Walkthrough 0.24.0

About TOXICity

It rolled in slowly. In a town in its off-season, no one noticed when the city streets grew empty. No one thought twice about it when people called in sick. And then, while at work, John and his coworker, Kallie, witness an unusual fog surrounding their office. Cellphone service stopped. Phone lines went dead. Almost immediately, they lost contact with the outside world. When they went out to investigate, the fog burned their exposed skin and made them sick. Stranded, they have to find out what's happening and how they might be rescued.

Stats

Here is a description of what the various stats in **TOXICity** represent.

Love - A measure of the romantic feelings a character has for the Main Character. Raised by performing activities that involve intimacy or affection. Do you show kindness or care in a moment when they're struggling? Or, do you blow them off?

Friend - A measure of your friendship with the other characters. Improving this will alter conversations and potentially unlock variations in scenes that might allow for romantic events.

Desire - Represents the sexual tension between characters. Even if they are not romantically involved, this stat might open up moments you normally wouldn't see.

Trust - Does the character trust the Main Character's decision-making ability? Can they be relied on to follow his lead? This is a modifying stat that can alter conversations and scenes.

Anxiety - Is the character stressed by the events that go on around them? Can the Main Character convince them that it's all going to work out or they are safe in the meantime? This is a modifying stat that can alter conversations and scenes.

How to Use the Walkthrough

As you progress through the story, you will be presented with **choices**, often where the options bestow alternative dialog and stat changes based on how the characters react to your words and actions. *(See the example on the right.)*

There are also moments where characters will gain or lose certain stat points due to events beyond your control. These are noted in the walkthrough.

Example:

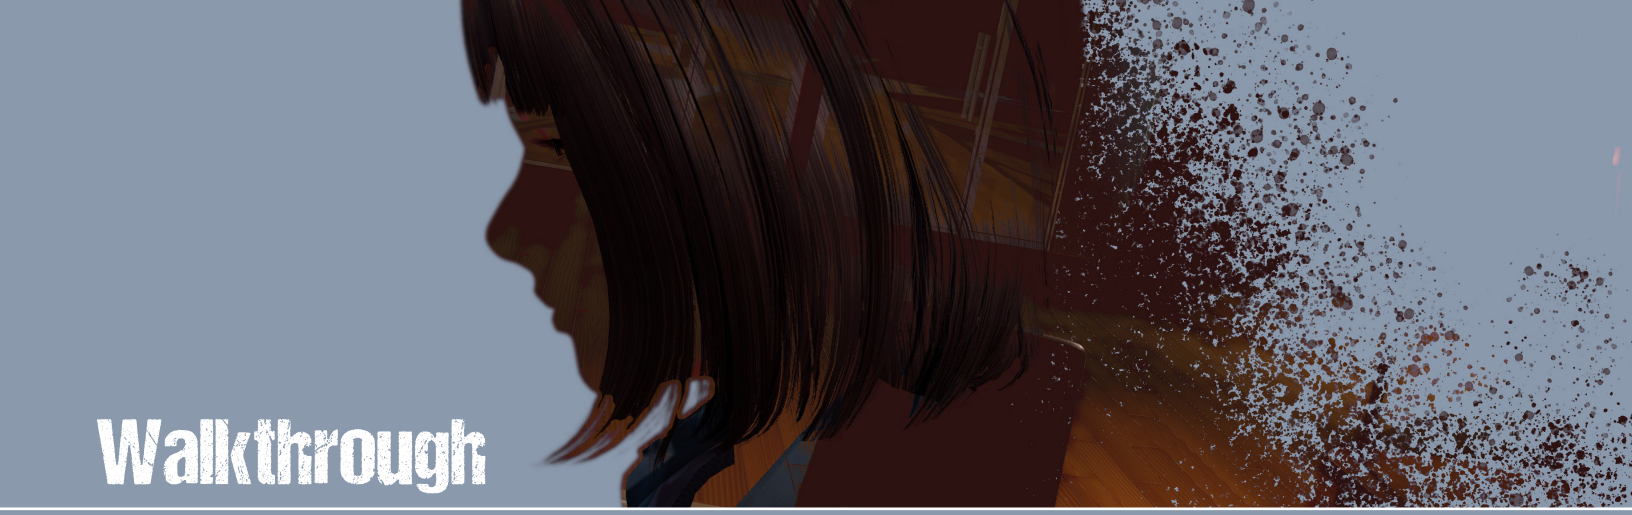

Choice

"Keep quiet"

"Agree with Laura."

F Laura +1

Here, the second choice gives Laura +1 point in Friendship.
