<u>Chasing Sunsets</u> By Stone Fox Studios <u>https://www.patreon.com/stonefoxstudios</u>

> This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlights elements, not influence your decision. There isn't a right or wrong way through the game, only <u>you</u> should decide.

Only decisions that have an impact on the story or your character are shown. There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

### Legend

Character and game related attributes that can be increased/decreased (i.e.: a number value) will be represented with an icon followed by the character/description name: 💛 Bubu or 💔 Bubu

More complex values will be written as text instead: girls kissed +20

Reference to these values will reuse the same icon or text: Bubu is at least 5 girls kissed is at least 25

lcons

♥: +1 Love point
 ♥: -1 Love point
 ♥: +1 Trust point
 ♥: -1 Trust point

Flow Symbols

### **Decision labels**

When something you do can have an impact later on in the game, a label will be visible where it happens like this decide something <sup>#123</sup> In some rare cases decisions can be reversed, to distinguish it more easily the label will look like this did not decide something <sup>#123</sup>

References to this label will also include the same number so it is easy to track it down to where it happened (could be multiple places). decided something <sup>#123</sup>

Some decision labels can denote a progression and sometimes we must check if the current value is above or below a certain threshold. To keep it succinct, all accepted values will be listed in brackets.

For example let's define some karate belts and assign each one to a numerical value:

0 → white belt <sup>#78</sup>, 1 → yellow belt <sup>#78</sup>, 2 → orange belt <sup>#78</sup> If in the code the condition checks that the value must be at least 1 (karate\_belt >= 1) It will be listed like this: karate belt: [yellow, orange] <sup>#78</sup>

Check the last page of the walkthrough to learn how you can use the developer console to <del>cheat</del> alter their value for your benefit: (<u>link</u>).

Enjoy the game!

## Table of Contents

V	¥
• Push for it	• Don't
• Only if in an intimate relationship with Jaye	• Only if in an intimate relationship with Jaye

So you want to try out a new branch but do not feel like completely starting over a new game?

Don't worry, with the developer console you can easily modify in-game variables. You only need some basic understanding of scripting.

The easiest way to enable it is to use the Universal Ren'Py Mod from 0x52. Download it from the webpage: <u>https://0x52.dev/mods/Universal-Ren-Py-Mod-1000</u>, then unzip it and drop the rpa file in the game folder.

(Re)Start the game and load a savegame, type ALT+O (Hold the ALT key and type the letter O) to open the console and use the ESC key to exit

# Character variables

variable: The variable

definition: what it represents set variable / new value: what to type in the developer console to turn the variable on or set a new value unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value

variable	definition	set variable / new value	unset variable	check current value
num000	Jaye love points	num000 = value		num000
num002	Jaye trust points	num002 = value		num002
num001	Mallory love points	num001 = value		num001
num003	Mallory trust points	num003 = value		num003
num018	Bianca love points	num018 = value		num018
num019	Lisa love points	num019 = value		num019
num026	Tanaka love points	num026 = value		num026
num027	Jaye support	num027 = value		num027
num043	Cheating on Jaye	num043 = value		num043
num044	Cheating on Mallory	num044 = value		num044

**Game Decisions Variables** 

label: The label as found in the walkthrough set variable: what to type in the developer console to turn the variable on unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value
