

# Spooky Milk Life Guide [v0.65.4]

By RainbowStarry

I love this game, so I'm making a sorta "walkthrough" or guide to help guide you to 100% the game, fill your Candy Basket (the game's "gallery" of sorts), and have a great time *playing* the game. This guide will be separated into three sections: **Tips and Tricks** and **Filling the Candy Basket, and Completing Quests**. **IF YOUR GAME GLITCHES OUT, IT IS ADVISED TO SAVE YOUR GAME, QUIT THE GAME, AND RELAUNCH THE GAME FOR THE BEST EXPERIENCE. The game is somewhat buggy from when I've played so exercise caution for a great time!**

If any of this information is outdated or wrong, or you have any questions, make it known through the thread that you got this PDF from; I do check regularly on occasion :)

## Tips and Tricks

*Yeah so believe it or not you have to play the game to get the stuff  
I'm sure you can just look up a gallery but where's the fun in that?*

- **Getting a ton of Upgrade Tokens**

You can actually get a ton of upgrade tokens even at the beginning of the game by **running from the enemies and avoiding battle**. Afterall, getting upgrade tokens is only concerned with *clearing* the dungeon, not battling enemies. So, your goal is to get through each room as fast as possible, avoiding enemies (you'll build the experience to evade enemies in due time), and going through 3 floors. I'd be lying if I said it'll max all of your attributes in no time, but it's certainly the fastest way of doing so.

**NOTE: UPGRADING DEXTERITY AND INTELLIGENCE ALSO MAKES MESSAGES EASIER. Strength makes training faster but who cares**

- **Being overpowered**

You will need **a lot of money** and time to do this. If you have the balls to touch the Graveyard Dungeon, you'll get a ton of money, making this process faster.

Purchase materials from the merchant to craft either a **LightSword** or a **Super Gun**  
It'll make clearing enemies easier and let's you one-shot common enemies when you CRIT  
You'll also have to use upgrade tokens to train attributes.

**Priority: DEX -> INT -> STR**

Strength does increase the timing window for attacks (yellow bar), but Dexterity is more valuable as it decreases the speed of the arrow in the first place. Intelligence comes next because it pairs well with the slower arrow, letting you land more crits to potentially one shot enemies. **Dexterity** makes the arrow move slower, while **Intelligence** increases the CRIT timing window

Combining both a great weapon and great stats, you'll be able to literally one-shot every enemy before they even get a chance to attack or fuck you. You'll be unstoppable. Also you are honest to

god better off not equipping Baseball Bats / Water Guns as they don't break any important damage thresholds.

BTW you can buy pizzas that can heal you back to full or reset your milk bar. You also get a free small milk from your fridge every day!

- **Getting a ton of MONEY!**

Yes, the **Graveyard Dungeon** is the BEST way to make money off of one simple fact: Every enemy has a chance to drop "Nameless Sculptures", which sell for **\$500** each! That's a lot of money! You can do a lot of quests with that type of mula, you could even buy the merchant's VIP services (although honestly you could just leech of Raggedy Ann for that)

Also sometimes a **Thief** will roam your house, and leave a free \$101 bucks, so roam your house every night if you can.

- **Time Efficiency**

Are you a stickler for doing everything you can to maximize the day? Sure, here are some things to note:

- Both dungeons will return you to 10PM at night **no matter** when you entered it
- That means you should probably do things up to 6PM before you enter a dungeon
- The mail lady, **Deli**, only comes in the morning, so make sure to message her when you can (it'll become troublesome later if you don't)
- The **Handyman Bros.** aren't available on the weekends
- **Pizza Slut** isn't available in the morning at 9AM
- You can massage **Lizzie** (homeless lady) even at night at 10PM

- **Skipping Time**

If for whatever reason, you want to skip the day, you can hover over the top-left of your screen and left-click the time to skip forward a time period

**9AM -> 1PM -> 6PM -> 10PM**

You can also click on the Calendar near your bed to skip days ahead. This could be used if the Handyman Bros aren't available, the Handyman Bros. are building the treehouse, or you want to skip to Winter for the Christmas scenes

- **KILL BEARS**

For some reason there's a ton of recipes using String and Cotton, so make sure to battle and defeat any Teddy Bear encounters you see along the way. Trust me, it sucks to go back to grind for them. They don't spawn beyond Floor 1 in the Toy Warehouse

- **AS OF THIS VERSION:**

Don't bother with the Church and Apartments, there is *zero* relevant content that you should be concerned with. The Bakery and Playground only has **ONE** quest concerning them, so don't even bother, unless you wanna meet Morphine (Drug Dealer) on the playground.

- **Locating People**

You can find people's location by checking the Contacts app on your phone. Predominantly useful for tracking down Rori, Ane, or Missy.

- **Locating Key Items**

The Attic Key is on the coffee table in the Living Room

The Drill is in the Garage right next to the Workstation

You can get the Handyman Bros. and Pizza Slut contacts through the board outside of the Library

Wood, Paint, basically any carpentry materials can be bought from the Handyman Bros.

Quest specific items are listed in the Candy Basket section

- **Misc**

Keys in Dungeons always spawn in one of the 4 rooms in a 2x2 room orientation (image). If you're smart enough, you can estimate if the direction you're going will be a key room or a locked door route!

Don't keep money on you unless you are super OP! Losing depletes half of the money you have!

Escaping battles is never worth it, as you lose out on rewards and the timing window is too narrow.

Only one enemy can spawn in a given room. Enemies can't spawn in the Key Room and Raggedy Ann's room.

You can outrun every enemy in the game! Use this when avoiding confrontation.

# CANDY BASKET WALKTHROUGH

*The part you've been waiting for*

*Use if you're stuck or you don't want to ENJOY A GAME*

*Go to the Quest section if you want Quest-specific guides instead*

This list will go in order that the Candy Basket lists as so. Each scene will be highlighted differently based on how hard they are to find, and not how difficult they are.

**Likely** - You'll probably get it through regular or easy-to-follow story progression, easy

**Eh** - You might have to dig around to find what you need, not as easy/you aren't informed

**Bruh** - You have to go out of your way to get this; you probably won't find this on your own

I won't list unlisted Massage scenes, they should be self-explanatory where to find them.

FOR SPOILERS SAKES, I won't name the listed Candy Baskets scene. The scenes are ordered by their order in the Candy Basket. Happy hunting!

*Fun Fact: You can speed up the milk bar during H-scenes by pressing the speedup button a ton! You're probably a bummer tho :P*

## **Want to do quests/candy baskets on your own but a tad bit confused?**

- **Reading dialogue is a good way to grasp what to do, GO FIGURE! Use the Backlog App if you missed any dialogue.**
- For some quests, all you have to do is let time pass or pass the day, a notable example being Rori's quest with the Good-Hooker when the Quest app says ??? or during the "Good-Hooker is gone?" section.
- "Get close to x" sections means to raise their Love-meter or whatever by massage or gifts. Dildos are an easy free 20 but if you have something you think they might like, you'll get a free 30/35 instead!
- Some people can't be gifted, so you have to do Massages instead. Raise Dexterity and Intelligence stats to make this easier. Also do them during downtime so you don't have to later
- You can't raise Ane and Missy's Love-meter or whatever unfortunately. Despite this, Missy still has H-scenes.
- Some quest items in shops only come into existence when you're in the quest or have completed a quest, same with dialogue options, so look out for them!
