Mini-games – How to play them

This section will guide you through playing the new mini-games for Season 3 of Being a DKK. It will not show the solutions to specific mini-games. If you want to beat a particular mini-game, read the walkthrough section for that episode.

Drawing mini-game

In the drawing mini-game, you need to click the blue dots as fast as possible while avoiding the red dots. Your final rank is based on the time it took to complete the mini-game and how many red dots you touched. You need to avoid all red dots and finish clicking all blue dots faster than 10 seconds for the best rank, S rank.

Party Planning mini-game

In the party planning mini-game, you plan parties by choosing activities, managing a budget, and buying and placing items. Your goals are to satisfy as many **needs** as possible for the DIKs and to get a high score and party rank.

Much like the mansion mini-game in Season 2, your choices affect the story, and your progress is cumulative for future party planning mini-game rounds. Early choices affect how you play the party planning mini-game later.

You can play and win the mini-game in countless ways, and this section will present the basics. Refer to the episode guide if you want tips on achieving the highest rank for each party. Please note there are random elements to this mini-game, making it impossible to write a guide tailored to your particular playthrough. However, you can throw amazing parties in no time by learning general tricks.

The playing field

DIKs are placed on a grid and the empty boxes surrounding them are used to fulfill their **needs**. The DIKs have different **needs** and you need to optimize the use of the empty boxes to fulfill as many of their **needs** as possible.

Click any DIK to see their **needs**.

The **needs** represented by icons show which items and how many of the items they want to be surrounded by. Place items in the adjoining boxes to fulfill those **needs**. The **need** at the top, represented by text, is a special **need** you can fulfill using the entire grid. For the special **need**, read the text and place items anywhere on the grid to satisfy it. Sometimes, the special **need** requires you to avoid placing a certain item on the grid.

You can also see the DIKs' happiness by clicking on them. There are four levels of happiness: Disappointed (<25% happiness), Neutral (<50% happiness), Happy (<75% happiness) and Very Happy ($\geq 75\%$ happiness).

The right part of the interface shows your item inventory, party activities, scores, and budget.

The numbers below the items show how many items of that kind you own. If you need more items, you have to buy them by selecting the item and clicking the Buy button at the bottom right of the screen. Buying items will deduct money from your budget. You have an endless amount of Guests and Supplies, and they don't cost money to use.

Activities		
I	Body Shots (\$2)	<u>Beer Battle</u> (\$1) Nothing
II	Scary Stories	<u>Haunted Mansion</u> (\$2) Nothing
III		<u>CUM-petition</u> (\$5) Nothing

The activities give special events during the story. Some activities are free, but most cost money. They are all the same regarding scores, but they also give minor happiness boosts to some of the DIKs. You should always choose as many activities as possible to maximize the score. The activities can give you a boost in the final rank, too, if you prioritize them.

Money: \$20

Multiplier: 1.25x

Score: 0

Drugs

Buy \$4

Sell \$4

The party budget starts at \$20 for your first party. The party budget will differ depending on the party, and excess money isn't saved between parties unless

you have the “Below Budget” perk. Make sure you fully utilize your budget for every party.

The **multiplier** is used to multiply the score for each party. The higher it is, the higher your score and party rank will be. The **multiplier** will increase for every **need** you fulfill.

The score shows your total score for all parties. Each party has an individual score shown after the party has taken place.

Each party will get a party rank, depending on your score for that party. The different ranks, ranging from lowest to highest, are F, E, D, C, B, A and S.

How to play

To play the mini-game, start by selecting the activities you want for your party. Locking these in early ensures you don't run out of money for them. Although possible, you are not advised to skip activities for your parties.

After that, click each DIK on the grid to see their **needs**. If you see DIKs who share **needs**, if possible, plan to put items in boxes that are next to both DIKs at once. That way, you will optimize the use of the grid, as free boxes on the grid are valuable and will be an issue you have to plan around. Sharing items also gives you an efficiency bonus, increasing your overall score.

When you find a **need** you want to fulfill, click the corresponding item and place it on the grid. Some items need to be activated by Supplies. Read the information box at the bottom right after selecting an item to see if you need to activate it.

Place the item on the grid, and if you have to activate it, place the correct supply next to that item.

The following dependencies exist:

- Beers, Liquor and Kegs need Cups to activate
- Food and Snacks need Trashcans to activate
- Speakers need Music to activate

When the number of items needed for a DIK is met, his **need** is fulfilled and a green dot will appear on his avatar. The fulfilled **need** will be shown in green text. In this example, the need for 1 Liquor has been met, and the Cups supply activates the Liquor.

If you wish to remove an item from the grid, hover and click it. Please note that you can undo purchases. For example, if you bought one beer but later realized that you don't need it, you can sell it and use that money to buy something else. You cannot sell items from your permanent item inventory. The items from your inventory that you can sell are colored green.

When satisfied with your item placement, press the X button at the top right to close the mini-game and continue playing.

Item inventory upgrades

Your inventory shows how many items you will start every party planning round with. At the start of the mini-game, you randomly get three different starting items. Between parties, you get to choose two items to upgrade. Upgrading an item increases its free use by one. A smart strategy is to ensure you have one of

each item early on and later focus on upgrading expensive items or items you think will be in high demand. There is no way to predict what the next party planning round will bring you in advance, so it's best to have a broad approach and not focus too much on upgrading one item type.

Perks

There are 12 different perks to choose freely from between party planning rounds. You get to select one perk per round. The perks offer different advantages and cater to different playstyles.

The top row offers three perks that allow you to place Beer, Food, or Liquor without any extra required items for activation. The good thing about these

perks is that they will save you boxes on the grid when placing the related items. Empty boxes on the grid are valuable and having them makes it easier to fulfill more needs.

The second row offers three perks that reduce the cost of the three most expensive items in the mini-game.

Connections	Wholesale	Black Friday
Reduces the cost of  by \$3.	Reduces the cost of  by \$3.	Reduces the cost of  by \$2.

The cost of the items before and after activating their respective perk are:

- Drugs \$4 → \$1 (With the Connections perk)
- Kegs \$5 → \$2 (With the Wholesale perk)
- Speakers \$3 → \$1 (With the Black Friday perk)

The advantage of this is that you will spend less on these items, allowing you to spend more on other items and activities. A smart strategy is to get the perk of which item you aren't planning to upgrade the free inventory. For example, if you have 3 free Drugs in your permanent inventory for every party, getting the "Connections" perk won't give you the same benefit as getting another perk since you likely don't have to buy a lot of Drugs for the party.

The third and fourth rows have perks that affect your score, happiness and budget.

Crowdfunding	DIK Party	Easy to Please
Increase the party budget by \$4.	50% extra bonus score from activities.	Receive 20% extra Happiness points for each fulfilled need for every DIK.
Hard to Let Down	Multiplier Madness	Below Budget
Unfulfilled needs lose 20% less Happiness points for every DIK.	DIKs with at least 50% Happiness add an extra 0.1x multiplier.	Save up to \$5 for the next party budget. Excess money is lost between parties.

The “Crowdfunding” perk increases your budget for each party by \$4. You get the most use for this perk by choosing it early on, as you get \$4 extra for every party, regardless of the party budget.

The “Below Budget” perk is better left for later, as your leftover money will likely be low during the first parties. As soon as you get leftover money when planning a party, consider choosing this perk to save that money for the next party. If “Crowdfunding” and “Below Budget” are active and utilized simultaneously, they can collectively offer a whopping \$9 extra for your party.

The “DIK party” perk increases the bonus score from activities by 50%. Instead of getting 1000 points per activity, you will receive 1500 points. This is a powerful perk if you choose the maximum number of allowed activities per party. It affects your party score and party rank. Consider choosing this perk to maximize your total score and attain higher party ranks more easily. To demonstrate the power of the perk, consider that you planned a party and got a x7.0 multiplier. Without the perk, you would get an activity score of 21000 points, but with the perk, you would get 31500 points. The “DIK party” perk offers an easy way to boost your score and rank significantly.

The “Easy to Please” and “Hard to Let Down” perks affect the happiness of the DIKs. Happier DIKs give a higher score when fulfilling their **needs**. If you want the DIKs to gain happiness faster, choose “Easy to Please”. You benefit the most from this perk when fulfilling 3 or 4 of a DIK’s **needs**. If you feel the DIKs are losing happiness too fast, you can lower that effect by choosing “Hard to Let Down”. Failing to fulfill more than 2 of a DIK’s **needs** will cause less damage to their happiness. In combination, these perks become a powerful way to attain and keep the DIKs at the highest levels of happiness in the mini-game, thus increasing the score for each party. The drawback is that you have to obtain two perks to get the full effect, forfeiting two other perks.

Finally, the “Multiplier Madness” perk will increase the multiplier if you can keep your DIKs happy. If you keep many DIKs above 50% happiness, you will notice a great increase in your score attributed to this perk.

For example, if all DIKs use this perk, they will collectively give a **0.8x multiplier** increase. For a party with 90000 points and a **6.75X multiplier**, the score would roughly be 100000 and have a **7.55X multiplier** with the Multiplier Madness perk fully utilized.

The difficulty of benefiting from this perk lies in keeping the DIKs at 50% happiness or above, as anything less makes this perk useless for those with lower happiness. The aforementioned “Easy to Please” and “Hard to Let Down” perks are excellent for keeping happiness above 50%.

Happiness and Score

After each party, you get a report on how well you did.

Depending on how many **needs** you fulfill for the DIKs, their happiness will either increase or decrease. A happier DIK will yield a higher score.

In this example, you can see how Leon scores the highest individual score because he has the highest happiness out of all of the DIKs and all four of his **needs** were fulfilled, and conversely, how Jacob and Rusty give the lowest scores because of their lower happiness and lack of fulfilled **needs**.

Keeping DIKs happy will net you a higher score for each party.

The right part shows the score tally. **Fulfilled Needs Score** is a sum of the DIKs' individual scores. Active items on the grid will increase the **Active Items Score**. The **Efficiency Bonus** is based on how well you utilized the grid by sharing items among the DIKs. Having one item used by several DIKs at once will increase the **Efficiency Bonus**. The **Activities Score** will give you 1000 points per activity or 1500 points per activity if you have the "DIK Party" perk.

The sum of the scores is multiplied by the **multiplier** and presented as your Total Party Score. It's added to your Total score, representing your score across all planned parties. And finally, your Party Rank is presented. It is calculated differently for each party.

Fish tank mini-game

In the fish tank mini-game, your goal is to keep fish alive and create a thriving fish population. You do this by ensuring the tank is clean and that fish are well-fed and disease-free. You play the mini-game by agreeing to help Nick with the fish tank in episode 10. After that point, you can either manage your fish tank from the upper area of the DIKs' mansion or from the desk in your room, which unlocks shortly after the mini-game starts.

To the left, you can find the current state of the fish tank. The cleanliness of the fish tank is depicted through three different states, and a percentage shows how clean the tank is, with 0% and 100% being as **toxic** and as **clean** as it can get, respectively. The three states of cleanliness are **Toxic**, **Dirty** and **Clean**. It costs one Cleaning supply to clean the tank. A clean tank is important for the fish to stay healthy, decrease their death rate, and increase their reproduction. Aim to keep the tank in the **Clean** state to maximize the positive effects.

You must feed your fish if you want them to survive and procreate. There is an intricate balance between the parameters that can be generalized as:

- Not feeding the fish enough increases **death** and **sickness** and decreases reproduction.
- Feeding the fish too much increases **sickness** and decreases reproduction and cleanliness.
- Feed the fish as close to 1 Food per fish as possible to boost reproduction and decrease **sickness**.

It's not always possible to feed fish a perfect amount because the feed button will add 5 Food to the fish tank per click. Keep this in mind while feeding the fish, and try to aim for as close to 1 Food per fish as possible.

You can inspect how many fish you have and what type they are to the left. The **female** fish control reproduction, but you can't control how many **female** fish are in the tank. As fish reproduce, they will give birth to **young** fish. You can sell

young fish in groups of 5 for \$2. Selling **young** fish is advised when your total number of fish exceeds 100. If it does, you won't be able to feed all fish as your fish population is too big. Sell **young** fish to counter this problem as you predict it. **Young** fish will mature into **male** or **female** fish between rounds, meaning you only have one chance to sell newly spawned **young** fish.

If there are any **dead** fish in your tank, remove them by clicking the button next to them. Removing **dead** fish is important to keep a clean tank and healthy fish. It doesn't cost anything to remove **dead** fish. If there are **sick** fish in your tank, make sure you treat them with Meds. If **female** fish are **sick**, they won't reproduce, and lingering **sickness** will spread to other fish. Make sure to treat **sickness** early to keep your fish alive and well.

Your usable supplies, upgrades, and budget are shown on the right.

The Food is bought in bundles of 100 Food per \$. You can buy as much as you like, but keeping some money in the budget is advised if you need to buy something other than food in the next round. The Meds and Cleaning supplies cost \$ each and last for one use.

You can buy upgrades for the fish tank that greatly boost different parameters. However, they are expensive and cost \$10 each. Think about if you need upgrades for your fish tank and plan to buy the ones you need.

The **Air pump** gives a permanent boost to tank cleanliness. This means you have to clean the tank less.

The **Chemicals** give a permanent boost to fish reproduction. This upgrade will lessen the blow on decreases in reproduction rates and thus increase the chance

of **young** fish spawning high at all times. More **young** fish means a bigger potential to increase the fish population or to make money by selling them.

The **Props** reduce **sickness** in a **Clean** tank. If you keep the tank clean, this upgrade can almost reduce the risk of **sickness** to zero. As a result, you won't have to purchase Meds a lot.

The fish tank mini-game has a budget from which you can add or take money. For every **\$** of your pocket money you put into the mini-game, its budget increases with **\$**. The same goes for extracting money from the mini-game. If all fish die, you can only extract money from the budget.

To sum up what it's advised to do every Fish tank mini-game round:

- Clean the tank to get at least a **Clean** state (>50%).
- Remove **dead** fish from the tank, if any.
- Cure **sick** fish, if any.
- Sell **young** fish if you need money or to control the population.
- Finish by feeding the fish as close as possible to the total number of fish.

The pitfalls of the mini-game are:

- Selling all **young** fish and never keeping them.
- Forgetting to take care of the fish tank at every opportunity.
- Not having enough money in the budget to do everything you wish.
- Clicking too much when feeding them and causing them to be overfed.

Plan ahead, and your fish tank will be thriving in no time.

Math mini-game

The Math mini-game in Season 3 plays differently than its predecessor. While your character may have mastered the art of seduction, now he must master the art of deduction. The tasks in each Math class are randomized. Writing a guide is hard since your Math test will change with each playthrough, and covering all answers in this guide is not feasible – the episode 10 math class alone has over 50 different tasks and answers. This section of the guide will focus on explaining the core mechanics. The walkthrough section for each episode will discuss a set of problems and provide hints on how to solve them. Ultimately, you must use the tools taught to beat the mini-game. But with some practice, you can do it.

The grid

Your goal is to find diamonds hidden below empty tiles in a grid. The grid layout will change with every task and may include colored spheres that will aid you in the hunt for diamonds.

You must learn to count steps on the grid to beat the mini-game. Luckily, it's very simple to do.

A step is counted vertically and horizontally but never diagonally.

If you want to count toward a diagonal tile, you must count one vertical and one horizontal tile to get there.

You cannot count through space.

Only tiles whose borders you can see can be counted as a step.

Tiles that have colored spheres in them count as steps, but a diamond can never be placed in one of them. Diamonds can only be in empty tiles.

The tools

The most important tool is the diamond tool. It's the tool you use to place your guesses on the grid. You will have to place the number of diamonds that the task asks you to find before being able to click

Next and continue to the next task. To use the diamond tool, click its icon on the bottom right and enter your guess by clicking an empty tile on the grid.

To know where to place the diamonds, you must be able to deduce the correct locations - that's where the upper right box comes into play. In this box, you can read the criteria that must be fulfilled for the diamonds you are trying to find. By reading and understanding each criterion, you can deduce the correct location.

Note that every task can be completed by proper deduction. **No task is designed to involve guesswork.** If you find yourself in a spot where you are guessing the answer, your deduction must be off with some of the criteria.

You're also given the 'X' tool at the start of the new Math mini-game. This tool is meant to be a visual aid when making deductions. Use this tool to mark empty tiles that cannot contain the diamond. For example, if a criterion says that the diamond cannot be in the same row as a pink sphere, you can mark every empty tile in the same row as the pink sphere with the 'X' tool.

On top of the 'X' tool, there is a '?' tool that you can buy for \$. Like the 'X' tool, it's a visual aid tool that marks empty tiles with a '?'. The recommended use of the '?' tool is the opposite of the 'X' tool – use it to mark empty tiles where the diamond possibly can be. The criteria will be easier to handle for some tasks if you use this tool. For example, if a criterion says that two diamonds are diagonal to a blue sphere, you can mark every empty tile diagonal to a blue sphere with the '?' tool.

The bomb tool is a tool that simplifies your deduction by removing a set of tiles that cannot contain any diamond. It costs \$ to unlock and can be used for a maximum of two tasks per class. Click the bomb tool two times when you want to use it, and it will remove a subset of tiles on the grid that don't contain diamonds.

The checkmark tool is a tool that lets you check your answer in advance – it costs \$ to unlock and can be used up to two times per class. To use this tool, enter your guess for the given task and click the checkmark tool twice. The tiles marked with the diamond tool will either light up green, red or a mix of both, depending on whether you're correct. Green borders mean that you have entered a correct guess, and red borders mean the current guess is incorrect. If you get an incorrect guess, use that opportunity to rethink and enter a new answer for the task. Getting an incorrect guess with the

checkmark tool doesn't penalize your score. The checkmark tool is great when you're unsure about your answer.

Interpreting the criteria

It may seem daunting to interpret the criteria initially, but reading one criterion at a time and understanding it is how you beat the mini-game. If a criterion is too hard to understand from the start, it is advised to skip it and return to it later. All criteria must be used to deduce the correct location of the diamond. In some tasks, you might be able to solve the task with fewer criteria than all, but it's uncommon.

All criteria will state something true for all diamonds you have to find. If a condition for an empty tile breaks any criterion, the diamond cannot be placed in that spot.

Examples of criteria and how to think:

Example 1:

You've been tasked to find one diamond, and one criterion is the following:

- It is ≤ 2 steps from a blue sphere

The best way to use this information on the grid is to mark every tile three steps or more away from the blue sphere with an 'X', as these tiles cannot contain the diamond. Alternatively, you could mark all tiles one or two steps away from the blue sphere with a '?' if you own that tool.

Example 2:

You've been tasked to find two diamonds, and one criterion is the following:

- One is = 1 step from a pink sphere

This means that one – and one ONLY – diamond is exactly 1 step away from a pink sphere. Using the ‘X’ tool for this criterion is hard because it doesn’t provide any information about the whereabouts of the second diamond. It is advised to either mark every empty tile that is 1 step from a pink sphere with the ‘?’ tool or to re-visit this criterion after you’ve checked some of the other criteria.

When reading the second criterion for this example task, you get:

- They are = 1 step from each other

Now you have more information to use with the first criterion. Since one of the tiles next to the pink sphere has a diamond, you know all tiles next to those tiles can also be marked with a ‘?’. Or you can use the ‘X’ tool to mark all tiles that cannot fulfill both criteria simultaneously.

General advice

- Always read and understand all criteria.
- If a criterion is too hard to understand, skip it and return to it later.
- Use the tools; they are there to aid you.
- The criteria are always literal. If the criterion says: “One is diagonal to one sphere”, when there are multiple diamonds to find in a grid with several spheres, make sure that it is one diamond that is diagonal to one sphere only. Not two diamonds and not two spheres.
- Make sure you understand these basic mathematical signs:

$\leq$ Lesser than or equal to

$\geq$ Greater than or equal to

$<$ Lesser than

$>$ Greater than

$=$ Equal to

Science mini-game

The Science mini-game is one of the new mini-games in Season 3. The goal of the mini-game is to create a mixture according to instructions where you have to read, analyze, and carry out steps along the way.

You do all this by measuring the volume of liquids, weighing salts, mixing them with a stirrer, and boiling them with a burner. The tricky part is following the instructions and carrying out the correct step before the timer hits zero.

When the timer hits zero, your current mixture will be evaluated. You can submit your mixture beforehand if you're done ahead of time.

The mini-game has two difficulty settings, Easy and Hard. The difference between these difficulties is that the timer in Easy will have double the time compared to Hard.

The experiment

The experiment you need to carry out is listed in your notepad. Click it anytime to read the steps you must carry out to complete the experiment. An easy way to think about each experiment is that it's a recipe that you must follow. It is advised to read one step at a time and execute it before you carry on with the next step.

The experiment will be slightly randomized regarding liquids and salts to measure and weigh. Make sure you read the steps of the experiment each time you play the mini-game.

If a step asks you to measure a liquid, click the correct bottle to the left. You will be asked how much to measure, and here's where you input a volume as instructed by the notepad. Click OK and then try to stop the moving arrow in the middle of the bar – in the green zone. The arrow will move up to the top and down to the bottom. It's easier to stop the arrow when it is moving back down than trying to stop it on its way up.

If the notepad instructs you to pour the liquid somewhere, click the beaker with the liquid you measured and pour it into the instructed container.

A step can also tell you to weigh a salt. Click the correct salt and use the + and - signs to add and remove salt from the beaker. Try to aim at the exact amount of salt you need, but it can be hard to get it right as the addition and removal are slightly randomized. If you choose to be slightly off regarding the weighed amount, your chemical's purity will be penalized during evaluation. But if time is short, getting a passing result by being slightly off is better than failing.

The notepad might instruct you to transfer the salt somewhere, and you do this by clicking the beaker with the salt and choosing "Add to", followed by the location.

You can, at any time, choose to discard the contents of any container by clicking it and choosing Discard.

The stirrer is often used to mix salts and liquids. Click it to set it up. You can turn it on and off and set the desired speed for stirring. Check the notepad when to use it.

The round flask is used to boil the mixture. You can turn the burner on and off below the round flask. Clicking the round flask lets you turn in your chemical and end the experiment. You can do this at any point during the mini-game, and the content of this round flask will be used to evaluate your result.

Brawler

In Season 3, Brawler plays much like its predecessor but with key differences explained in this section. For a full description of the mini-game, read the tutorial in-game.

Controls

The biggest changes in controls are the Counter action and the **RAGE** mode.

After you dodge an attack, there's a chance that you get to counterattack your opponent. If you see **COUNTER** on the screen, press spacebar once to attack.

The **RAGE** mode is a new attack that can be devastating after getting some upgrades. Enter **RAGE** mode by selecting **RAGE** during an attack. Proceed to enter the arrow that is shown. Your **RAGE** counter is increased by one for every arrow you press correctly. Conversely, it's reduced by one if you press the wrong direction. When the timer runs out, the damage is determined from your **RAGE** counter and dealt to your opponent.

Stamina

Brawler now uses stamina for powerful attacks, special attacks, **RAGE** mode, and dodging. Your and your opponent's stamina are shown below your health bars. Your depleted stamina is constantly being regenerated, but be smart with how you use it. **RAGE** mode uses at least two full stamina bars, but if more are available, it will use those bars, too, to extend the **RAGE** timer. The opponent uses stamina to hit hard. You can use your Break attack to your advantage by temporarily lowering his stamina.

Dodging and blocking

If you can, always try to dodge an attack. Dodging is the only way to nullify all damage from your opponent's attack. Blocking mitigates some damage, but not all. If you fail to do either, you will lose more health from their attack.

Skill points and Special attacks

To grow stronger, you need skill points that you can allocate from a menu in Brawler. To allocate skill points past a certain point, you must also upgrade your skill point max level. You can allocate and respec your skill points however you wish. Power and **Counter** are smart choices for some opponents when you start leveling up. But for heavy-hitting opponents, putting a few skill points into Block might save you from losing. If you're struggling with your reflexes, Speed is highly recommended. Play around with the skills, and don't be scared to experiment as it doesn't cost you anything to respec them.

Special attacks unlock as the game progresses. After unlocking several special attacks, you can choose which one to set as active. When you're playing Brawler and see Special while attacking, use it to attack with your chosen special attack.

Beer Pong

In the Beer Pong mini-game, you try to hit your opponent's cups and make them strip before they do the same to you. The first one to hit all six of their opponent's cups wins.

The mini-game is divided into two separate phases – attacking and defending.

Attacking

When attacking, choose between three different kinds of shots. You can inspect the hit chances and action point (AP) costs anytime. You have a maximum of 10 AP to use.

- The Arc shot is the most accurate, but it costs 6 AP.
- Fastball is the least accurate, but it doesn't cost any AP.

- The Bounce shot costs 3 AP. If you hit a cup with it, it counts as two cups. It has a medium hit chance, but the added difficulty is that your opponent may swat away your ball. It's a high-risk, high-reward type of shot.

Defending

After you have attacked and before your opponent gets to shoot, you may choose a defensive action.

- Tease will lower their hit chance.
- Focus will increase your hit chance.
- Rest will allow you to recover 3 AP.

Teasing is a good way to make your opponent miss their shots, but if you only tease them, you might not gain the stats you need to win the game fast enough. Focus is a

great way to ensure you hit your shots, but beware because the opponent will try to tease you if they notice your hit chance is too high for their liking. Resting is great if you plan to make any shots using AP.

After you have defended, the opponent will shoot and make a defensive action. The game is then repeated until someone wins.

Winning strategies

Your opponent's skill may vary, and sometimes luck may not be in your favor. But you can turn most games into victory by making smart decisions.

Finding a playstyle you like is recommended, as part of the fun is the banter between the players, the teasing, and the stripping. That said, going all in on Arc shots followed by resting is a strategy that can be successful. Teasing your opponent to oblivion and mixing in some Focus and Bounce shots can work wonders, too. Getting your hit chances extremely high by focusing could make your opponent try to fixate on teasing you, putting them in defensive mode while you fastball your way to victory.

If you, for some reason, want to lose, that could prove a challenge in itself. Resting too much and only shooting fastballs is likely the worst strategy. But as you're dealing with a mini-game with random elements, anything could happen.

New Mechanic – Deviant score

An invisible tracker in Season 3 counts how often you've chosen actions that work against your relationship. If you're playing on **Jill's branch**, **Isabella's branch**, **Sage's branch**, or **Josy's & Maya's branch**, this tracker will activate in episode 9 and affect the story differently. The guide will refer to this as your **deviant score**. You cannot view the **deviant score** in-game, but you'll know from the guide if you have a higher or lower **deviant score** by reading the criteria for scenes and choices. Like your **DIK** score, you can consider the **deviant score** a statistic that shapes your character. The following are the events in Season 3 that will add to your **deviant score** and how much they increase it. You can also find the **deviant score** in the walkthrough section of the guide.

The girls?: <Nothing>

The decorations?: <Nothing>

The food?: <Nothing>

Tommy will ask you questions about the party activities. These activities will give you different scenes during episode 9 but are also part of the party planning mini-game. If you're playing with mini-games disabled, your choices will affect DIKs' happiness with your party more clearly.

Choose which activities you want for your party. Worth knowing is that the "Haunted mansion" activity will unlock a lewd scene if you're playing **Sage's branch**. And the "CUM-petition" activity will possibly unlock a lewd scene if you're playing **Others' branch**.

If you're playing with mini-games disabled, the two recommended combinations of choices are:

"Body shots", "Telling scary stories" and "CUM-petition"

and

"Drinking competition", "Haunted mansion" and "CUM-petition"

If you are playing with mini-games, pick whatever you want for now, and refer to the guide below for the rest of the mini-game.

Mini-game: Party Planning #1 – Halloween

If it is your first time playing the mini-game, play the tutorial to learn the basics.

There are countless ways to pass the party planner mini-game. Since the mini-game has random elements, it's impossible to give one perfect solution that covers everything. Instead, the guide will offer tips and tricks on how you can play each party. It is recommended that you play the game however you want and find your solution and strategy for the mini-game.

When you start the mini-game, three items will have been selected at random for you. The items that can be useful to upgrade for the Halloween party in general are: 1 Kegs, 1-2 Speakers, 1-2 Food, 1-2 Liquor. For your first item upgrades, choose items with that in mind.

The easiest perk to start with is Pink Weiss, which removes the requirement to use Cups to activate Beer. But if you're planning long-term and welcome a trickier start, "Crowdfunding", "Multiplier Madness", "Easy to Please" or "Hard to Let Down" are great choices as well. All perks are viable, and with the right strategy, you can attain the S rank at the Halloween party using any of them.

Before you start purchasing items, make sure you have selected the activities you want for the party. It is recommended always to select as many activities as possible, as they boost your rank, DIKs' happiness, and give extra scenes. One recommendation for the Halloween party is to either choose one of the following combinations:

- Beer Battle, Haunted Mansion and CUM-petition (Total cost: \$8)
- Body Shots, Scary Stories and CUM-petition (Total cost: \$7)
- Beer Battle, Scary Stories and CUM-petition (Total cost: \$6)

The DIKs will react to the different activities in the following ways:

Activity 1

- Body Shots: +3% happiness for Jacob, Jamie, Nick and Tommy.
- Beer Battle: +2% happiness for Jamie, Leon, Rusty and Tommy.

Activity 2

- Haunted Mansion: +2% happiness for Jacob, Jamie, John Boy and Nick.
- Scary Stories: +2% happiness for Derek, Jacob and John Boy.

Activity 3

- CUM-petition: +2% happiness for Leon and Tommy.

All items except Decor and Drugs are worth buying for this round. Decor only fulfills one of Nick's **needs**, and adding Drugs won't increase your **multiplier** because Jamie doesn't want Drugs at the party.

A good general strategy is to start by clicking all DIKs and reading their needs. Their positions are randomized, meaning you'll have to evaluate the best approach every time you play the mini-game. Some **needs** that are always worth fulfilling to get a high score are Girls, Food, Beers and Trashcans. Consider fulfilling Derek's Speakers **need**, if you have at least one free Speakers item in your inventory; it is too expensive to fulfill this **need** if you have to buy two Speakers.

Start fulfilling needs by adding Girls, Beers, Cups (if needed to activate the Beers), Trashcans and Food. If you have a Keg, activate it with a Cups supply, and use that same Cups supply to activate Liquor for either Leon, Derek and/or Rusty. Keep fulfilling the easy and cheap **needs**; if you have money left, look into fulfilling the more expensive **needs**.

Be mindful of how you use the grid, and try to share as many items as possible between DIKs. The most valuable slots on the grid are the ones next to several DIKs on the second and fourth rows. Make sure you share the items in those slots. Choosing 1 Food over 2 Snacks is recommended since the Food item only takes up one slot on the grid.

In this example, you can see how to share items during the Halloween party. Use it for inspiration, as you likely won't be able to follow it completely due to the random nature of the mini-game.

Pink Weiss was used in this example, and Beers were prioritized and effectively shared among DIKs. If you choose a perk like Pink Weiss, you should maximize its usage, or it will be wasted. Always apply that logic to the perks that you choose.

As a final tip for this round, try to keep all DIKs above two fulfilled **needs** and favor the DIKs who have easy and shared **needs**. If you want to achieve the highest score and rank, aim for a multiplier of at least **x6.5**.

Click the X button to the top right to end the mini-game.

After finishing planning the party, when Tommy leaves, you can click a magazine on the floor in the background to unlock a **special render**.

If you are playing with mini-games enabled, there will be a report for the Halloween party after you've completed it.

You can get the highest rank in different ways. The first way is to get a party score higher than 90000 points, but if you have three activities for your party, you only have to score 80000 points to get the S rank. The requirements for the lower ranks aren't listed in this guide.

You get to choose two new items to upgrade. A recommendation is to keep it balanced for now and choose items you have none of in your inventory or expensive items like Drugs, Kegs or Speakers. In general, don't upgrade the cheaper items too much, e.g., Beers and Snacks.

For the next perk, consider choosing "Easy to Please", "Hard to Let Down", "Multiplier Madness", or "Crowdfunding". You may choose different too. Other strategies include choosing all perks from the top row to eliminate the need for activation items and thus getting more space on the grid in the future. You can also start reducing the cost of expensive items with the second row of perks and later choose "Crowdfunding" or "Below Budget" to have plenty of money when planning parties. Maximizing the score of the party planning mini-game will require you to choose the happiness and score-related perks: "Easy to Please", "Multiplier Madness", "DIK party", or "Hard to Let Down".

It can be good to be a jack of all trades and choose a broad strategy, too. For example, choosing one perk per row and keeping an evenly distributed item inventory is a viable strategy.

When Derek talks to you in your room and you say, “That does sound like a hangover to me.”, there is a **special render** in the bookcase to find behind them.

Scene location: Free roam at the DIKs' mansion

Hint! Your **DIK** score will be updated, and you may have a new status in your Stats app.

You can find money at two spots in this free roam event; the first is on the floor below the cleaning bucket in Rusty's room. The second spot is on John Boy's bed.

You need to clean at least five spots from bottles and cups, but the guide will list how to find all spots.

You need to check five rooms for hidden cameras. These five rooms are: The bathrooms upstairs and downstairs, Jamie's, Nick's, and Jacob's.

Start by going to the left of your room and interact with your desk. One side of the puzzle box will open, and you can solve parts of it in episode 10 or save it for later.

The puzzle box solution

This is a step-by-step instruction on how to solve the puzzle box. Please note that if you click things not listed in the guide, you may have to take extra steps to make it work. Start by clicking the bottom left dial three times. Click the upper left dial three times. Click the lower right dial two times. Click the upper right dial one time.

The dials should now look like the picture, and you can click the middle button to unlock Side II. A loud clicking noise will sound when something new is unlocked.

Go to Side II to inspect the symbols. If you click the middle button repeatedly, you will notice it is closing the lids on the symbols. But four of the symbols never get closed. You want to find those four symbols on Side I and turn the dials to them. Avoid clicking the symbols for now, the guide will be harder to follow if you do.

Go back to Side I. Click the bottom left dial one time. Click the upper left dial two times. Click the bottom right dial two times. Don't click the upper right dial, as it's already in the correct position.

The dials should now look like in the picture. Click the middle button, and the puzzle box will close. This is the progress you can make with it in episode 10.

Enter the Right hallway and click the bottles on the floor.

If you're playing with mini-games enabled and have bought the Nerd Notes perk, its effect will be lost. Magnar offers you the chance to buy any of his new perks. The Pencil perk makes science class easier, allowing you to cross off steps on your notepad. The other boosters he sells make it easier to pass classes. If you're struggling with Math class, each level of the Math booster lowers the

passing grade limit by 10%; it also lowers the limit for getting the Special renders by the same. For example, having a maxed-out Math booster on top of studying Math once before a class, you would only need to pass 2 out of 5 tasks for a passing grade in Math class. The English booster works as before, with a 5% decrease in limits for passing grades and Special renders. The Science booster will boost the purity of your chemical by 5% per level, making it easier to get a perfectly pure chemical even when your weights and volumes are slightly off.

Derek approaches you after Magnar leaves, and if you're playing with mini-games enabled, he'll show you his new perks. The English cheat works as before, and you get more revealed words per cheat level. Having no points put into English cheat will reveal 25% of the words. Levels 1, 2 and 3 will reveal 33%, 40% and 50% of the words, respectively. The Math tools you can buy are explained in the Math mini-game section of this guide. Lastly, the Science Perk: Timer will give you 10% extra time per level during Science class. Consider buying it if you're struggling to complete the mini-game in time.

You can buy the perks from Derek and Magnar by calling them during some free roam events. The Math perks can also be bought from within the Math mini-game.

Mini-game: Math class #9

Read the mini-game section to learn the basics of the Math class. Note that the grid will always look the same for the tasks, but the answers may differ. As the tasks are randomized, each solution won't be listed in the guide, but it will look at a set of selected tasks and show you how to deduce them properly. Apply similar reasoning to your task to beat the Math class. If you are struggling with this mini-game, it is recommended that you use the checkmark tool. The tasks below will use color-blind accessible mode to make the guide readable for everyone.

Task 1

The best way is to always look at the criteria from top to bottom, if possible. For this task, the diamond cannot be found within two steps of the blue sphere.

Use the 'X' tool to mark the tiles within two steps of the blue sphere like this. The second criterion says the diamond is within three steps of an orange sphere.

Only one empty tile can be removed using the second criterion. The final criterion says the diamond is two steps from the pink sphere.

There is only one tile that fulfills all criteria at once. Mark it with the diamond tool and click Next. Note that you don't have to use the 'X' tool if you don't need it. The only thing that matters to the result is marking the diamond placement correctly.

Task 2

This grid is similar to the first task, but you are tasked to find two diamonds. Reading the criteria from top to bottom, we can deduce their locations. The diamonds are diagonal to one sphere.

Start by marking the tiles that aren't diagonal to a sphere with an 'X'. Also, pay attention to the wording of the criterion. It says "one sphere", meaning that you also can mark the middle tile with an 'X', as it is diagonal to two spheres – gray and blue. The second criterion doesn't help us, as all available tiles are diagonal.

The third criterion, however, tells us that the diamonds must be more than two steps away from the gray sphere. Only two empty tiles remain, and that's where the diamonds must be. Mark them with the diamond tool and click Next.

Task 3

The grid is bigger, and you're asked to find one diamond. The diamond is in a column that has at least one sphere. Start by removing the tiles that are in a column without any spheres.

After doing that, the second criterion tells us the diamond is more than four steps away from the gray sphere. This greatly helps us since many tiles can be marked with an 'X'.

Only three tiles remain after using the first two criteria. The final criterion solves the task since it tells us that the diamond must be diagonal to the pink sphere.

Only one possible tile can fulfill all three criteria at once. Mark it with the diamond tool and click Next.

Task 4

Now, things are getting harder. You're asked to find two diamonds. And in this case, you have one more criterion to use. The first problem you'll notice is that the first two criteria don't help you with anything initially. Skip them for now and read the third and fourth criteria.

The diamonds are one step away from one sphere. You can mark every tile that doesn't fulfill that criterion with an 'X'. Be sure to mark the tiles one step away from both orange and gray spheres since the criterion says it's one sphere – not two. The fourth criterion doesn't help us further, but we know that one of the three tiles next to the pink sphere must have a diamond. Remember this information and read the first criterion again.

The diamonds are diagonal to each other. This means we can mark the ones next to blue with an 'X' since none of those tiles are diagonal to the tiles next to the pink sphere, where we know one diamond is.

The second criterion brings us home, as it says that the diamonds are four steps away from each other. To deduce this, go through the tiles next to the pink sphere, one by one. Count four steps away and see if there's another empty tile there. If you cannot reach a diagonal tile that's four steps away, you can mark the tile next to pink with X.

By doing this, you will find the answer above. This task was tricky, but it was possible because you looked at all criteria and revisited them when needed.

Task 5

The final task asks you to find three diamonds. Finding several diamonds can be hard, but it can also be easy to eliminate many empty tiles quickly.

The rules of the game stay the same. Don't let any diamond placement break any criteria.

The first criterion helps us a lot, but not straight away. Remember that all three diamonds are in the same row and read the second criterion. All diamonds are at least two steps away from each other. This doesn't help us much, but it lets us know there is at least one tile between each diamond. The third and fourth criteria tell us which positions may contain diamonds. Using the '?' tool like this is recommended while reading the third and fourth criteria.

The screenshot shows a game interface with a 6x6 grid puzzle on the left and a task panel on the right. The grid contains several tiles: a blue tile with 'IV' at (1,3), a pink tile with 'I' at (1,6), an orange tile with 'II' at (3,1), and a grey tile with 'III' at (4,4). Green question marks are placed at (2,2), (2,4), (3,2), (3,3), (3,4), (3,5), (4,3), (4,5), and (5,5). The task panel on the right is titled 'Task 5/5' and contains the following text: 'Find 3' followed by a flame icon. Below this are four bullet points: 'All are in the same row', 'All are ≥ 2 steps from each other', 'One is = 1 step from III', and 'One is = 2 steps from two spheres'. At the bottom of the panel are five tool icons: a red 'X', a green question mark, a pink bomb, a grey checkmark, and a yellow flame. Below the icons are the counts '2/2', '2/2', and '0/3' respectively. At the very bottom of the panel are the labels 'Tooltips: Off' and 'Next'.

Task 5/5

Find 3

- All are in the same row
- All are ≥ 2 steps from each other
- One is = 1 step from III
- One is = 2 steps from two spheres

Tools

2/2 2/2 0/3

Tooltips: Off Next

Note that the 'X' tool is hard to use until we know more. But since we now know that at least two of the tiles marked with '?' contain a diamond, the first criterion lets us remove the rows that cannot have any diamonds.

Since we know that one of the diamonds is next to a gray sphere, we can remove yet another row.

Now it comes down to figuring out which row has all three diamonds. Using criteria 2 and 3 will let us figure it out. Only one of the tiles next to the gray sphere has a diamond, and since the diamonds have to be at least two steps

from each other, there is no way to fit all three diamonds on the lower row without breaking the second criterion. Thus, we can remove the lower row.

The diamonds must be on the middle row. We know that one diamond is next to the gray tile, and with criteria 2 and 4 we can also get another diamond.

None of the criteria are broken, and we only have one more diamond to find. Criterion 2 gives us the answer.

This is the only possible solution that doesn't break any criteria.

The difficulty of each task will vary. Sometimes, it's easier or harder to solve your task. However, with these five examples, you should have the tools to deduce the locations correctly. Remember to use the bomb and checkmark tool to your advantage without getting penalized.

When planning the DIKs' Thanksgiving party, you can choose between three sets of activities.

If you're playing with mini-games disabled, the recommended combinations of choices are:

- "New alcohol", "Hot dogs", and "Beer Pong"
- "B.Y.O.B.", "BBQ quality meat", and "Beer Pong"
- "Leftover alcohol", "BBQ pork", and "Beer Pong"

Try different combinations and see how your DIKs' happiness levels are affected before settling on one of the choices.

If you are playing with mini-games, pick whatever you want for now, and refer to the guide below for the rest of the mini-game.

Mini-game: Party Planning #2 – DIKs' Thanksgiving

Select the activities you want for the party. Make sure you have one of each activity to boost your activity score – B.Y.O.B. and Hot dogs do not count as an activity. The DIKs will react to the different activities in the following ways:

Activity 1

- New alcohol: +2% happiness for Derek, Jamie, Nick, Rusty, and Tommy.
- Leftover alcohol: +2% happiness for Derek and Tommy.
- B.Y.O.B.: -2% happiness for Derek, Jamie, Nick, Rusty and Tommy.

Activity 2

- BBQ quality meat: +2% happiness for Derek, Jacob, John Boy, Leon, and Rusty.
- BBQ pork: +2% happiness for Derek and Leon.
- Hot dogs: -4% happiness for Derek, Jamie, John Boy, Leon and Rusty.

Activity 3

- Beer Pong: +2% happiness for all DIKs.
- Nothing: -4% happiness for all DIKs.

The DIKs' placement on the grid is slightly randomized, and you'll notice it's difficult to fulfill many needs due to lack of space. A good rule of thumb for this round is to fulfill at least three **needs** for every DIK, if possible. If you have selected Pink Weiss as a perk, Beer **needs** will be easier to fulfill, and you might skip Liquor and Kegs to save that space for something else. The free supplies: Girls, Guys, and Music, all fulfill some **needs** this round. If you're running low on money but still have space to use, fulfill **needs** that don't cost anything. Play to

your strengths and aim at a multiplier around **x6.5** to achieve the coveted S rank for this round. Note that it can be hard to achieve the S rank if you go into this round with a low level of happiness.

If you're not playing with mini-games enabled, you will fight Troy. You can trigger Troy by saying he's nothing or bury the hatchet and say it's in the past.

To beat Troy, select the following combination of attacks:

Right – Right – Right – Left – Right – Right

After the fight, you can fight Alex and win \$2. To win against Alex, enter:

Up – Right – Up – Right – Left – Right

Mini-game: Brawler

If you're playing with mini-games enabled, Brawler will be available again, and you can fight five different opponents: Troy, Alex, Chao, Dwyane, and Tate.

If you have played Brawler a lot before, you'll notice that you already have some skill points allocated. If you haven't played Brawler much before, you can win extra skill points against Troy to catch up.

If Hard difficulty is too hard for you, you can lower it from the main menu of Brawler.

It is recommended to start beating Troy until you've gained all the skill points he offers. The first time you fight Troy, you can trigger Troy by saying he's nothing or bury the hatchet and say it's in the past.

You can put the skill points how you like, but the stats that can make things easier early on are Power, Block, and Counter. The Speed stat is good if you struggle with your reflexes.

Beat Alex to win money. Beat Chao to increase the skill level maximum cap to three. Beat Dwyane to unlock Flurry – the first special attack in Brawler. Beat Tate to unlock a special render.

Chao and Dwyane are especially hard and may take some practice to beat. The Block stat is useful as Chao and Dwyane deal much damage even if you block.

Exit Brawler when you're done playing. You can play Brawler during select free roam events, and there is another chance to play Brawler later in episode 10.

Mini-game: Science class

The first Science mini-game will start. Read the mini-game section to learn more about it. It has a random nature, meaning it will be different every time you play. But not everything will change, mostly which chemicals to use and the amount to weigh and measure. Also, pay attention to the color changes when you stir and boil the solution, as the color change determines what you should do in the next step. Step 8 will always result in a blue color in the round flask. If it turns blue when you reach this step, you've succeeded and can turn in your chemical for assessment. If it doesn't turn blue, it's advised to discard the solution and try again from the beginning.

If you're playing with mini-games enabled, your party will be evaluated.

You can get the highest rank in different ways. The first way is to get a party score higher than 90000 points, but if you have three activities for your party, you only have to score 80000 points to get the S rank. The requirements for the lower ranks aren't listed in this guide.

You get to choose two new items to upgrade. You should have gotten a good feel of which items to get by now. If you don't want to keep your item inventory balanced, try picking more expensive items for which you don't intend to have a perk. For example, if you add more Drugs as a free inventory item, you'll have less use for the Connections perk and can use something else from that row of perks.

Example strategy 1) Increase Drugs as free inventory item, but don't increase Kegs too much and get Wholesale to make Kegs cheaper.

Example strategy 2) Increase Kegs as free inventory item, but don't increase drugs too much and get the Connections perk to make Drugs cheaper.

You can also employ the same strategy with a combination of Speakers and the Black Friday perk.

More perks to consider are "Easy to Please", "Hard to Let Down", "Multiplier Madness" or "Crowdfunding".

Keep in mind that every party will be different and that the useful items during Party planning might rotate.

I hear you: You listened to what Jade said and gave up on her.

If you're playing with mini-games enabled, new fights and rewards in Brawler are unlocked. There are five choices to make connected to the fights. These choices shape how your character views fighting in different ways. The choices that align in one way are:

- Chao: Always up for a fight
- Dwyane: Preparing for it
- Tate: I'd never go easy on you
- Troy: Piss him off / Keep it a secret (After winning against him)
- Dawe: No regret

The choices that align in the other direction are:

- Chao: We can spar
- Dwyane: Want to defend myself
- Tate: I don't want to hurt you
- Troy: Share it (After winning against him)
- Dawe: Some regret

Additionally, if you have a **DIK** affinity or chose to still be mad at Troy in episode 10, you'll get aligned in the first direction.

A fourth round of the fish tank mini-game will start if you agreed to help Nick with the fish. Go to your desk to take care of your fish. Any budget you left with the fish tank in episode 10 is gone, as Nick took that money when he left.

If you're playing with mini-games enabled and want to spend money on perks, you can call Derek or Magnar.

You can study at your desk if you're playing with mini-games enabled.

Click the notepad on your desk to view a menu of Christmas gifts and prices per recipient. Near the end of the episode, you will shop for gifts and plan how much you want to spend per person on this menu. You'll need **\$18** if you plan on getting everyone the most expensive option, or you can buy something cheaper or choose not to buy anything at all for someone. It's your choice to whom you want to give a gift. Add and remove money from the budget with the + buttons. If you're playing without mini-games, you start with **\$5** in the budget.

If you want to solve the puzzle box, you can do it now or later in the episode. If you'd rather save it for later or not solve it every playthrough, there will be more chances to solve the puzzle box later. The puzzle box is optional, but it unlocks two **special renders** the first time you solve it.

The puzzle box solution

This is a step-by-step instruction on how to solve the puzzle box. Please note that if you click things not listed in the guide, you may have to take extra steps to make it work. If you haven't already, start by following the steps from Episode 10 to get the puzzle box in the same end state. After you've done that, you can continue with the following steps.

Check Side III of the cube and ensure you can see the following image.

The middle image suggests that you need to enter two words to progress. The words are “LOVE” and “HATE”.

Go back to Side I. Remember that the order in which you click the dials is important. To enter “LOVE”, click the bottom left dial one time; it should end up on a symbol that

resembles V. The upper left dial should already be on “L”; if not, click that dial until it is. Click the bottom right dial two times to end up on a symbol that resembles “E”. Click the upper right

dial three times to get a symbol that resembles the letter “O”. Click the middle button, and you should hear a sound that suggests that a side was unlocked.

Check that Side V was unlocked, but then return to Side I again. Enter the word “HATE” by clicking the bottom left dial three times, the upper left dial twice, the bottom right dial twice, and the upper right dial twice. Click the middle button, and another sound should play. Check that Side VI was unlocked.

Go to Side V and solve that puzzle. To solve it, you need to enter a combination of

symbols that add up to the number 15 (XV). Looking closely, you can see that the symbols are mirrored and overlapped digits. Click each button until you get a combination that fulfills these criteria: 1-9 are used, and all rows, columns and diagonals are equal to 15 when summed up. A solution to this puzzle is proposed with the following image.

When you have solved this side, a sound will play, and you won't be able to click the buttons anymore. Check Side III to see that you have unlocked two big panels. The remaining two panels are unlocked by solving side VI. Click VI and inspect it.

If you have followed the guide without clicking anything else, this is what the side will look like now. You'll see three rows with letters and symbols of a sun, a moon and stars. The solution to this side is entering "SUN", "MOON", and "STARS" in the rows of letters, but how to do so isn't solved on this side of the cube. Go to Side II of the cube. The symbols on Side II can be clicked, and each symbol is linked to a letter on Side VI. By clicking one symbol at a time, a letter on Side VI will change. You will need to click each one of the buttons until you figure out which letter they control and then spell the words "SUN", "MOON", and "STARS" on Side VI. If you have followed the guide and your Side VI looks like the image above, click the following to achieve this. Click each symbol the number of times that the image below shows.

After you've done that, click Side VI and press the button below "SUN",

"MOON" and "STARS" to unlock the remaining two panels on Side III. NOTE! If your words on Side VI don't spell "SUN", "MOON", and "STARS", it means you have clicked buttons on Side II differently from this guide. In that case, you must figure out

which buttons on Side II you need to press to get those words. Each button controls a letter and cycles through four different letters.

Go to Side III. There are 12 switches on Side III that you need to flip to a certain state. You will understand which state by repeatedly clicking the middle button on Side II and seeing if the symbol closes or is kept open. Four symbols remain open, meaning the switch should be open, as represented by the eye symbol. Flip the dials to look like this to complete Side III.

You'll hear another sound, and Side IV will open up. Go to Side IV. The letters at the bottom are linked to the Roman numerals at the top of Side I – VII VIII I II V IV III VI. Using the Roman numerals on Side I, you can reorder the letters on Side IV and get the letters “NOTCLOSE”. It spells “NOT CLOSE”, which can be ambiguous until you think more about it. The opposite of close is open – fitting for what you want to do with the lid. Enter the word “OPEN” on Side I. Go to Side I again.

Click the bottom left dial two times. Click the bottom right dial three times. Click the upper right dial three times. The dials should now look like this.

But if you click the middle button on Side I, nothing happens. You need to click the button on Side IV to open the lid. Go to Side IV and click the round button.

The final lid will come off. Click it to complete the puzzle box. You'll be rewarded by unlocking two **special renders**. If you solved the puzzle box without needing the guide, give yourself a big pat on the back and a cookie. You've earned it.

End the free roam event by exiting your room. Sage shows up if you're playing **Sage's branch** and didn't accept Jade's handjob in episode 3; if you don't have **DIK** affinity, you get **+ RP Sage**.

If you just hold her, you get - **DIK** point. If you buried your face in her ass, you will automatically get a lewd scene with her if you got her lewd scene in episode 9.

Otherwise, you can choose “I couldn’t resist you” to unlock the lewd scene. Choosing “Just having fun” will opt out of the lewd scene. Beware, if you’d rather unlock Melanie’s solo lewd scene in this free roam event, you should finish that before talking to Sarah, as you can only get one of these lewd scenes. You can kiss Sarah during the lewd scene to affect Sarah and alter the scene a bit.

If you are rolling with Lily, click Lily for a scene with Sage. Choose how you look at what you’re doing together with Lily; this choice will shape your character later in the episode, so pick what you desire. Pick whatever you want for the second question.

Exit the free roam event by heading to the right area of your room and clicking the couch.

It's time to plan the Christmas Panty Party. If you're playing with mini-games disabled, the recommended combinations of choices are:

- "Alcohol and food", "Cucumber Competition", and "Guess Who game"
- "Alcohol", "Wet T-shirt", and "Guess Who game"

It could be worthwhile trying other combinations of activities that don't maximize the use of your budget:

- "Alcohol", "Cucumber Competition", and "Guess Who game"
- "Alcohol and food", "Wet T-shirt", and "Nothing"

Try different combinations and see how your DIKs' happiness levels are affected before settling on one of the choices.

If you are playing with mini-games, pick whatever you want for now, and refer to the guide below for the rest of the mini-game.

Mini-game: Party Planning #3 – Christmas Panty Party

Select the activities you want for the party. Make sure you have three activities to boost your activity score; B.Y.O.B. does not count as an activity. The DIKs will react to the different activities in the following ways:

Activity 1

- Alcohol and food: +3% happiness for all DIKs.
- Alcohol: +2% happiness for Derek, Jacob, Jamie, Tommy and you.
- B.Y.O.B.: -2% happiness for all DIKs.

Activity 2

- Wet T-shirt: +2% happiness for Jacob, Jamie, Leon, Rusty and you.
- Cucumber Competition: +2% happiness for Derek, Jamie, Leon and Tommy.
- Nothing: -2% happiness for all DIKs.

Activity 3

- Guess Who game: +2% happiness for all DIKs.

Before you start purchasing items, make sure you have selected the activities you want for the party. It is recommended always to select as many activities as possible, as they boost your rank and DIKs' happiness; also, they give extra scenes. One recommendation for the Christmas Panty Party is to choose one of the following combinations:

- Alcohol and food, Wet T-shirt, and Guess Who game (Total cost: \$10)
- Alcohol and food, Cucumber Competition, and Guess Who game (Total cost: \$8)

Things are getting increasingly more difficult with this grid. Half of the DIKs are placed alongside the grid's border, giving them five tiles to fulfill their needs. The remaining four DIKs have eight tiles available, but finding the optimal way to share tiles can be tricky due to different needs. To make things more difficult, Nick's character and happiness are replaced with your character and at a low happiness level of 10%. You need to consider if it's best to prioritize boosting your character's happiness or letting the DIKs with higher happiness carry you to a higher score. Consider it a long-term vs. short-term decision. Letting your character stay at a low level of happiness will not have him contribute to the

score a lot, but increasing his happiness will come at the cost of other's happiness.

Depending on your perks, it's advised to fulfill 2-3 **needs** for every DIK. The perks "Easy to please" and "Hard to let down" will make this task easier.

Kegs are in high demand for this party. If your inventory is low and you don't have the Wholesale perk, any Kegs you need will quickly deplete your budget. Liquor is also in high demand and may be the cheaper option. If you have the Jello shots perk, Liquor will be a good choice to focus on when it comes to Items that cost money.

Consider placing a Drugs item between the DIKs in the bottom right corner.

If you are lucky and your grid allows it, Jamie and your character can share a Speaker item.

Fulfilling Tommy's 7 Girls special **need** is recommended. Depending on your grid, it could be favorable to have no more than 7 girls placed and leave room for other items.

Consider fulfilling one of Jamie's, Rusty's, and Derek's special **needs**, but not all of them. If you find yourself focusing on Food items, fulfill the trashcan need. If you are placing several cups, go for the Cups **need**. Adding three Music supplies is easy if you have a Speaker placed.

Play to your strengths and aim at a multiplier of around **x6.5** to achieve the coveted S rank for this round. Note that it can be hard to achieve the S rank if you go into this round with a low level of happiness. It's much harder to gain a high multiplier than in previous rounds; the perk "Multiplier madness" is useful.

Before you end the mini-game, check if your budget is at \$0 or if you have money to spare. It can be worth considering picking the Below Budget perk soon, but only if you already have Crowdfunding.

Click the X button to the top right to end the mini-game.

Here is an example of how to achieve a **x6.75 multiplier**. It will likely be a lot different than yours. The perks used were: Finger Food, Jello Shots and Easy to Please. The free inventory had 3 Kegs and 2 Liquor, making it an affordable strategy. It netted roughly 100000 points and an S rank when evaluated after the party.

The screenshot displays the game interface. On the left is a 6x6 grid of items and guests. The items include various food and drink icons, and the guests are represented by portraits. A green path is highlighted through the grid. At the bottom of the grid, a status bar shows a progress indicator at 59% and a message: "Decor will make this place look good!".

On the right is a sidebar with the following sections:

- Money:** \$0
- Multiplier:** 6.75x
- Score:** 177447
- Food:** Buy \$2, Sell \$2.

Mini-game: Math class #10

Read the mini-game section to learn the basics of the Math class. Note that the grid will always look the same for the tasks, but the answers may differ. As the tasks are randomized, each solution won't be listed in the guide, but the guide will look at a set of selected tasks and show you how to deduce them properly. Apply similar reasoning to your task to beat the Math class. If you are struggling with this mini-game, use the checkmark tool. The tasks below will use color-blind accessible mode to make the guide readable for everyone.

Task 1

The criterion that eliminates many tiles is the second one - “Neither is diagonal to a sphere”. We get this result if we use the ‘X’ tool to mark all tiles that are diagonal to any of the four spheres.

The fourth criterion tells us that one diamond is 3 steps from three spheres simultaneously. Only one of the tiles fulfills this criterion. It's marked with the '?' tool in the image below.

The diamonds are in the same column, and we already know the column. One diamond is in the same row as a sphere, and since the diamond we found isn't, it has to be the second diamond that fulfills that criterion. The solution becomes the following.

Task 2

Using the third criterion, we can mark the tiles exactly 3 steps away from at least one blue sphere. Only five tiles fulfill that criterion; they are marked with the '?' tool.

The first criterion tells us the diamond must be diagonal to one sphere. We remove the '?' from the tiles that break this criterion and are left with two possible tiles.

The fourth criterion tells us it is more than 2 steps away from a pink sphere. Only one tile fulfills that criterion. We have found the diamond, but we check that the second criterion also is correct. The diamond is in the same row as 2 spheres, and the second criterion also checks out.

Task 3

Using criteria three and four lets us use the 'X' and '?' tools like this.

There is only one tile that can fulfill the fifth criterion. It also fulfills the second criterion at the same time. It also means we know which row all diamonds are in. We can use the 'X' and diamond tools to mark the tiles like this.

Using the first criterion, we get the position of the third and final diamond. Our answer becomes the following.

Task 4

Start by using the 'X' tool to remove the tiles in the same column as a sphere. Then, use the '?' tool to highlight all the tiles 4 steps away from a sphere. When you do this, make sure that you check 4 steps from all four spheres, one at a time. You should end up with this result.

The first criterion tells us that 6 empty tiles surround the diamonds. Check each '?' and remove the '?' from any tiles with fewer or more surrounding empty tiles. You will get the following result.

The second criterion tells us that the diamonds are diagonal to each other. Only two of the five remaining tiles marked with '?' fulfill this criterion. Our answer becomes the following.

Task 5

Start by using the '?' tool to mark the tiles within 2 steps from a grey sphere.

The third criterion tells us that we can remove the '?' from any tiles adjacent to a sphere. We get the following result.

The second criterion tells us the diamond is diagonal to one sphere. Remove the '?' from tiles that aren't diagonal to any spheres or are diagonal to more than one sphere. Only one tile will remain, and it must be where the diamond is.

The guide will explain how this choice affects your game later.

Scene location: Isabella's party

If you chose to stay at the Christmas Panty Party or returned to Zoey, you can skip this section.

Isabella will challenge you to a game of Beer Pong. Winning and losing will affect the upcoming hangout differently. Depending on your desired outcome, you may want to save before playing Beer Pong as Isabella puts up a mean fight.

Double or nothing: <Nothing>

A hangout will start, and you will have to interact with everything to continue. Start by clicking Sage.

Let's do it: Unlocks a threesome with Sage and Camila later. Note that getting this threesome lewd scene means that you can't get Sage's solo lewd scene.

No: <Nothing>

Sage "That this is the only time I have to cuddle with you wearing that." If you're playing Sage's branch, lost at Beer Pong and didn't accept having a threesome with Sage and Camila.

I promise: <Nothing>

Don't you like it?: <Nothing>

Select a new perk. If you struggle to pick a new perk, consider having one perk from each row of perks. If you struggle with keeping the DIKs' happiness high, "Easy to please" and "Hard to let down" are great perks – alone or in combination.

Lily

If you're dating Nicole, you have to choose Lily over Nicole at the Christmas Panty Party free roam event when you're talking to Nicole about your relationship. Talk to Lily later during the free roam event to unlock the lewd scene. If you told Sage that you wanted to be something more with Lily during the free roam event where you decorate the mansion, you will have the option to fuck Lily gently.

Choose to help her with her Dirty Bowl mission to unlock the lewd scene.

Elena

To unlock this lewd scene, you must play the **Others' branch** and have prepared Elena for this in earlier episodes.

The steps for having Elena prepared are:

1. Have a shot with Elena at the dorm party in episode 8.
2. Do not get used by Heather during the Halloween party. Turn her lewd scene down with any of the choices that reject her.
3. Tell John Boy that you find Elena hot at the BBQ party in episode 10.
4. During the free roam event in your room after the BBQ party, Elena will chat with you on the Chat app and eventually mention what John Boy said during the BBQ. Make sure you choose the following answer "Honestly, I was weirdly flattered and a bit interested in doing that. But maybe you're right about it getting awkward if we did that together. Hot as you are, I

value our friendship even more than having sex with you. Besides, I'd probably ruin him for you."

If you did the four steps correctly, Elena is now prepared for the episode 11 lewd scene.

Talk to Elena during the Christmas Panty Party free roam event in Derek's room. You'll be tasked to find out who X is. Later in the free roam event, talk to Leon in Tommy's room and make him give you his mission. Approach Elena in the upper area of the mansion to let her know you have the mission. If you're late in the free roam event, you can now enter John Boy's room to interrupt John Boy and Elena while they are having sex. You will be asked to join if you don't let Heather use you during the Halloween party. Choose to get a blowjob to unlock the scene. Note that you cannot get this lewd scene after Quinn's scene during the Christmas Panty Party free roam event.

Sage

Play **Sage's branch** and choose to leave the Christmas Panty Party to go to Bella's party. Avoid kissing Zoey to make sure you head to Bella's party. If Sage asks you about having a threesome with Camila,

turn it down. If your **deviant score** is 4 or less and you didn't get a handjob from Jade in episode 3, tell Sage you love her and you will unlock this lewd scene.

Sage & Camila

Play **Sage's branch** and prepare Sage for the lewd scene by following these steps:

1. Have a threesome with Sage and Quinn in episode 8 and/or have at least one lewd scene with Camila earlier in the game – there are six opportunities for a lewd scene with Camila in the game, and you need one of them for this to count.
2. If you had slept with Jade in episode 4, you could not have told Derek about it. Not doing anything with Jade works, too.
3. In episode 9, when Sage asks you if you're on board for everything she would suggest, you must tell her "Likely". Do not tell her that you prefer vanilla.
4. When playing Dots with Sage and Camila in episode 10, you need to answer at least two of the three flirtatious questions correctly. Choose at least two of "No promises", "Enjoy it", and "Got too excited by you two" to show Sage that you enjoyed fooling around with her and Camila.
5. During English class in episode 11, tell Camila that "My bed is big enough". After that, you don't have to flirt more with her unless you want to.

During the Christmas Panty Party free roam event, choose to leave the party and head to Bella's party. Before you can leave, you will talk to Camila. If you

did all of the above correctly, you can choose “Let’s ask Sage” when Camila starts flirting and alluding to having a threesome.

Avoid kissing Zoey and head to Bella’s party. Sage will eventually bring up the subject of the threesome, and if you choose “Let’s do it”, the scene will unlock after Bella’s party ends.

Jill #2

Play **Jill’s branch** and avoid kissing Zoey at the Christmas Panty Party. It will unlock later in the episode.
