

Welcome to another NLT Media Game.

This will be a hand-held walkthrough written guide. This guide will be a step-by-step guide through each of the updates of Symphony of the Serpent.

The guide will be broken down by updates and will be updated as each chapter of the game is released by NLT on the 2nd and 15th of every month.

Within each section, I will be posting a link to TDavy's YouTube video walkthrough of the update. So, that way if you need some vision aid you can watch his video of the update.

Like my walkthrough guides that I have done for ToN and TGO

The Kamasutra pages will be in Purple Text

Chests and Chest Keys will be in Gold Text

Side Girls Sex Scene and Hearts will be in Red Text

All other key items that are either given to you by characters or found will be in **Bold Black Text**

If needed I will be updating and or adding different color text for certain items as the game is developed.

This game has three different difficulty settings Easy, Normal, and Hard.

Easy = The enemies get weaker after you die

Normal = The enemies get weaker after you die 4 times, but then they get weaker slower as you win more.

The enemy's strength goes down only as you need it and then returns.

Hard = The enemies never get weaker.

The difficulty setting will also affect the hints of the game, for example,

Easy = "Go to the church"

Normal = "It's a good day to be holy"

Hard = "Someone is waiting for you in a dark quiet place"

Hard also disables some of the GPS markers

Pick up random piles of money as you see them throughout the game.

There is also an auto-save in this game, but I recommend also saving from time to time yourself. Don't rely on auto-saving.

The scene counter total on the menu within the game counts both the Main Story Scene and the Side Girls Scenes, numbers below are the current count for both.

Main Story Scenes = 10

Side Chick Scenes = 6

Total Scene Count = 16

With all that being said let's get started with Symphony of the Serpent.

Start of V.00073 (6 Scenes)

Once you have downloaded the game and installed it go ahead and open the game and click on New Game.

The opening scene of the game will be played.

Scene 1

After the opening scene is played, the MC (you) gets into a fight with two gang members. The gang members will have arrows around them that are Red, Yellow, or Green. During these fights throughout the game, you want to try your best to hit the enemies from either the yellow or green angles.

Hitting enemies from the green angles will result in damage done to them and none to you. Yellow angles result in damage done to them but also to you and red results in the enemies doing damage to you.

Each enemy will also have a number above their head, which tells you their HP (Health Points), or in simple terms how many hits it will take for you to defeat them.

As you move the enemies will move, so move around so you can hit them from either the yellow or green angles, preferably the green angles since this will result in no damage done to you.

There will be different environmental pieces that you can use against enemies, for example in this first flight a trash bag that you can kick into enemies to cause damage.

Keep an eye out for **Shield Juices** that you can pick up throughout the game. These Shield Juices will keep your HP up and prevent you from dying. You can only be holding one at a time, so if you currently have one you will not see other bottles to be picked up. So, as you use them be sure to keep a lookout for one to replace it throughout the game.

After the fight, you will faint (Supposed to happen).

You will be taken to and wake up in the hospital. You will meet the Millers along with Nurse Lucy.

It is at this point that you can choose to rename the MC or go with the given name of Ethan.

Grace will give you an **Unknown Item**.

Once you have control again, pick up your **Phone** before you leave the exam room.

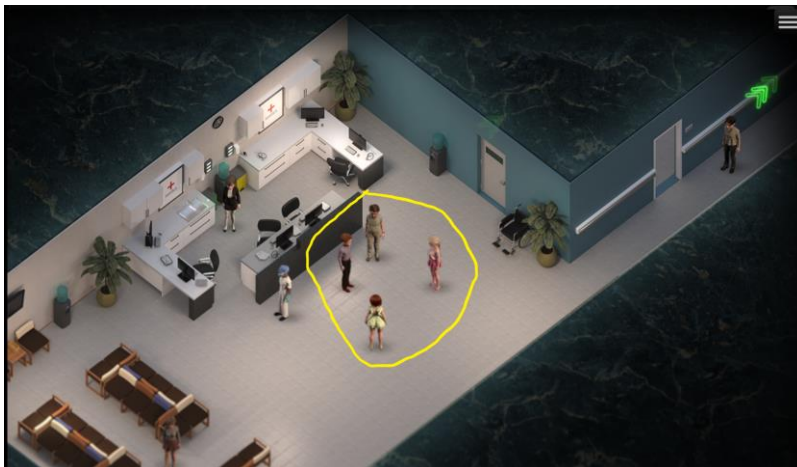

As in other games, your phone is where you can save/load your game as well as change the difficulty setting from East, Normal, and Hard if you so wish.

(Some aspects like the map and scene player are not yet ready in this update.)

Once you have your phone, follow the green arrow out of the exam room.

Once you leave the exam room follow the other green arrow down the hallway, this will lead you into the lobby of the hospital. You will see the Millers, go talk to any member of the family.

You and the Millers will leave the hospital and run into several protesters.

A Government employee named Alexander Brooks will show up.

Alexander will give you a **Business Card**.

You and the Millers will leave the hospital and head to their home in Wood Stead.

Once inside Grace and Mr. Miller will show you to the guest room.

As Grace and Mr. Miller leave, you are now free to explore the Miller's house. Leave your guest room, head upstairs, and check the bathroom (Take a Peek)

Scene 2

After peaking in, you can head back down to your room and go to bed for the night, by clicking on the bed.

The next morning you wake up and join the Millers for breakfast.

As the Millers leave for church you are free to explore.

Leave the Millers's house by following the green arrow, you will be on the map of Wood Stead.

Head to the Church.

Once you have entered the church, head straight ahead to enter the main chapel area.

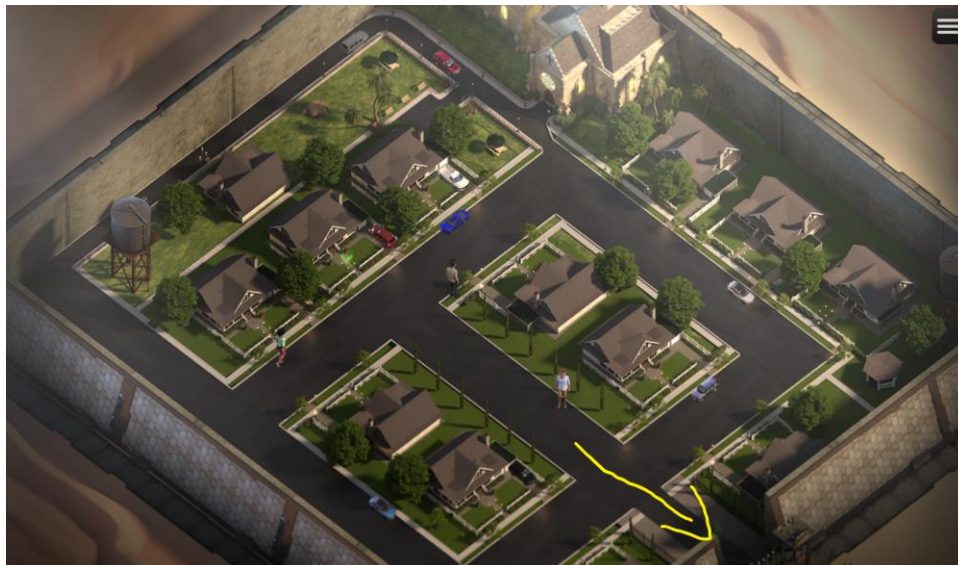

After the Millers leave, take some time to explore the church.

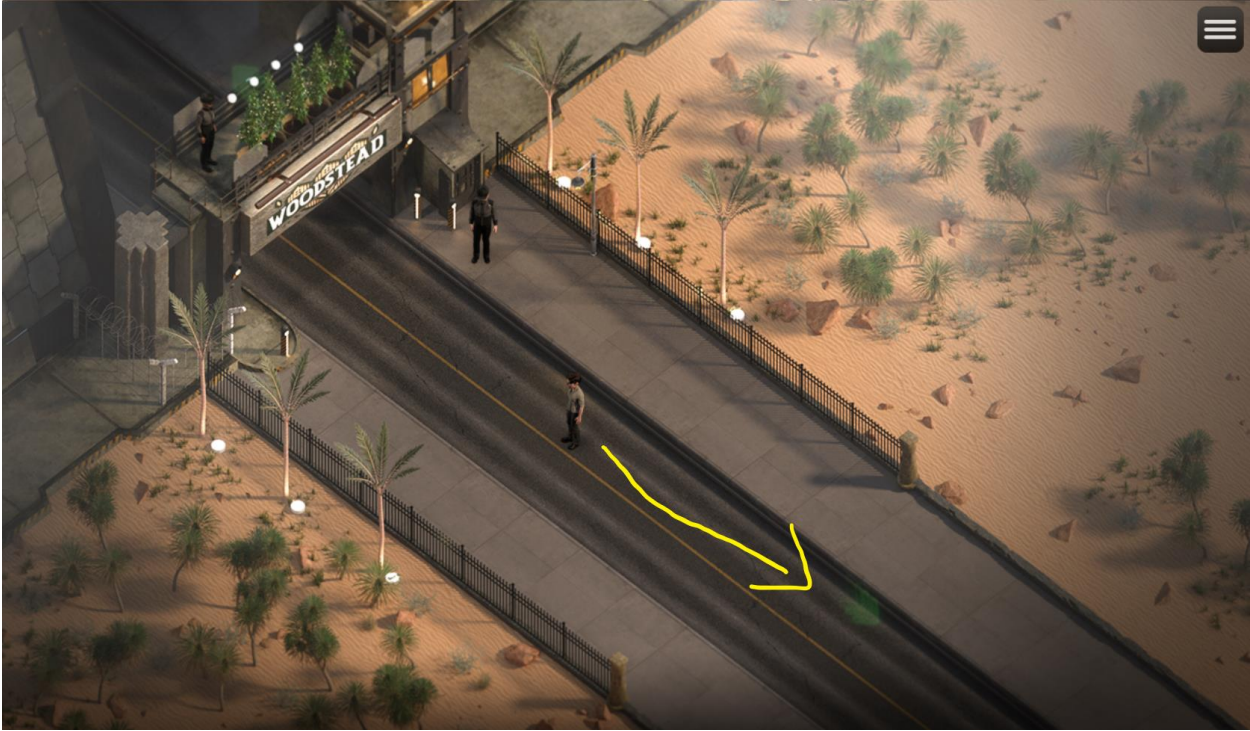

Scene 3

After meeting Mother Margaret Abbott, you can leave the church and go out of Wood Stead.

To leave Wood Stead, follow the green arrow on the map of Wood Stead.

Keep following the green arrow on this screen, this will take you to the overall world map of the game.

On the world map, you will see a green GPS marker on the Red-Light District (depending on the difficulty you're playing on, this may not be showing up if you're playing on Hard.)

Head over to the Red-Light District.

As you enter the Red-Light District, you will walk over to the area in which you got attacked.

Nia and Leila will come out and see you and invite you to lunch.

After leaving Big Tits & Food, head over to the Velvet Club next door.

Once inside the Velvet Club, you can talk to and meet Kelli (side girl).

You will also meet Lola.

Scene 4

After the dance from Lola, you leave the private room and be in the main area of the club. Time for another flight against two more gang members. (Remember what you have learned).

After the fight, you will meet Tony, he will give you a **Dump Gate Key**.

Now, leave the Velvet Club and leave the Red-Light District.

Back on the World Map, you be guided to give Alexander Brooks a call. To do this open your inventory (you can do this by left-clicking the mouse or the menu icon in the upper right corner of the game) and click on the business card that you have, you will call Alexander Brooks.

After calling Alexander, you will have a GPS marker over Amira's Mansion.

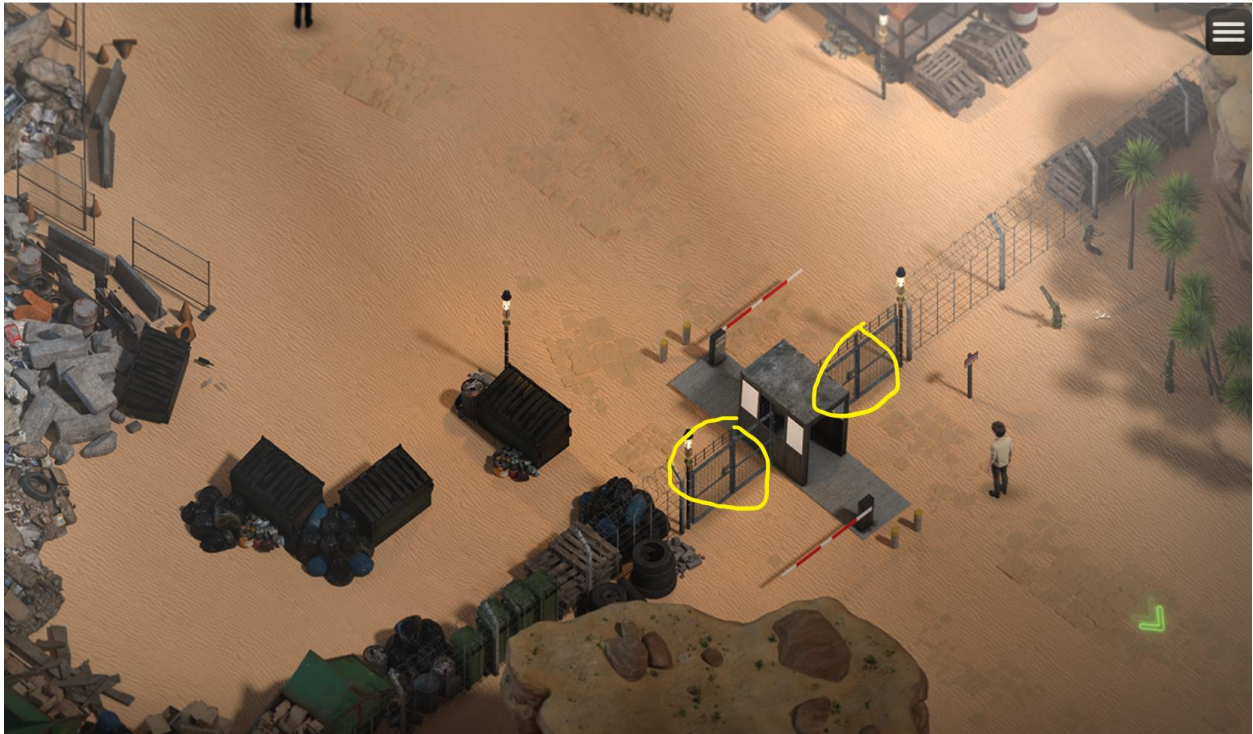

Head to Amira's Mansion.

Scene 5

Alexander will give you a **Minimum Security Badge**.

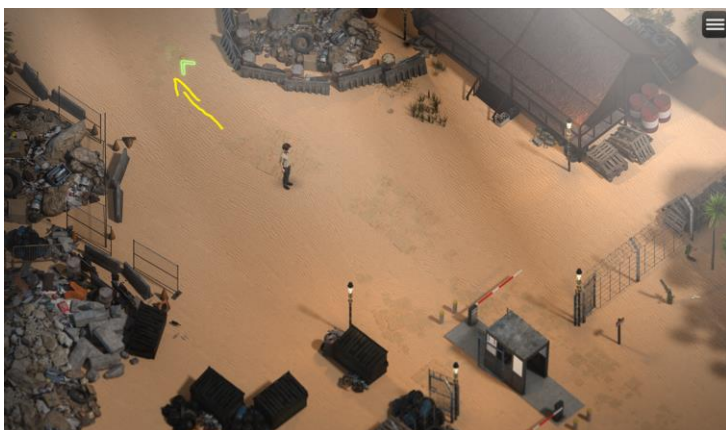

After you leave Amira's Mansion, head to the City Dump.

You have the key and the badge to open the gates.

Enter the dump and the guard will approach you.

After talking to the guard, enter the dump by following the green arrow.

The relic you have reacts to something in the area.

As you take a couple of steps into this area you automatically notice something in the scene, a **Stone Icon**, and then you learn of **Tony's Drop Box**. (Located outside his club in the Red-Light District.

Continue to explore the area. You will find some money \$20 and \$5 and an **Unknown Artifact**.

After you find the artifact, three gang members appear, time for another fight. Don't forget to use the environmental piece to help you take down the enemies.

You can use the tires to bounce on and attack the enemies from a greater distance.

After you defeat the three, a large group of enemies will appear and take the artifact you found from you.

Go after the enemies by following them deeper into the City Dump.

Pick up the **Mind**-looking icon, this will let you learn more advanced fighting techniques.

Time for another fight. You can now bounce twice on each tire to attack enemies.

After defeating the group of four enemies, you will pick up the **Unknown Artifact** again.

A larger group of enemies will appear, and you will take off running.
