<u>Now & Then</u> By ILSProductions <u>https://www.patreon.com/ilsproductions</u>

> This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlights elements, not influence your decision. There isn't a right or wrong way through the game, only <u>you</u> should decide.

Only decisions that have an impact on the story or your character are shown. There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

Legend

Character and game related attributes that can be increased/decreased (i.e.: a number value) will be represented with an icon followed by the character/description name: \bigcirc Bubu or \diamondsuit Bubu

More complex values will be written as text instead: girls kissed +20

Reference to these values will reuse the same icon or text: Bubu is at least 5 girls kissed is at least 25

lcons

+1 Love/Like point
 +1 Trust point
 +1 Trust point
 +1 Nerve point (scared)
 +1 Nerve point (calm)

Flow Symbols

Decision labels

When something you do can have an impact later on in the game, a label will be visible where it happens like this decide something ^{#123} In some rare cases decisions can be reversed, to distinguish it more easily the label will look like this did not decide something ^{#123}

References to this label will also include the same number so it is easy to track it down to where it happened (could be multiple places). decided something ^{#123}

Some decision labels can denote a progression and sometimes we must check if the current value is above or below a certain threshold. To keep it succinct, all accepted values will be listed in brackets.

For example let's define some karate belts and assign each one to a numerical value:

O → white belt ^{#78}, 1 → yellow belt ^{#78}, 2 → orange belt ^{#78} If in the code the condition checks that the value must be at least 1 (karate_belt >= 1) It will be listed like this: karate belt: [yellow, orange] ^{#78}

Check the last page of the walkthrough to learn how you can use the developer console to cheat alter their value for your benefit: (<u>link</u>).

Enjoy the game!

Cheat without a MOD	

Now & Then **Chapter 1** Apartment Can I do anything to help? I'm getting bored of staying here, locked up inside. • You can help around the building: 🐑 Carol • No, it's not safe.

Now & Then Chapter 12

• Your call. You're a grown woman. • I'd rather keep you all to myself. Naomi is bi ^{#019} No unlocked Sydney alternate scenes (ch12)^{#026}? Yes Sydney comes back to watch Naomi Only if was intimate with Naomi (ch12) She sees you fuck Naomi

-10

Who says we need them? You could always skinny-dip. Look, I'll even join you in getting naked.

• Maybe find yourself a place in the community.

Now & Then Chapter 22

So you want to try out a new branch but do not feel like completely starting over a new game?

Don't worry, with the developer console you can easily modify in-game variables. You only need some basic understanding of scripting.

The easiest way to enable it is to use the Universal Ren'Py Mod from 0x52. Download it from the webpage: <u>https://0x52.dev/mods/Universal-Ren-Py-Mod-1000</u>, then unzip it and drop the rpa file in the game folder.

(Re)Start the game and load a savegame, type ALT+O (Hold the ALT key and type the letter O) to open the console and use the ESC key to exit

Character variables

variable: The variable

definition: what it represents

set variable / new value: what to type in the developer console to turn the variable on or set a new value unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value

variable	definition	set variable / new value	unset variable	check current value
carol_love	Carol love points	carol_love = value		carol_love
carol_nerve	Carol nerve points	carol_nerve = value		carol_nerve
carol_trust	Carol trust points	carol_trust = value		carol_trust
carol_ch3_fashion	Carol fashion points	carol_ch3_fashion = value		carol_ch3_fashion
carol_ch5_orgasm	Carol orgasms	carol_ch5_orgasm = value		carol_ch5_orgasm
carol_sex	Carol sex sessions	carol_sex = value		carol_sex
caroldistance	Carol distance	caroldistance = value		caroldistance
carolimpreg	Carol pregnancy	carolimpreg = value		carolimpreg
naomi_love	Naomi love points	naomi_love = value		naomi_love
naomi_nerve	Naomi nerve points	naomi_nerve = value		naomi_nerve
naomi_trust	Naomi trust points	naomi_trust = value		naomi_trust
naomi_relationship_tier	Naomi relationship tier	<pre>naomi_relationship_tier = value</pre>		naomi_relationship_tier
naomi_sex	Naomi sex sessions	naomi_sex = <i>value</i>		naomi_sex
s_like	Sydney like points	s_like = value		s_like
s_trust	Sydney trust points	s_trust = value		s_trust
s_sex	Sydney sex sessions	s_sex = value		s_sex
