Gameplay

Consider the gameplay as an example of **gaining access to the bathroom**.

1. In the morning or in the evening when there is

someone in the bathroom, click on  Nick will comment that the door is closed. However, you can do something with a door lock.

2. Go to Nick's room and click on  and then on

Select "Door Lock" Nick will spend some time looking for a solution to the lock problem. Then it will be concluded that the door lock is best broken.

3. Click again  and then on  Select "Other" and then "Tool set".

4. Wait for the night and go to the bathroom. Press

Done! Now you can open the door to the bathroom, even when someone is there.

Characteristics

At the moment, only one important characteristic of the characters is implemented. This is sexual arousal.(Horny)

It looks like this...

The more the circle is filled, the higher the sexual arousal.

However, only two points are important. This is either a black circle or when it is completely purple.

The first option means that the character is generally **not sexually aroused**, and the second that is **maximally aroused**.

Intermediate options do not affect the gameplay and game events.

The red x is the effect, showing that the character is in a **bad mood**.

A glass with bubbles is an effect acting on a character. In this case, **it's alcohol**.

Time of day

The game has four main time of day and one additional. It is possible to distinguish one time of day from another by means of lighting. **In the morning** the sun shines brightly from the windows. **The afternoon** sunlight is diffuse and not so bright. Artificial lighting is used in the **evening**. And at **night** well, it's dark at **night**. There is also an extra time of day, **early morning**. To

activate it, you need to press  after waking Nick.
