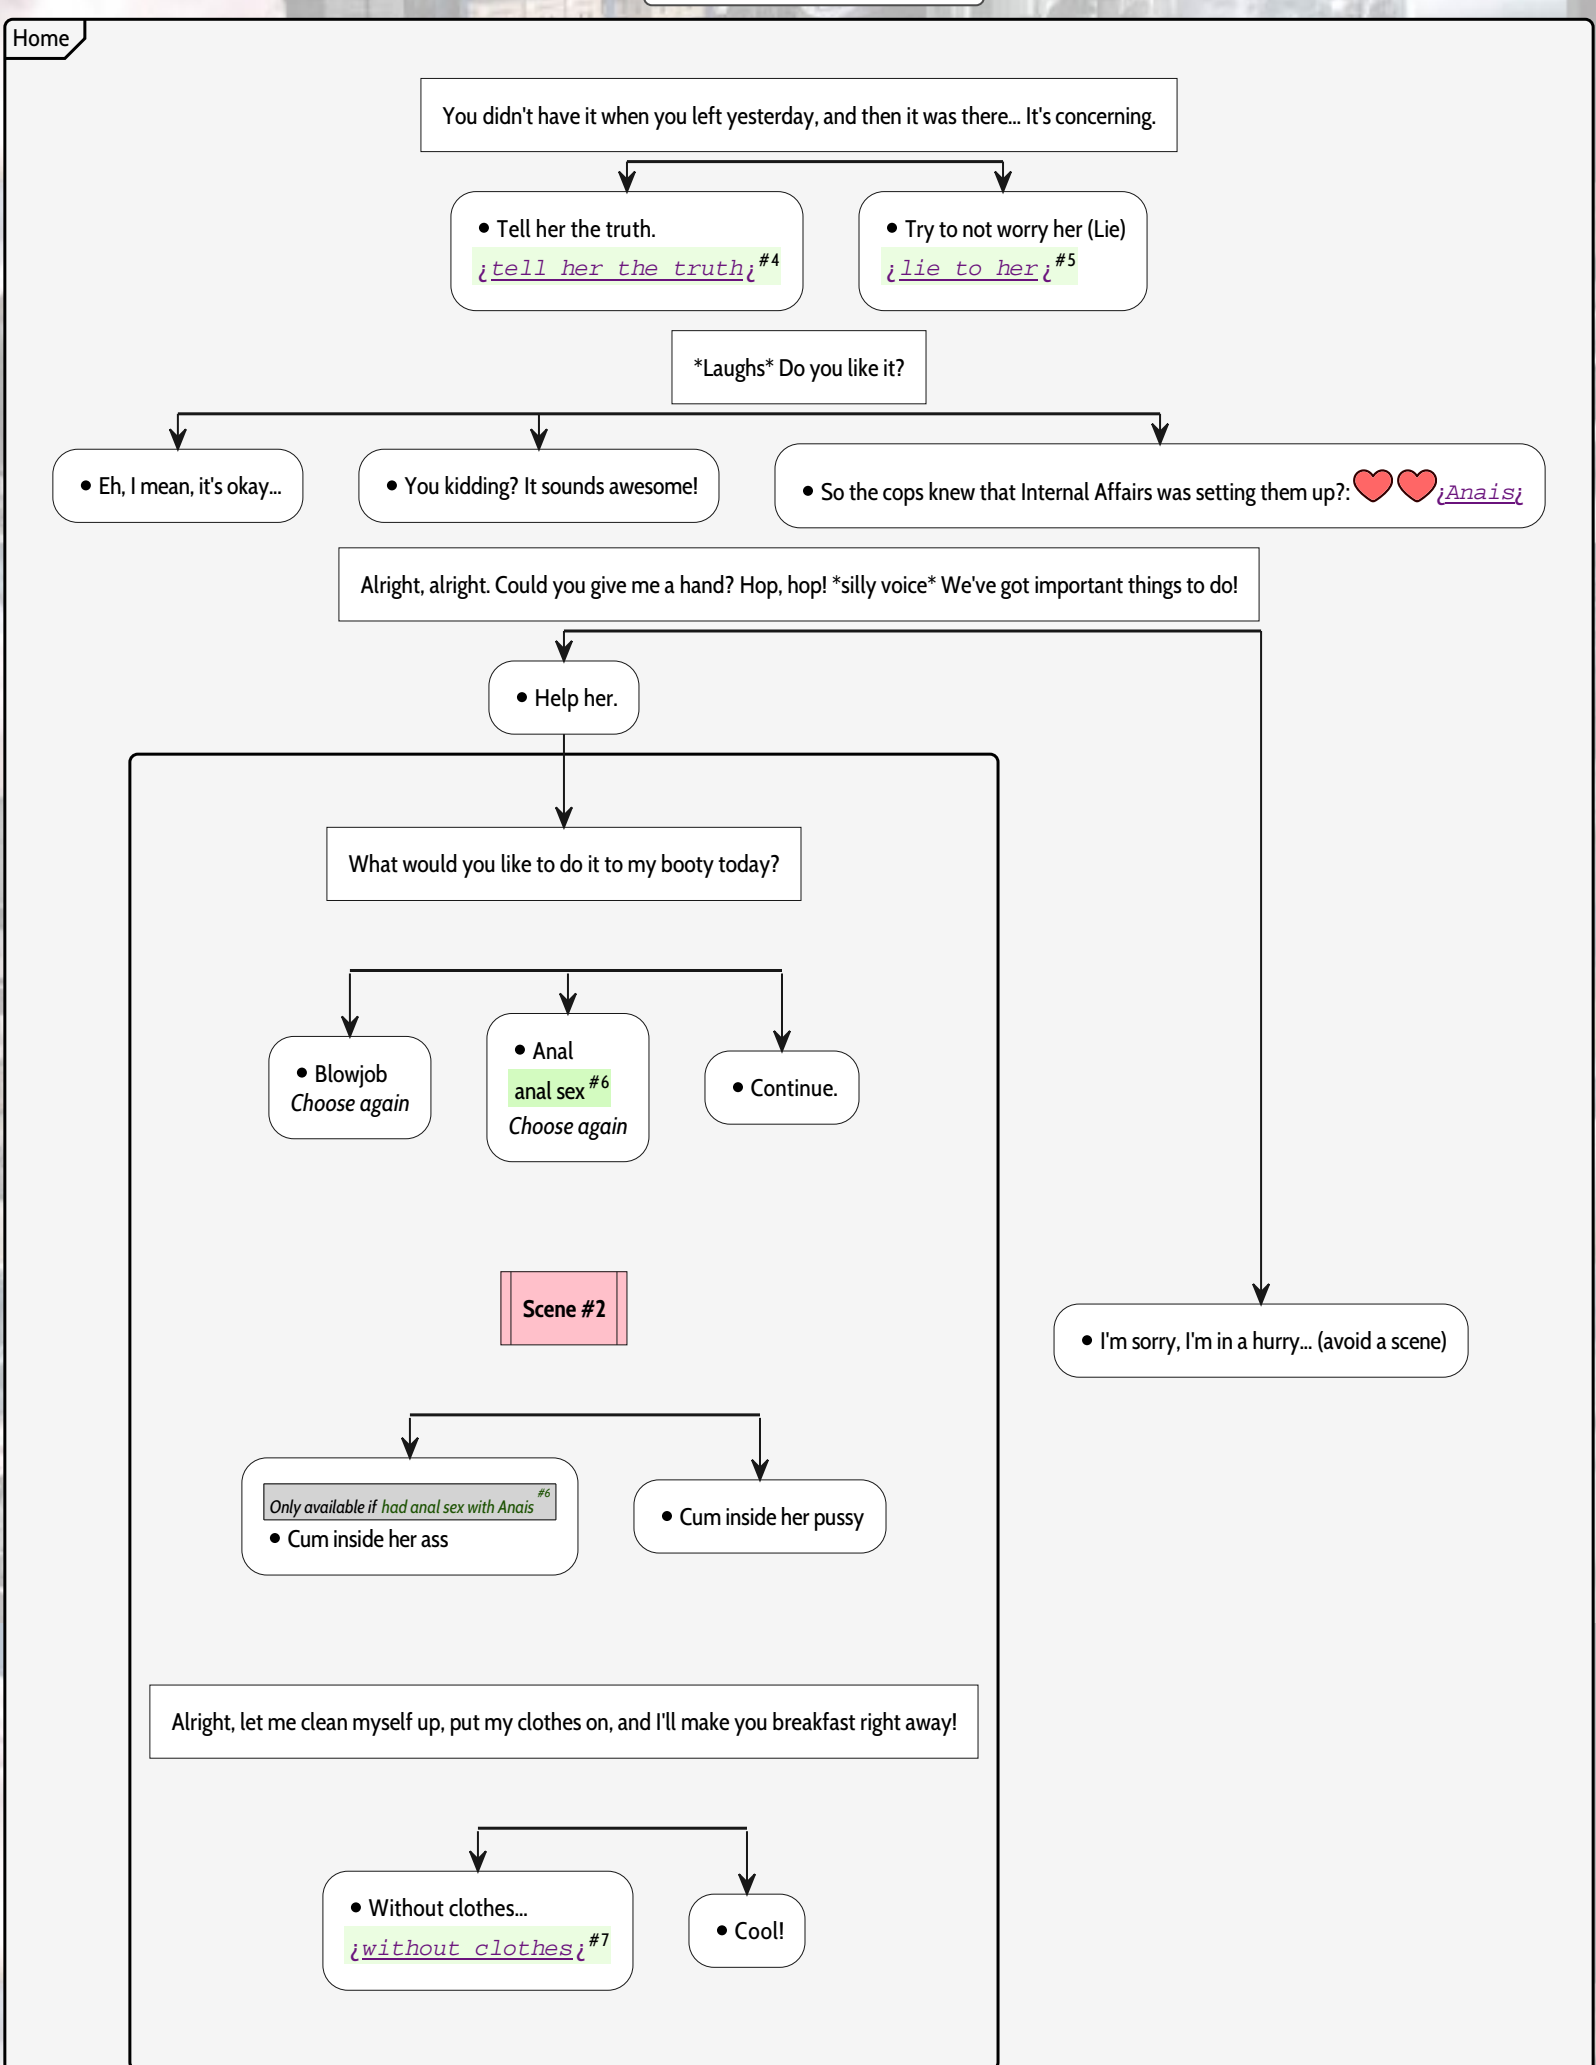

• Tell the truth: ♥ *Zoeyi*
tell her the truth #3

• Continue.

Walkthrough rev 1.0**

Cheat without a MOD

So you want to try out a new branch but do not feel like completely starting over a new game?

Don't worry, with the developer console you can easily modify in-game variables.
You only need some basic understanding of scripting.

The easiest way to enable it is to use the Universal Ren/Py Mod from Ox52.
Download it from the webpage: <https://Ox52.dev/mods/Universal-Ren-Py-Mod-1000>, then unzip it and drop the rpa file in the game folder.

(Re)Start the game and load a savegame, type ALT+O (Hold the ALT key and type the letter O) to open the console and use the ESC key to exit

Character variables

variable: The variable
definition: what it represents
set variable / new value: what to type in the developer console to turn the variable on or set a new value
unset variable: what to type in the developer console to turn the variable off
check current value: what to type in the developer console to check the current value

variable	definition	set variable / new value	unset variable	check current value
abigail_stats.love	Abigail love points	abigail_stats.love = value		abigail_stats.love
anais_stats.love	Anais love points	anais_stats.love = value		anais_stats.love
catalina_stats.love	Catalina love points	catalina_stats.love = value		catalina_stats.love
claire_stats.love	Claire love points	claire_stats.love = value		claire_stats.love
cyan_stats.love	Cyan love points	cyan_stats.love = value		cyan_stats.love
francisca_stats.love	Francisca love points	francisca_stats.love = value		francisca_stats.love
martinez_stats.love	Martinez love points	martinez_stats.love = value		martinez_stats.love
santiago_stats.trust	Santiago trust points	santiago_stats.trust = value		santiago_stats.trust
zoey_stats.love	Zoey love points	zoey_stats.love = value		zoey_stats.love
desensitization	desensitized	desensitization = value		desensitization
killcount	kill count	killcount = value		killcount
rodriguez_gang_reputation	Rodriguez' gang reputation	rodriguez_gang_reputation = value		rodriguez_gang_reputation
shooting_skills	Shooting skills	shooting_skills = value		shooting_skills

Game Decisions Variables

label: The label as found in the walkthrough
set variable: what to type in the developer console to turn the variable on
unset variable: what to type in the developer console to turn the variable off
check current value: what to type in the developer console to check the current value
