

Tip: When you ask Girls to follow you, they will show on top left companion window. If the companion window is Black and White you can't do anything on that map but if it is colorful, you can click it to trigger an event relating to that map, Sleep with her, lesbian, threesome event, prostitution,BDSM, according to the map they are on

Use Skill points to unlock skills and Special Skills you can gain skill points by leveling up the player, should unlock all the skills at level 10

General doubt -  
 1) If your progress with a character is passed level 4 and you didn't get option to choose slave and love route, please make new game file, as you're on really old save.  
 2) You're playing the minigames but the character is not progressing... that means more content for them will be added in future updates. You can check [Patison](#) or [SubscribeStar](#) to get the latest version which is generally 2-3 version ahead of Public release.
