Little Devil Guide

This is a guide for **Little Devil**.
This guide will contain SPOILERS

ACT 1

After starting the game and going through the opening cutscene walk south out of the **Oasis** into the forest. A scene should play about a rock being placed at the entrance.

After that scene head east and interact with the fox wizard, he'll give you a quest about collecting wood for him.

The first piece of wood is directly east of where you spoke with the wizard.

For the second head east again and then south and you should find the next piece of wood on the path.

The next will be a little south of the last.

Next will be east again just a little while away.

If you continue in that direction you'll find the last piece.

Head back to the wizard and he should give you a mushroom that will allow you to get to the mushroom village. To get to the mushroom village head back to where the last piece of wood was located and head east then north. Talk to the guard and he should allow you inside.

Once inside the village head to the middle of town, once in the middle there should be a bridge north. Head north up the bridge into the mushroom village leader's house.

Once inside talk to the Mushroom Leader and he'll give you a quest to get back his **Bag of Truffles**.

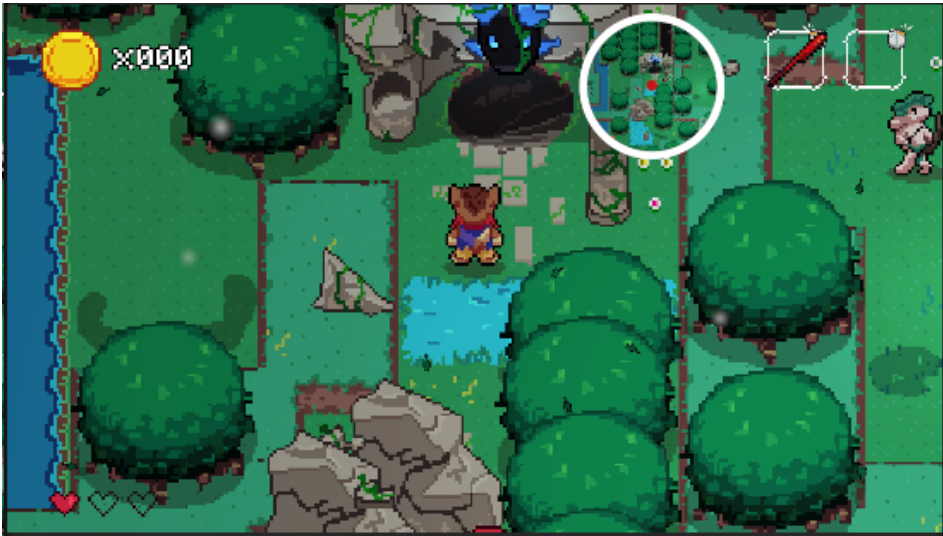

To find the bag of truffles head back into the forest and head all the way west. You'll encounter an area that has a bridge and a river. Head over the bridge, south, then over the second bridge, and talk to the Kobold Leader. He'll give you the Bag of Truffles.

Once you have the bag head back to the Mushroom Leader and he'll direct to go to the **Ruins**. To get to the ruins head back in the direction of the kobold leader but after you cross the bridge that covers the cavern, head north and then east.

You should encounter another bridge, cross it and a cutscene should play with **Nictis**. After his cutscene head into the Ruins.

Once in the Ruins head west and you should find a key on the ground. Pick that up and head back to the starting room. (The Dodging Monkeys cannot be defeated without the fist).

Head north, west and then north again, you should reach a room with a locked door. Head north again and pick up the second key.

Once you get the second key head back to the room with a locked door and enter. Fight the slime mini boss.

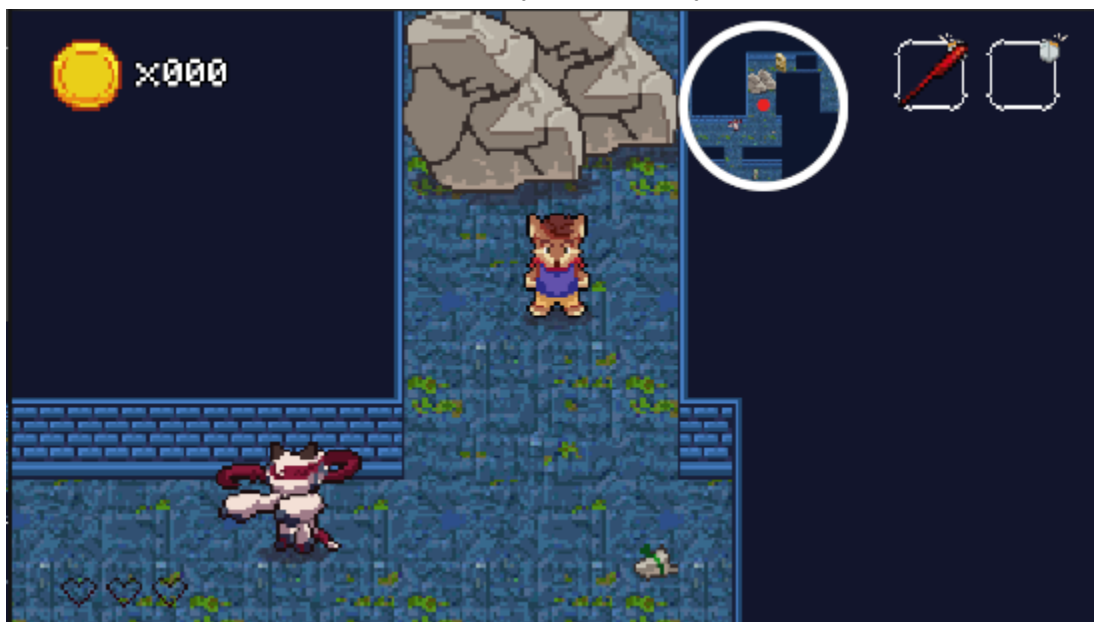

Once you defeat the slime mini boss head north and open the chest. You'll get the fist weapon, with the fist weapon you can break through rocks so break through the rock directly to the west.

Once you break through the rock head back into the long hallway and unlock the second door, head west into the room and you should encounter another smaller room with a second chest. Open this chest and you'll receive the boss key.

With both the fists and boss key head back into the hallway and head east, then north, you'll encounter some rocks, break those with the fist, and the golden door should be able to be opened by the boss key.

Once you enter the room another cutscene should play with Nictis. And the fight with him should begin. To beat Nictis you must first dodge his spin, he'll then throw a flying fist at you. You must punch the fist back at him. Doing this will put him in a vulnerable state where you can damage him, either with the sword or the fists. Repeat this until you've won.

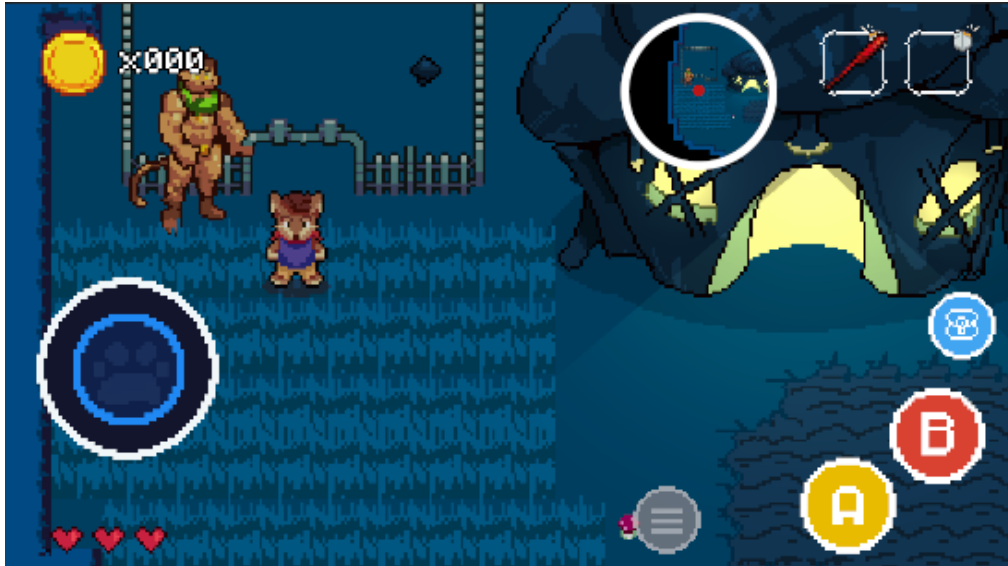

Once you've won Nictis should leave, head east, and into the room. A scene should play of Jasper freaking out. Once this is finished you can leave the dungeon.

Head back to the entrance of the first and with the fists you can punch through the rock and head into Act 2.
